(b) Mr. Banerjee request you to Amended Cash Book for January 2013, as his cash clerk reported a figure of $₹ 23,030$ (credit) as on 31.1.2013. Scrutiny revealed the following discrepancies:

- Cheques issued and deposited by the cash clerk in January 2013, were ₹30,000 and $₹ 14,000$ respectively. However, against the above, the Bank had paid out and debited cheques worth ₹ 18,000 only and cleared and credited cheques worth ₹ 8,000 only, by 31.1.2013.
- A customer had paid in ₹12,800 directly into Mr. Banerjee's Bank account, the effect which was not recorded in the Cash Book.
- Bank commission of ₹90 charged was recorded in the Pass Book.
- Total cash withdrawals of ₹6,000 by self and bearer cheques for office use, were recorded erroneously as ₹10,000 in the Cash Book.

4. (Answer any two)
(a) The net total balances extracted from purchases ledger of Mr. M on March, 2013 amounted to ₹ 12,560 which did not agree with balance on the Purchase Ledger Control Account.

The audit revealed the following errors which were appropriately adjusted to make the books balances:

- A debit balance of ₹ 40 in the Purchase Ledger and been recorded as a credit balance.
- Mr. N had been debited for goods returned to him ₹ 90 but no other entry was made.
- The Purchase Day Book had been overcast by ₹100.
- Credit balance on the Purchase Ledger amounting to ₹480 and the debit balance amounting to ₹20 had been omitted from the list of the balances.

You are to prepare (a) a statement reconciling the original net balance extracted from the Purchase ledger with the corrected balance on the Purchase Ledger Control Account and (b) the Purchase Ledger Control Account showing the balance just before the correction of the errors and the adjustments made thereon.

(b) Mention any four advantages of Self-Balancing System.

Answer:

## Answer to PTP_Intermediate_Syllabus 2012_Dec2014_Set 1

The advantages of Self-Balancing system are:
(a) If ledgers are maintained under self-balancing system it becomes very easy to locate errors.
(b) This system helps to prepare interim account and draft final accounts as a complete trial balance can be prepared before the obstruction of individual personal ledger balances.
(c) This system is particularly useful (i) where there are a large number of customers or suppliers and (ii) where it is desired to prepare periodical accounts.
(d) Committing fraud is minimized as different ledgers are prepared by different clauses and internal check system can also be strengthened as it becomes possible to check the accuracy of each ledger independently.
(c) From the following particulars prepare the General Ledger Adjustment Account as it would appear in the Consignment Ledger of Delhi Enterprises:

Proportionate Discount Charges

## Answer:

Proportionate Discount Charges:

If the date of maturity of a bill falls on a date of a month within the accounting year, discounting of bill can be done without any problem. But when the date of maturity falls on a month of the next year i.e. the due date falls on two accounting periods, problem will arise. In such a situation, proportionate amount of discount will be charged to Profit and Loss Account.
This can be understood with the help of the following example:

A bill was drawn on 1st November, 2013 for ₹ 40,000 for 3 months. The bill was discounted by the bank on same day @ $12 \%$ p.a. Therefore, the total amount of discount will be ₹ 1,200 (i.e. $40,000 \times 12 \% \times 1 / 4$ ). So $2 / 3$ rd of $₹ 1,200$, i.e. ₹ 800 will be transferred to Profit and Loss Account for the year ended 31st December, 2013.

## Answer to PTP_Intermediate_Syllabus 2012_Dec2014_Set 1

(c) The premises of XY Ltd. were partially destroyed by fire on $1^{\text {st }}$ March,2013 and as a result, the business was practically disorganized upto $31^{\text {st }}$ August, 2013. The company is insured under a loss of profits policy for ₹ $1,65,000$ having an indemnity period of 6 months.

From the following information, prepare a claim under the policy:

| SI. | Particulars | Amount (₹) |
| :---: | :--- | ---: |
| No. |  |  |
| (i) | Actual furnover during the period of dislocation (1.3.2013 to 31.8.2013) | 80,000 |
| (ii) | Turnover for the corresponding period (dislocation) in the 12 months <br> immediately before the fire | $2,40,000$ |
| (iii) | Turnover for the 12 months immediately preceding the year fire <br> (1.3.2012 to 28.2.2013) | $6,00,000$ |
| (iv) | Net Profit for the last financial year | 90,000 |
| (v) | Insured standing charges for the last financial year | 60,000 |
| (vi) | Uninsured standing charges | 5,000 |
| (vii) | Turnover for the last financial year | $5,00,000$ |

Due to substantial increase in trade, before and up to the time of fire, it was agreed that an adjustment of $10 \%$ should be made in respect of the upward trend in turnover. The company incurred additional expenses amounting to ₹ 9,300 immediately after the fire and but for this expenditure, the turnover during the period of dislocation would have been only ₹ 55,000 . There was also a saving during the indemnity period of ₹ 2,700 in insured standing charge as a result of the fire.

## Answer:

## A. Rate of Gross Profit

|  | $₹$ |
| :--- | ---: |
| Net Profit for the Last Financial Year | 90,000 |
| Add: Insured Standing Charges | 60,000 |
|  | $1,50,000$ |

Turnover for the last financial year $=5,00,000 . \therefore$ Rate of Gross Profit $=\frac{1,50,000}{5,00,000} \times 100=30 \%$.
B. Short Sales

|  | $₹$ |  |  |
| :--- | ---: | :---: | :---: |
| Turnover during the corresponding period from 1.3.2012 to 31.8.2012 | $2,40,000$ |  |  |
| Add: Increase @ 10\% | 24,000 |  |  |
|  | Standard Turnover |  |  |
| Less: Actual turnover in the current dislocation period |  |  |  |
| Short Sales |  |  | $1,84,000$ |

C. Gross Profit on Short Sales $=30 \%$ of $1,84,000=₹ 55,200$.
D. Adjusted Turnover

|  | ₹ |
| :--- | ---: |
| Annual Turnover [1.3.2012 to 28.2.2012] | $6,00,000$ |
| Add: Increase @ 10\% | 60,000 |
| Adjusted Turnover | $6,60,000$ |

E. Gross Profit on Adjusted Annual Turnover $=30 \%$ of $6,60,000=₹ 1,98,000$
F. Additional Expenses Minimum of :
i. Increased Cost of Working $x \frac{\text { Net Profit + Insurred Standing Charges }}{\text { Net Profit + All Standing Charges }}$

$$
=₹ 9,300 \times \frac{90,000+60,000}{90,000+65,000}=₹ 9,000
$$

ii. Gross Profit on Sales enhanced $=30 \%$ of ( $₹ 80,000-₹ 55,000$ ) $=₹ 7,500$
iii. Actual additional expenses ₹9,300
Allowable Additional Expenses = ₹ $\mathbf{7 , 5 0 0 .}$
So, amount admissible as additional expenses $=₹ \mathbf{7 , 5 0 0 .}$

| Computation of Claim |  |
| :--- | ---: |
| Loss of Profit on Short Sales (Note 3) | ₹ |
| Add: Additional Expenses Allowed | 75,200 |

## 6. (Answer any two)

(a) VK Ltd. sold goods worth ₹50,000 to YK Ltd. YK Ltd. asked for discount of ₹8,000 which was agreed by VK Ltd. The sale was effected and goods were dispatched. After receiving, goods worth ₹ 7,000 was found defected, which they returned immediately. They made the payment of $₹ 35,000$ to VK Ltd. Accountant booked the sales for $₹ 35,000$. Please discuss.

## Answer:

As per AS 9, revenue is the gross inflow of cash, receivable or other consideration arising in the course of the ordinary activities of an enterprise from the sale of goods, from the rendering of services, and from the use by others of enterprise resources yielding interest, royalties and dividends.
VK Ltd. should record the sales at gross value of ₹ 50,000 . Discount of ₹ 8,000 in price and goods returned worth ₹ 7,000 are to be adjusted by suitable provisions. VK Ltd. might have sent the credit note of $₹ 15,000$ to YK Ltd. to account for these adjustments. The contention of the accountant to book the sales for ₹ 35,000 is not correct.
(b) Write a note on - MOU [The Minutes of Usage].

## Answer:

The Minutes of Usage (MOU) is the total duration of minutes for which a customer uses a telecommunication network during a given month. In the nascent days of mobile telecommunication in India, airtimes rates were very high and a customer had to pay for incoming calls as well. During those days, the MOU ranged from 110 to 150 minutes per month, as customers were wary of making calls.

## Answer to PTP_Intermediate_Syllabus 2012_Dec2014_Set 1

However, with falling rates, the MOU has steadily reduced. As on September 2005, the blended MOU was in the range of 367 minutes signifying a multi-fold increase in network utilization.
The MOU is also analysed between prepaid and post-paid services and further drilled down between incoming and outgoing. In the current billing system, a customer does not pay for any incoming calls. However, incoming calls bring in revenue for a telecom operator in the form of IUC charges paid by other service providers for terminating calls.

(ii) Discuss the steps involved in ODRC Method (Optimised Depreciated Replacement Cost).

## Answer:

The ODRC (Optimised Depreciated Replacement Cost) Method comprises the following steps:

Step 1: Preparing a detail Asset Register containing data on quantity, location, physical condition, age and maintenance of the assets.
Step 2: Calculation of the Replacement Cost (i.e. Cost of replacing the assets with modern equivalent assets).

Step 3: Assessment of Depreciation. The new assets at replacement costs identified earlier need to be depreciated in case the life of the existing asset is lower than the life of the new assets.
Step 4: System Optimisation: This is done to measure the most cost effective way of delivering service, in terms of capacity and quality to meet the requirements.

This involves three levels:
(i) Capacity Optimisation both in size and number;
(ii) Optimisation of spares; and
(iii) Optimisation of unit costs.
(b) When closing the books of a bank on 31.12 .2012 you find in the loan ledger an unsecured balance of $₹ 2,00,000$ in the account of a merchant whose financial condition is reported to you as bad and doubtful. Interest on the same account amounted to ₹ 20,000 during the year.
How would you deal with this item of interest in 2012 account?
During the year 2013, the bank accepts 75 paise in the rupee on account of the total debt due up to 31.12.2012.

Show the entries and the necessary accounts showing the ultimate effect of the transactions in 2013 books of account under Interest Suspense Method.
[4+2+2=8]

## Answer:

When preparing the 2012 accounts the sum of $₹ 20,000$ due from the merchant on account of interest should not be carried to Profit and Loss Account, because its recovery was doubtful. It should, therefore, be transferred to an Interest Suspense Account which would appear as a liability in Balance Sheet on 31.12.2012.

## Notes:

A. Interest amounting to ₹20,000 due from customer has been debited to him by crediting Interest Suspense Account (and not to Interest A/c as its recovery is doubtful) and Interest Suspense A/c will appear in the liability side of the Balance Sheet.
B. Actual amount of interest which has been received in cash, i.e. ₹ 15,000 , is transferred to P\&L A/c.
(c) From the following figures appearing in the books of Fire Insurance division of Vipul General Insurance Company, show the amount of claim as it would appear in the Revenue Account for the year ended 31st March, 2014:
