Section $A$ is compulsory and answer any 5 questions from Section $B$

## Section A

1. Answer the following questions (give workings):
(i) MGS Ltd. purchased a machine costing ₹ $1,25,000$ for its manufacturing operations and paid shipping costs of ₹ 30,000 . MGS Ltd. spent an additional ₹ 12,000 testing and preparing the machine for use. What amount should MGS record as the cost of machine?

## Answer:

As per As 10, the cost of fixed asset should comprise its purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Cost includes the purchase price, freight and handling charges, insurance cost on the machine while in transit, cost of special foundations, and costs of assembling, installation and testing.
Therefore the cost to be recorded is $₹(1,25,000+30,000+12,000)$ i.e. $₹ 1,67,000$.
(ii) $M$ bought goods from $N$ for ₹ 16,000 . $N$ draws a bill on 1.1.2013 for 3 months which was accepted by $M$ for this purpose. On 1.3.2013, $M$ arranged to retire the bill at a rebate of $15 \%$ p.a. Show the entries in the books of N .

Exchange rates were U.S $\$ \mathrm{I}=₹ 42.50$ and $₹ 45.00$ as on 01.01 .2013 and 31.12 .2013 respectively. First installment was paid on 31.12.2013. The entire difference in foreign exchange has been capitalized.

## Answer to PTP_Intermediate_Syllabus 2012_Dec2013_Set 1

You are required to state, how these transactions would be accounted for.

## Answer:

Foreign Currency Loan= ₹ 5,100 lakhs/ ₹ 42.50= 120 lakhs US Dollars
Exchange difference = 120 lakhs US Dollars $\times(₹ 45.00-₹ 42.50)=₹ 300$ lakhs
(including exchange loss on payment of first instalment)
Therefore, entire loss due to exchange differences amounting ₹ 300 lakhs should be charged to Profit and Loss Account for the year and the stand of the company is wrong.

(b) On ${ }^{\text {st }}$ April, 2012 Good Morning Ltd. offered 100 shares to each of its 500 employees at $₹ 50$ per share. The employees are given a month to decide whether or not to accept the offer. The shares issued under the plan (ESPP) shall be subject to lock- in on transfers for three years from grant date. The market price of shares of the company on the grant dated is ₹ 60 per share. Due to post-vesting restrictions on transfer, the fair value of shares issued under the plan is estimated at ₹ 56 per share.
On $30^{\text {th }}$ April, 2012, 400 employees accepted the offer and paid ₹ 30 per share purchased. Normal value of each share is $₹ 10$. Pass journal entry.

## Answer:

Fair value of an ESPP = ₹ 56 - ₹ $50=₹ 6.00$
Number of shares issued $=400$ employees $\times 100$ shares $/$ employee $=40,000$ shares
Fair value of ESPP which will be recognized as expenses in the year 2012-2013
$=40,000$ shares $\times$ ₹ $6=₹ 2,40,000$

$P$ retired on 1.9.2013 and the partnership deed provided inter alia that in the event of admission, retirement or death of a partner, the assets and liabilities are to be revalued and that goodwill of the firm is to be computed on the basis of 2 years purchase of the correct profit of the last 4 years.

During the period he drew ₹ 30,000 , interest on drawings @ $6 \%$ p.a.
It is discovered that the accounts required adjustments owing to certain mistakes in earlier years. On 1.10 .2010 repairs to machinery for ₹ 6,000 had been wrongly debited to the Machinery Account, and on 1.4 .2011 a piece of furniture, whose book value was ₹2,000 was disposed of for ₹ 800 but the proceeds were wrongly credited to Sales Account. The partners had been charging depreciation on all fixed assets at $10 \%$ p.a. on the reducing balance system on a time basis. Profits for the last four years without adjusting the above mentioned mistakes were as follows:
2009-10 ₹20,000; 2010-11 ₹24,000; 2011-12 ₹32,000; 2012-13 ₹36,000.
Revaluation on the date of retirement was:
Machinery- ₹90,000; Furniture- ₹10,000; Motor car - ₹22,000.
Partner will also be given proportionate share of profits based on the last year's profit. Determine the amount to be paid to the retiring partner.

## Workings:

1. Computation of Credit Sales

Cash Sales were $80 \%$ less than Credit Sales. So, if credit sales are ₹ 100 Cash Sales will be ₹ 20 ; Total Sales (Cash + Credit) will be ₹ 120 . Total Sales (₹ $76,000-₹ 10,000$ ) $=$ ₹ 66,000

Amount of Credit sales will be ₹ $\frac{66,000 \times 100}{120}=₹ 55,000$.
2. Cash received

Cash received is $60 \%$ of opening Debtors plus Credit sales i.e. $₹ 40,000+₹ 55,000=₹ 95,000$
Cash received $89,000 \times \frac{60}{100}=₹ 57,000$.
(c) What are the advantages of Self Balancing System?

## Answer:

The advantages of Self-Balancing System are:
(i) If ledgers are maintained under self-balancing system it becomes very easy to locate errors.
(ii) This system helps to prepare interim account and draft final accounts as a complete trial balance can be prepared before the abstruction of individual personal ledger balances.
(iii) Various works can be done quickly as this system provides sub-division of work among the different employees.
(iv) This system is particularly useful -

- where there are a large number of customers or suppliers and
- where it is desired to prepare periodical accounts.
(v) Committing fraud is minimized as different ledgers are prepared by different clerks.
(vi) Internal check system can be strengthened as it becomes possible to check the accuracy of each ledger independently.

4. (a) Compute the percentage of completion and the Contract Revenues and Costs to be recognized from the following data.
Contract Price - ₹150 Lakhs
Materials issued to the Contract — ₹ 36 Lakhs of which materials costing ₹ 6 Lakhs is still lying unused at the end of the period.
Labour paid for workers engaged at site — ₹ 24 Lakhs (₹ 4 Lakhs is still payable)
Specific Contract Costs - ₹ 12 Lakhs, Sub-Contract Costs for work executed - ₹10 Lakhs, Advances paid to Sub-Contractors - ₹ 6 Lakhs
Cost estimated to be incurred to complete the Contract — ₹ 60 Lakhs.

| Answer: |  |
| :---: | :---: |
| Based on above information, the Proportionate Cost Method will provide a realistic estimate of stage of completion. This is calculated as under - |  |
| Materials Cost incurred on the Contract (net of Closing | ₹ $36-₹ 6$ = ₹ 30 Lakhs |
| Add :Labour Costs incurred on the Contract (paid + payable) | = ₹ 24 + ₹ 4 = ₹ 28 Lakhs |
| Specific Contracts Costs | Given = ₹ 12 Lakhs |
| Subcontract costs (advances should not be considered) | Given = ₹ 10 Lakhs |
| Costs Incurred Till Date | ₹ 80 Lakhs |
| Add :Further Costs to be incurred | $=$ Given $=$ ₹ 60 Lakhs |
| Total Contract Costs | ₹140 Lakhs |
| Hence, Percentage of Completion base on Costs | $=80 \div 140=57.14 \%$ |
| = Costs Incurred Till Date $\div$ Estimated Total Contract Costs |  |
| Contract Revenue to be recognised (as per Para 21) | = $57.14 \% \times$ ₹ $150=₹ 85.71$ Lakhs |
| Less: Contract Costs to be recognised (as per Para 21) | =as computed $=\underline{\text { 8 }} 80.00$ Lakhs |
| Therefore, Contract Profit | ₹ 5.71 Lakhs |

(b) Blue Sky Ltd. used certain resources of Blue Moon Ltd. In return Blue Moon Ltd. received ₹ 15 lakhs and ₹ 22.50 lakhs as interest and royalties, respectively from Blue Sky Ltd. during the year 2012-13. Discuss the situation as per AS 9.

## Answer:

As per AS 9 on Revenue Recognition, revenue arising from the use by others of enterprise resources yielding interest and royalties should only be recognised when no significant uncertainty as to its measurability or collectability exists. These revenues are recognised on following bases:

## Answer to PTP_Intermediate_Syllabus 2012_Dec2013_Set 1

Interest: On a time proportion basis taking into account the amount outstanding and the rate applicable.
Royalties: On an accrual basis in accordance with the terms of the relevant agreement.
Here the interest should be recognised in the year to which it pertains, not in the year in which it is received.
(c) A fire occurred in the office premises of lessee in the evening of 31.3.2012 destroying most of the books and records. From the documents saved, the following information is gathered:

Short-working recovered :
2009-10 ₹ 4,000 (towards short-workings which arose in 2006-07)
2010-11 ₹ 8,000 (including ₹ 1,000 for short-working 2007-08)
2011-12 ₹ 2,000
Short-working lapsed :
2008-09 ₹ 3,000
2009-10 ₹ 3,600
2011-12 ₹ 2,000
A sum of ₹ 50,000 was paid to the landlord in 2008-09. The agreement of Royalty contains a clause of Minimum Rent payable for fixed amount and recoupment of short-workings within 3 years following the year in which Short-workings arise.

Information as regards payments to landlord subsequent to the year 2008-09 is not readily available.

Analysis of Royalty Payable:

|  |  | ₹ | ₹ |
| :--- | :--- | :---: | :---: |
| Royalty in 2008-09 | Minimum Rent - Shortworking | $50,000-11,000$ | 39,000 |
| Royalty in 2009-10 | Minimum Rent + Recoupment | $50,000+4,000$ | 54,000 |

## Answer to PTP_Intermediate_Syllabus 2012_Dec2013_Set 1

| Royalty in 2010-11 | Minimum Rent + Recoupment | $50,000+8,000$ | 58,000 |
| :--- | :--- | :--- | ---: |
| Royalty in 2011-12 | Minimum Rent + Recoupment | $50,000+2,000$ | 52,000 |

## Explanation of the above mentioned Analysis:

(i) 2008-09 ₹50,000 was paid but there was no recoupment. $\therefore$ ₹ 50,000 was the payment for Minimum Rent. This has been posted in the minimum rent column, every year.
(ii) In 2011-12 Shortworking recouped + Shortworking lapsed $=₹ 2,000+₹ 2,000=₹ 4,000$. This has been posted as the amount carried forward in 2010-11. (A)
(iii) In 2010-11 ₹8,000 has been recouped. So, the closing balance of its preceding year 2009-10 was $=₹(4,000+8,000)=₹ 12,000$. (B)
(iv) In 2009-10 Shortworkings adjusted = amount recouped + amount lapsed $=₹(4,000+3,600)=₹ 7,600$. In its preceding year 2008-09, the closing balance was $₹(12,000+7,600)=₹ 19,600$. (C)
(v) No Shortworking occurred in 2009-10, 2010-11,2011-12. AAll Shortworkings occurred in 2008-09 or before.
(vi) Shortworking can be recovered within next 3 years.
$\therefore$ Total Shortworking adjusted in 2011-12 ₹4,000 must be related to 2008-09.
Again out of ₹8,000 recouped in 2010-11. ₹1,000 is related to 2007-08.
$\therefore$ Balance ₹ 7,000 was related to 2008-09.
$\therefore$ Total Shortworking of 2008-09 $=₹ 4,000+₹ 7,000=₹ 11,000$.
(vii) Opening Balance of Short working in 2007-08 = Closing balance + Amount recouped + Amount Lapsed - Amount of Shortworking occurred i.e.₹ $(19,600+3,000-11,000)=₹ 11,600$

(b) Write a note on internally Generated Computer Software.

## Answer:

Internally generated computer software for internal use is developed or modified internally by the enterprise solely to meet the needs of the enterprise and at no stage it is planned to sell it. The stages of development of internally generated software may be categorized into the following two phases:
i. Preliminary project stage. i.e., the research phase.
ii. Development stage.

## Preliminary project stage. i.e., the research phase.

At the preliminary project stage the internally generated software should not be recognized as an asset. Expenditure incurred in the preliminary project stage should be recognized as an expense when it is incurred. The reason for such a treatment is that at this stage of the software project an enterprise cannot demonstrate that an asset exists from which future economic benefits are probable.

## Development stage

Internally generated software arising at the development stage should be recognized as an asset if, and only if, an enterprise can find out all of the following:
