FCI CIRCULAR NO. 4/2011 dated 09.08.2011

No.IA&PV/HQ/MOD/PV/Coverage/2011-12

Dated: 09.08.2011

CIRCULAR No.4/2011

Sub: Modification in the coverage of P.V.undertaken by Internal Audit Division.

1. Reference is invited to Headquarters letter no.Stk/37/1/(31)/APV/2011 dated 14.03.2011 wherein detailed instructions for annual physical verification as on 31.3.2011 were circulated. Similar instructions have been issued in the past, for conducting P.V. at end of the year by the Field Offices.
2. As per the existing procedure the IA&PV Division is to conduct Physical Verification of depots as detailed below:

a) Depots having capacity of 10000 MT and above	At least once a year
b) Depots with lesser capacities	At least once in two years

3. The PV undertaken by the Internal Audit Division is in addition to the PV at the end of the year conducted by the Field Offices through peripheral count of bags and weighment of stocks stored in certain selected depots following the method recommended by the Indian Statistical Institute (ISI). In addition to Annual PV, Quarterly PV are also being conducted by the Field Offices through peripheral count only.
4. The PV done by the Internal Audit Division is an additional super check and surprise in nature.
5. The existing coverage for PV, prescribed in the Internal Audit Manual and cited as above, has not been possible in the recent past due to paucity of manpower in the Internal Audit Division leading to huge arrear in the coverage of PV. The issue was deliberated by the Board of Directors in its 337th Board Meeting held on 21st July, 2011. The Board after detailed discussions observed that the IA&PV Division should undertake surprise checks on random basis of at least one depot in a Region in every month.
6. The selection of depot would be made by the Zonal Head of the IA&PV Division by following ISI Method. The selection of the shed and chamber, however, would be made by the PV Team.
7. The random PV should consist of weighment of one to two stacks selected on random basis by the PV Team. Such PV should also include weighment of all the baby stacks stored in the selected chamber of the selected shed. Besides weighment, as stated above, peripheral counting of bags on 100% basis of the entire stock stored in the Depot is to be made by the PV team.
8. In case of significant variations noticed, in the weightof stack(s) weighed from the book weight, the P.V. need to be extended to the whole shed& then to the whole of depot, as the necessity may arise.
9. The declaration statements of the balances of commodities and other articles as prescribed at para 10.4 of the Internal Audit Manual need to be obtained and the points indicated at para 10.6 of the Manual need to be looked into, while conducting PV by the PV team and reported accordingly.

10. The P.V. Team would satisfy itself that the commodity wise book weight as indicated in the declaration statement submitted by the Depot In charge also tallies with the balance reflected in the IRRS and report, in case variation is noticed.
- 11 Any cutting or overwriting in the Depot Stock Registers (stack, shed and Master StockLedger) as long as they are maintained manually, are to be enquired into and reported by the P.V. Team.
12. As the Internal Audit Division in many of the Regions/Zones does not have adequate manpower to undertake PV as indicated above, the GM (Regions) and ED(Zones) may take adequate care to constitute 2-3 teams consisting of two Managers and one Assistant at the Regional/Zonal level by inducting officers from depot, QC and General cadre, who would be in a position to undertake PV at short notice.
