| Benefits payments to Retirees | $2,00,000$ |
| Employer contribution to plan assets | $3,80,000$ |

(b) Calculation of Annual Depreciation under Straight Line Method:

|  | Abnormal Loss (₹ 2,500 + 20\%) | $(3,000)$ |
| D | Closing stock at Branch in hand | 21,000 |
| E | Closing stock in transit (₹ $1,68,000-₹ 1,38,000)$ | 30,000 |
| F | Total Branch stock (at invoice price) | 51,000 |

(d) Minimum rent per annum Royalty based on Sales

$$
\begin{array}{ll}
=₹ 2,00,000 \div 5 & \text { = ₹ } 40,000 \\

\end{array}
$$

Amount of Royalty payable is ₹ 40,000
(Since minimum rent is more than royalty on the basis of sales).

(c) Write a short note on 'The Minutes of Usage (MOU)'.

Answer:
5. (a) As per Para 4.1 of AS-9 "Revenue Recognition", revenue is the gross inflow of cash, receivables or other consideration arising in the course of the ordinary activities of an enterprise from the sale of goods, from the rendering of service, and from the use by others of enterprise resources yielding interest, royalties and dividends.
In the given case, Milton Ltd. should record the sales at gross value of $₹ 1,00,000$. Discount of $₹ 16,000$ in price and goods returned worth ₹ 14,000 are to be adjusted by suitable provisions. Milton Ltd. might have sent the credit note of ₹ 30,000 to Narmada Ltd to account for these adjustments.
The contention of the accountant of Milton Ltd. to book the sales for ₹7,000 is not correct.

(c) "Minutes of Usage:

The Minutes of Usage is the total duration of minutes for which a customer uses a telecommunication network during a given month. In the rascent days of mobile telecommunication in India, airtime rates were very high and a customer had to pay for incoming call also. During those days, the MOU ranged from 110 to 150 minutes per month, as customers were wary of making calls.

However, with falling rates, the MOU has steadily reduced. As on September 2005, the blended MOU was in the range of 367 minutes signifying a multi-fold increase in network utilization.

The MOU is also analysed between prepaid and postpaid services and further drilled down between incoming and outgoing. In the current billing system, a customer does not pay for any incoming calls. However, incoming calls bring in revenue for a telecom operator in the form of IUC charges (Interconnection Usage Charges) and paid by other service providers for terminating calls.
