# Paper-8: COST ACCOUNTING AND FINANCIAL MANAGEMENT 

Time Allowed: 3 Hours
Full Marks: 100

> The figures in the margin on the right side indic ate full marks.
> All sections are compulsory. Each section contains instructions regarding the number of questions to be answered within the section.
> All working notes must form part of the answers.
> Wherever necessary, candidates may make appropriate assumptions and clearly state them.
> No present value factortable or otherstatistic al table will be
> provided in addition to this question paper.

Section-A
Question 1 is compulsory. Answer all questions under each sub-division.
I. (I) Answer the following questions. Each question canies two marks. $2 \times 5=10$
(i) $\mathbf{1 0 0 0 0}$ units of material ' $X$ ' are consumed per year having per unit cost of Rs. 20. Cost of processing an order is Rs. 50 while annual interest rate is $5 \%$. If annual canying cost per unit of material ' $X$ ' is $15 \%$ (other than interest), Calculate the EOQ and number of orders per year.
(ii) Following information is fumished by the Dhoora Ltd:

Production and Sales are 50000 units and 42000 units respectively. Royalty paid on units produced @ Rs. 5 per unit and @ Rs. 7.50 per unit sold. Hire charges of equipment used for production on Rs. 1,80,000 and Design charges 48,000. Compute the direct expenses ac cording to CAS-10.
(iii) A work measurement study was caried out in a firm for $\mathbf{1 0}$ hours. The information generated was: Units produced 350; Idle time 15\%; Performance rating 120\%; and Relaxation Allowance $\mathbf{1 0 \%}$ of standard time. What is the standard time for each unit produced?
(iv) Axis Ltd. follows Walter's view of dividend policy. Its eamings per share isRs. 40 and face value of equity share is Rs. 100. It has a rate of retum of $\mathbf{2 0 \%}$ and capitalization rate is $8 \%$. What should be the market price per share if payout ratio is zero?

## Suggested Answer_Syl12_Dec 2017_Paper 8

(v) If current ratio is 2.4 : 1 and net working capital is Rs. 42,000 , find out the value of curent assets and curent liabilities.
(II) State whether the following statements are True or False (White only the question Roman numeral and whether True or False).
$1 \times 5=5$
(i) The sum of direct material, direct wages, direct expenses and manufacturing overheads is known as conversion cost
(ii) If the Profitability Index is more than one, the project should be accepted otherwise rejected.
(iii) The pemissible bank bonowings are calculated under Method- I = 0.75 (Curent Assets) CurentLiabilities.
(iv) CAS-13 is related to "Pollution Control Cost'.
(v) Under Halsey - Weir Plan, bonus equals to $33 \frac{1}{3} \%$ of wages of the time saved.
(III) Fill in the blanks (Legibly write only the Roman numeral and the Content filling the blank):
$1 \times 5=5$
(i) Maximum Level = ( $\qquad$ +Re-order Quantity) - (Minimum Consumption Rate $\times$ Minimum Re-order Period).
(ii) Generally cost of retained eamings is equal to / same as cost of $\qquad$ .
(iii) According to AS-3 (Revised), interest received on investment is an element of cash flow from $\qquad$ activities.
(iv) CAS-8 deals with the princ iples and methods of determining the $\qquad$ .
(v) The ratio of \% change in one variable to the \% change in some other variable is defined as $\qquad$ in the context of capital structure and finance.
(IV) Match the following (You may opt to wite the Roman numeral and the matched alphabet instead of copying the contents into the answerbook):
$1 \times 5=5$

|  | Column A |  | Column B |
| :--- | :--- | :--- | :--- |
| (i) | Uniform Costing | (A) | Technique of Costing |
| (ii) | CAS-9 | (B) | Letterof Credit |
| (iii) | Supplementary Rate | (C) | Valuation of shares |
| (iv) | Capital Assets Pricing Model | (D) | Over/ Under Absorption of overheads |
| (v) | Working Capital Finance | (E) | Packing Material Cost |
|  |  | (F) | System of Costing |
|  |  | (G) | Market Price Per Share |

Answer: 1
(i) $\mathrm{EOQ}=\sqrt{\frac{2 A O}{C}}$

Where, $A=$ Annual Demand (10,000 units)

$$
\begin{aligned}
& \text { O }=\text { Ordering Cost (Rs. 50) } \\
& \mathrm{C}=\text { Camying Cost (Rs. } 20 \times 20 \%=\text { Rs. } 4) \\
&=\sqrt{\frac{(2 \times 10,000 \times \text { Rs. } 50}{R s .4}}=\mathbf{5 0 0} \text { units }
\end{aligned}
$$

No. of Orders =Annual Consumption/ EOQ $=10,000 / 500=\mathbf{2 0}$ Orders

## Suggested Answer_Syl12_Dec 2017_Paper 8

(ii) Computation of Direct Expenses (as per CAS 10):

|  | Rs. |
| :--- | ---: |
| Royalty on production: 50,000 units @ Rs. 5 per unit | $2,50,000$ |
| Royalty on Sales: 42,000 units @ Rs. 7.50 per unit | $3,15,000$ |
| Hire Charges | $1,80,000$ |
| Design Charges | $\underline{48,000}$ |
| Direct Expenses | $\underline{\underline{7,93,000}}$ |

(iii) Calculation of Standard Time for each unit

|  | Minutes |
| :--- | :---: |
| Total Time $=10 \times 60$ | 600 |
| Less: Idle Time @ 15\% | $\underline{90}$ |
| Actual Time | 510 |
| Normal Time $=510 \times 120 \%$ | 612 |
| Add: Rela xation Allowance ( $10 \%$ or 1/10 on Sta ndard Time $=$ <br> 1/9 on Normal Time | $\underline{68}$ |
| Standard Time for the job | $\underline{680}$ |
| Therefore, Standard Time for each unit 680/ 350 | $\mathbf{1 . 9 4 3}$ |

OR
Altemative Presentation:

|  | Minutes |
| :---: | :---: |
| Time $=10 \times 60$ | 10.000 |
| Less: Idle Time @ 15\% | 1.500 |
| Actual Time | 8.500 |
| Normal Itime $=8.500 \times 120 \%$ | 10.000 |
| Add: Relaxation Allowance ( $10 \%$ or $1 / 10$ on Sta ndard Time $=$ 1/9 on Normal Time | $\underline{11.333}$ |
| Standard Time for the job (11.333 $\times 60$ ) | 680 |
| Therefore, Standard Time for each unit 680/350 | 1.943 |

(iv) Walter's Model:
$P=\frac{D}{\mathrm{Ke}}+\frac{\mathrm{r}(\mathrm{E}-\mathrm{D}) / \mathrm{Ke}}{\mathrm{Ke}}$, Where
P = Market Price perShare,
D = Dividend perShare (Re. 0)
$\mathrm{E}=$ EamingsperShare (Rs. 40)
R = Intemal Rate of Retum (20\%)
$\mathrm{K}_{\mathrm{e}}=$ Cost of Capital (8\%)
$\therefore P=[(0 / 0.08)+[\{0.20(40-0) / 0.08\}] / 0.08$
$=0+(8 / 0.08) / 0.08$
$=0+1,250=$ Rs. 1,250
(v) Suppose Current Lia bilities are $x$, then Current Assets will be 2.4x.

Current Assets - Current Liabilities $=$ Working Capital
$2.4 x-x=$ Rs. 42,000 or $1.4 x=$ Rs. $42,000 .: x=$ Rs. 30,000
So, Current Liabilities =Rs. 30,000
And Current Assets $=$ Rs. 30,000 $\times 2.4=$ Rs. 72,000

Section B
Answerany three questions from question numbers 2, 3, 4 and 5.
Each question camies $\mathbf{1 5}$ marks.
2. (a) The following are the details of receipts and issues of a material of stores in Pooja Ltd. for the month of October, 2017:

| Date of Receipt <br> October, 2017 | Units | Rate per unit (Rs.) | Date of issue <br> October, 2017 | Units |
| :---: | :---: | :---: | :---: | :---: |
| 4 | 1800 | 52 | 3 | 1900 |
| 8 | 2500 | 53 | 11 | 2100 |
| 16 | 1600 | 53.50 | 17 | 1700 |
| 19 | 1000 | 54 | 21 | 1600 |
| 22 | 900 | 55 | 24 | 1300 |
| 26 | 2000 | 56 | 28 | 1500 |

There was 2500 units in stock at 01.10 .2017 which was valued at Rs. 51 per unit Issues are to be priced on the basis weighted average method. The stock verifier of the company reported a shortage of $\mathbf{7 0}$ units on 15.10.2017 and $\mathbf{8 0}$ units on 31.10.2017. The shortage is treated as inflating the price of remaining material on ac count of shortage.
You are required to prepare a Stores Ledger Account
(b) What are the basic rules for classific ation of costs and basis of classification as per CAS 1?

## Suggested Answer_Syl12_Dec 2017_Paper 8

## Answer: 2

(a) Store ledger Account

For the month ending 31st Oct,2017
(Weighted average Method)

| Date | Receipts |  |  | Issues |  |  | Balance |  |  |
| :--- | :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: |
| 2017 | Units | Rate <br> (Rs.) | Amount <br> (Rs.) | Units | Rate <br> (Rs.) | Amount <br> (Rs.) | Units | Rate <br> (Rs.) | Rate forfurther issue <br> (Rs.) |
| Oct. 1 | - | - | - | - | - | - | 2500 | 127500 | 51 |
| Oct. 3 | - | - | - | 1900 | 51 | 96900 | 600 | 30600 | 51 |
| Oct. 4 | 1800 | 52 | 93600 | - | - | - | 2400 | 124200 | $124200 / 2400=51.75$ |
| Oct. 8 | 2500 | 53 | 132500 | - | - | - | 4900 | 256700 | $256700 / 4900=52.39$ |
| Oct. 11 | - | - | - | 2100 | 52.39 | 110019 | 2800 | 146681 | 52.39 |

| Oct. 31 | - | - | - | 80 | - | - | 2050 | 117500 | $117500 / 2050=57.32$ |
|  |  |  |  | Short. |  |  |  |  |  |

(b) Basic Rulesfor Classification of Costs
(i) Classific ation of cost is the a rangement of items of costs in logical groups having regard to their nature (subjective classification) or purpose (objective classification).
(ii) Items should be classified by one characteristic for a specific purpose without ambiguity.
(iii) Scheme of classific ation should be such that every item of cost can be classified.

## Basis of classification

(a) Nature of expense
(b) Relation to object - traceability
(c) Functions/ activities
(d) Behaviour - Fixed, Semi-va riable or Va riable
(e) Management decision making
(f) Production Process
(g) Time period
3. (a) PARASH LID. Manufactures $\mathbf{5 , 0 0 0}$ units of a product per month. The cost of placing an order is Rs.100. The purchase price of the raw material is Rs. 10 per kg . The re-order period is 4 to 8 weeks. The consumption of raw materials varies from 100 kg to $450 \mathbf{~ k g}$ per week, the average consumption being 275 kg . per week. The canying cost of inventory is 20\% per annum. (Assume 52 weeks to a year.)
You are required to calculate:
(i) Re-order quantity

## Suggested Answer_Syl12_Dec 2017_Paper 8

(ii) Re-order level
(iii) Maximum level
(iv) Minimum level
(v) Average stock level
$(2+2+2+2+1)=9$
(b) The standard hours of J ob $\mathbf{X}$ is $\mathbf{1 0 0}$ hours. The job has been completed by Amar in $\mathbf{6 0}$ hours, Abir in $\mathbf{7 0}$ hours and Binu in 95 hours. The bonus system applic able to the job is as follows:

| Percentage of time saved to time allowed | Bonus |
| :--- | :--- |
| Saving upto 10\% | 10\% of time saved |
| From $11 \%$ to $\mathbf{2 0} \%$ | $\mathbf{1 5 \%}$ of time saved |
| From $\mathbf{2 1 \%}$ to $\mathbf{4 0 \%}$ | $\mathbf{2 0 \%}$ of time saved |
| From 41\% to 100\% | $\mathbf{2 5 \%}$ of time saved |

The rate of pay is Re. 1 perhour
Required:Calculate the total eamings of each worker and also the rate of eamings per hour.
$2+2+2=6$
Answer: 3
(a)
(i) Re-order Quantity (ROQ):

EOQ (Economic OrderQuantity) $=\mathrm{EOQ}=\sqrt{\frac{2 A O}{C}}$,
Where, $A=A n n u a l ~ c o n s u m p t i o n ~ o f ~ r a w ~ m a t e r i a l ~=(275 ~ k g s ~ x 52 ~ w e e k s ~) ~=~ 14,300 ~ k g s . ~$.
$\mathrm{O}=$ Cost of placing an order $=$ Rs. 100
$\mathrm{C}=$ Camying cost perkg. perannum $\quad=\frac{20}{100} \times$ Rs. $10=$ Rs. 2

$$
=\sqrt{\frac{2 \times 14,300 \mathrm{kgs} . \times \mathrm{Rs} .100}{\text { Rs. } 2}}=1,196 \mathrm{kgs} .
$$

(ii) Re-order level (ROL) =Maximum usage $\times$ Maximum re-order period

$$
=450 \mathrm{kgs} \times 8 \text { weeks }=3,600 \mathrm{kgs}
$$

(iii) Maximum level=ROL + ROQ - (Minimum usage $\times$ Minimum re-order period)

$$
\text { = 3,600 kgs. }+1,196 \mathrm{kgs} . ~-(100 \mathrm{Kgs} \times 4 \text { weeks })=4,396 \mathrm{kgs} .
$$

(iv) Minimum Level=ROL- (Average Rate of usage $x$ Average re-order period)

$$
=3,600 \mathrm{kgs.}-(275 \mathrm{kgs} . \times 6 \text { weeks })=1,950 \mathrm{kgs} .
$$

(v) Average stock level $\quad=1 / 2($ Maximum level + Minimum Level $)$

$$
=1 / 2(4,396 \mathrm{kgs.}+1,950 \mathrm{Kgs.})=3,173 \mathrm{kgs.}
$$

OR
$=\left(\right.$ Minimum Level $+\frac{1}{2} \times$ ROQ $)$
$=\left(1,950\right.$ Kgs $\left.+\frac{1}{2} \times 1,196 \mathrm{kgs}\right) \quad=2,548 \mathrm{kgs}$.

## Suggested Answer_Syl12_Dec 2017_Paper 8

(b) Statement showing Total Ea mings and rate of Eaming per hour

| Particulars | Amar | Abir | Binu |
| :--- | :---: | :---: | :---: |
| A Standard hours of J ob (SH) | 100 hours | 100 hours | 100 hours |
| B Actual Time taken on the Jobs (AH) | 60 hours | 70 hours | 95 hours |
| C. Time Saved [A - B] | 40 hours | 30 hours | 5 hours |
| D Percentage of time sa ved to time <br> allowed [C $\times 100 / \mathrm{A}]$ | $40 \%$ | $30 \%$ | $5 \%$ |
| E Bonus hours (Referto Working Note) | 6.5 hours | 4.5 hours | 0.5 hours |
| F Total hours to be paid [B +E] | 66.5 hours | 74.5 hours | 95.5 hours |
| G Total eaming @ ₹1 Per Hour | Rs.66.5 | Rs. 74.5 | Rs. 95.5 |
| H. Rate of eaming per hour [Total <br> Ea ming/AH] | Rs. 1.1083 | Rs. 1.0642 | Rs. 1.0053 |

Working Note: Calculation of Bonus hours as percentage of time saved:
Amar : $(10$ hours $\times 10 \%)+(10$ hours $\times 15 \%)+(20$ hours $\times 20 \%)=6.5$ hours
Abir : $\quad(10$ hours $\times 10 \%)+(10$ hours $\times 15 \%)+(10$ hours $\times 20 \%)=4.5$
Binu: ( 5 hours $\times 10 \%$ ) $=0.5$ hours
OR
Altemative Solution:
Statement showing Total Eamings and Rate of Eaming per hour:

|  | Partic ulars | Amar | Abir | Binu |
| :---: | :--- | :---: | :---: | :---: |
| A | Standard hour of J ob (SH) | 100 hours | 100 Hours | 100 Hours |
| B | Actual Time taken on Jobs (AH) | 60 hours | 70 hours | 95 hours |
| C | Time Saved [A-B] | 40 hours | 30 hours | 5 hours |
| D | Percentage of time saved to time a llowed <br> $[C ~ \times ~ 100 / A] ~$ | $40 \%$ | $30 \%$ | $5 \%$ |
| E | Bonus Hours (Refer to Working Note) | 8.0 hours | 6.0 hours | 0.5 hours |
| F | Total hours to be paid [B+E] | 68.0 hours | 76.0 hours | 95.5 hours |
| G | Total Eaming @ Re. 1 per Hour | Rs. 68.00 | Rs. 76.00 | Rs. 95.50 |
| H | Rate of eaming per hour [Total Ea ming / AH] <br> i.e. G/B | Rs. 1.1333 | Rs. 1.0857 | Rs. 1.0053 |

## Working Note: Calculation of Bonus hours as per percentage of time saved: <br> (If slab wise not considered)

Amar: $20 \%$ of 40 hours $=8.0$ hours
Abir: $20 \%$ of 30 hours $=6.0$ hours
Binu:(5 hours $\times 10 \%$ ) $=0.5$ Hour
4. (a) Enumerate the disadvantages of a centralized stores system.
(b) List three items to be included and two items to be excluded under the CAS-10 for Direct Expenses.
(c) Gamma (India) Ltd. has a unit which manufactures jute bags and export in the European market It submits the following items of cost and request you to classify these according to function and under the appropriate element of cost
(i) Productcatalogue
(ii) Nuts and Bolts
(iii) Commission on sales
(iv) Printing and stationary
(v) Secondary packing material used for exportdelivery.

## Suggested Answer_Syl12_Dec 2017_Paper 8

## Answer: 4

(a) Disadva nta ges of Centra lized Stores System:
(i) The transportation costs of the materials may inc rease because the movements of the stores may be fora greaterdistance since the storing is centralized.
(ii) If the userdepartments are faraway from the stores there may be delay in receipt of the stores by those departments.
(iii) Break down of inter-departmental transport system may hold up the entire process, and simila rly labor problem in the centralized stores may bring the entire concem to sta nd still.
(iv) There is greater chance of losses through fire, burglary or some other unhappy incidents.
(v) It may not be safe to have some hazardous elements bunched together in the centra lized stores.
(b) Item to be included/excluded underCAS-10 fordirect expenses:

Itemsto be included:
(i) Costs which are directly traceable/ identifiable with the cost object.
(ii) Expensesincurred for the use of bought in resources.
(iii) Price variance if such expenses are accounted for at standard cost.

Itemsto be excluded: (Write Any Two)
(i) If not traceable/identifiable should be considered asoverheads.
(ii) Finance cost is not a direct expense.
(iii) Imputed cost
(iv) Rec overies, credits, subsidy, grant, incentive or any other which reduces the cost.
(v) Penalty, da mages paid to statutory a uthorities.
(c)

| Item of Cost | Functional Classification | Eement of Cost |  |
| :---: | :--- | :---: | :---: |
| (i) | Product catalogue | Selling Overhead | Materia I Cost |
| (ii) | Nuts and Bolts | Production Overhead | Materia I Cost |
| (iii) | Commission on Sales | Selling Overhead | Labour Cost |
| (iv) | Printing and Stationary | Administration Overhead | Materia I Cost |
| (v) | Secondary Packing Material used <br> forexport delivery | Distribution Overhead | Materia I Cost |

5. (a) There are three production departments and two senvice departments in a company. The overheads of service departments are charged on percentage basis as under:

| Department | Production Departments |  |  | Service Departments |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | P | Q |
| Total Overhead (Rs.) | $\mathbf{9 , 0 0 0}$ | $\mathbf{6 , 0 0 0}$ | $\mathbf{3 , 0 0 0}$ | $\mathbf{7 0 2}$ | $\mathbf{9 0 0}$ |
| Services provided by P | $\mathbf{2 0} \%$ | $\mathbf{4 0} \%$ | $\mathbf{3 0} \%$ | - | $\mathbf{1 0} \%$ |
| Services Provided by Q | $\mathbf{4 0} \%$ | $\mathbf{2 0} \%$ | $\mathbf{2 0} \%$ | $\mathbf{2 0} \%$ | - |

Required: Apportion the overhead of service departments to the production departments using Simultaneous Equation method.

## Suggested Answer_Syl12_Dec 2017_Paper 8

(b) Your company is an export-oriented organization manufacturing intemal communication equipment of a standard size. The company is to send tender price to foreign buyers of your product. As the Cost Accountant, you are required to help the management in the matter of submission and preparation of the tender. Prepare a Cost Estimate based on the following figures relating to year 2017:

Output 20,000 units

| Expenses Incured | Rs. |  | Rs. |
| :--- | ---: | :--- | ---: |
| Local Raw Material Consumed | $\mathbf{1 0 , 0 0 , 0 0 0}$ | Excise Duty | $\mathbf{2 , 0 0 , 0 0 0}$ |
| lmports of Raw Material (Actual <br> Consumption) | $\mathbf{1 , 0 0 , 0 0 0}$ | Administrative Office <br> Expenses | $\mathbf{2 , 0 0 , 0 0 0}$ |
| Direct Labour in Works | $\mathbf{1 0 , 0 0 , 0 0 0}$ | Salary of the Managing <br> Director | $\mathbf{6 0 , 0 0 0}$ |
| Indirect Labour in Works the joint | $\mathbf{4 0 , 0 0 0}$ |  |  |
| Storage of Raw Material and <br> Spares | $\mathbf{2 , 0 0 , 0 0 0}$ | Salary of <br> Managing Director | $\mathbf{2 0 , 0 0 0}$ |
| Fees of Directors | $\mathbf{1 , 0 0 , 0 0 0}$ |  |  |
| Tuel | $\mathbf{1 , 5 0 , 0 0 0}$ | Expenses on Advertising | $\mathbf{1 , 8 0 , 0 0 0}$ |
| Depreciation on Plant | $\mathbf{2 0 , 0 0 0}$ | Selling Expenses | $\mathbf{1 , 2 0 , 0 0 0}$ |
| Salaries of Works Personnel | $\mathbf{1 , 0 0 , 0 0 0}$ | Peles Depot Expenses | $\mathbf{1 , 2 0 , 0 0 0}$ |

(i) Local raw material now cost 10\% more
(ii) A profit margin of $\mathbf{2 0 \%}$ on sales is kept
(iii) The Govemment Grants subsidy of Rs. 100 Per unit on export

## Answer: 5

(a)

Let 'x' be the total overhead of Service Department $P$ and ' $y$ ' be the total overhead of Service Department Q. Then we have:
$x=702+0.2 y$
$y=900+0.1 x$
To solve the equations, rea range it and multiply by 10 to eliminate decimals, we get:
$10 x-2 y=7,020$
$-x+10 y=9,000$

Multiplying equation (ii) by 10 and equation (i) by 1 ; and adding it in equation (i), we get:
$10 x-2 y=7,020$
$-10 x+100 y=90,000$
or $98 y=97,020$ or $y=990$
By substituting value of $y$ in equation (i), we get:
$10 x-2(990)=7,020$ or $10 x=(2 \times 990)+7,020$ or $x=900$

## Suggested Answer_Syl12_Dec 2017_Paper 8

Apportionment of Overhead by Simultaneous Equation Method

| Departments | A | B | C | P | Q |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Rs. | Rs. | Rs. | Rs. | Rs. |
| Overhead (Given) | 9,000 | 6,000 | 3,000 | 702 | 900 |
| Overhead of P | 180 | 360 | 270 | $(-) 900$ | 90 |

## Suggested Answer_Syl12_Dec 2017_Paper 8

(b) The details of income and financial position of Morarka Ltd. are as follows:

| Particulars | Amount Rs. |
| :---: | :---: |
| Sales (Net) | 1,50,000 |
| Less: Cost of Sales | 1,00,000 |
| Less: Operating Expenses (including Rs.6,000 p.a. for | 50,000 |
|  |  |
| Depreciation) | 40,000 |
| Net Profit |  |
| Cash in hand | 10,000 |
| Cash in hand |  |
| Debtors | 12,000 |
| Stock at cost | 60,000 |
| Fixed Assets (net) | 24,000 |
| Total Assets | 1,04,000 |
| Liabilities |  |
| Creditors |  |
| Debentures |  |
| Share Capital | 40,000 |
| Surplus | 1,00,000 |
| Total Liabilities | 22,000 |
| Totai Labiiries | 2,00,000 |

The Company makes all sales on credit
Compute the following ratios:
(i) Current ratio
(ii) Liquidity ratio
(iii) Inventory Tumover
(iv) Average Collection period
(v) Operating ratio

Answer: 6 (a)
Cash Fow Statement
Forthe year ending 31st March, 2017

| (A) Cash Fows from Operating Activities: | Rs. | Rs. |
| :--- | ---: | ---: |
| Net Profit after appropriation (Rs. 10,000 - Rs. 7,000) |  | 3,000 |
| Adjustment for: |  |  |
| Depreciation | 8,000 |  |
| Provision for Tax | 5,000 |  |
| Dividend | 1,000 | 14,000 |
| Operating Profit before working capital changes |  | 17,000 |
| Adjustment for: | $(15,000)$ |  |
| Increase in Debtors | $(25,000)$ |  |
| Inc rease in Inventory | $(2,000)$ |  |
| Inc rease in Prepaid Expenses | 23,000 | $(19,000)$ |
| Increase in Creditors |  | $(2,000)$ |
| Cash Generated from Operations |  |  |

## Suggested Answer_Syl12_Dec 2017_Paper 8

| Taxes Paid |  | $(3,000)$ |
| :--- | ---: | ---: |
| Net Cash used in Operating Activities (A) |  | $(5,000)$ |
| (B) Cash Fows from Investing Activities: |  |  |
| Purchase of Fixed Assets | $(50,000)$ |  |
| Interest/Dividend Received | NIL |  |
| Net Cash used in Investing Activities: (B) |  | $(50,000)$ |
| (C) Cash Fows from Financing Activities: |  |  |
| Issue of Share Capital | 20,000 |  |
| Raising Sec ured Loans | 40,000 |  |
| Dividend Paid | $(1,000)$ |  |
| Net Cash Flow from Financing Activities (C) |  | 59,000 |
| Net Increase in Cash (A +B +C) |  | 4,000 |
| Cash and Cash Equivalent at the beginning of the year |  | 20,000 |
| Cash and Cash equivalents at the end of the year |  |  |

Note: the figures in brackets show cash outflows.

## Working Notes: Provision for Taxation Account

| Partic ulars | Amount in Rs. | Partic ulars | Amount in Rs. |
| :--- | ---: | :--- | ---: |
| To Cash (Payment of Tax) | 3,000 | By ba lance b/d | 1,000 |
| To Balance c/d | 3,000 | By P \& LA/c | 5,000 |
|  | 6,000 |  | 6,000 |

Plant \& Machinery Account

| Partic ulars | Amount in Rs. | Partic ulars | Amount in Rs. |
| :--- | ---: | :--- | ---: |
| To Balance b/d <br> To Bank (Purchase of Plant <br> being balancing fig.) | 50,000 | By Depreciation a/c <br> By Balance c/d | 8,000 |
|  | 50,000 |  |  |

## Answer: 6 (b)

(i) Current Ratio $=\frac{\text { Current Assets }}{\text { Current Liabilities }}=\frac{96,000}{38,000}=2.53: 1$ or 2.53
(ii) Liquidity ratio $=\frac{\text { Liquid Assets }}{\text { Current Liabilities }}=\frac{72,000}{38,000}=1.89: 1$ or 1.89
(iii) Inventory Tumover Ratio $=$ Averagelnventory $*=\frac{1,00,000}{24,000}=4.17$ Times
(iv) Average Collection Period $=\frac{\text { TotalReceivable }}{\text { Net Credit Sales }} \times$ No. of Days inthe year

$$
=\frac{60,000}{1,50,000} \times 365=146 \text { days }
$$

(v) Operating Ratio $=\frac{\text { Cost of Goods Sold }+ \text { Operating Expenses }}{\text { Net Sales }} \times 100$

$$
=\frac{1,00,000+40,000}{1,50,000} \times 100=\frac{1,40,000}{1,50,000} \times 100=93.33 \% \text { or } .9333
$$

[Note: Average Collection Period $=\frac{\text { Average Debtors }}{\text { Average Sales per day }}$ is the formula. Here, two years'
figures not given. Hence, Debtors treated as average Debtors.)
*Any assumption may be made.

## Suggested Answer_Syl12_Dec 2017_Paper 8

7. (a) The following information is available for SORIEX LTD.

| Installed capacity | 4,000 units |
| :--- | ---: |
| Actual production and sales | 75\% of the capacity |
| Selling price | Rs.30 per unit |
| Variable Cost | Rs. $\mathbf{1 5}$ per unit |
| Fixed Cost |  |
| Under situation I | Rs. $\mathbf{1 5 , 0 0 0}$ |
| Under situation II | Rs. 20,000 |
| Tax rate | $\mathbf{4 0 \%}$ |

Capital Structure:
Financial plan

|  | A |  |
| :--- | ---: | ---: |
| B |  |  |
|  | Rs. | Rs. |
| Equity | $\mathbf{1 0 , 0 0 0}$ | $\mathbf{1 5 , 0 0 0}$ |
| Debt (rate of interestat 20\%) | $\mathbf{1 0 , 0 0 0}$ | $\mathbf{5 , 0 0 0}$ |
|  | $\mathbf{2 0 , 0 0 0}$ | $\mathbf{2 0 , 0 0 0}$ |

Required: Calculate the degree of operating leverage (DOL), Degree of Financial Leverage (DF) and Degree of Combined Leverage (DCL) Undersituation I and situation II and Financial Plans A and B.
(b) Royal Industries Ltd. currently makes all sales on credit and offers no cash discount It is considering a 2 per cent discount for payment within 10 days (terms offered are ' $2 / 10$ net $30^{\prime}$ ). The firm's current average collection period is 30 days, sales are 10000 units, selling price is Rs. 100 per unit and variable cost per unit is Rs. 50; its existing total fixed costs are Rs. $\mathbf{2 , 0 0 , 0 0 0}$ which are likely to remain unchanged with production/sales volume of $\mathbf{1 2 0 0 0}$ units.

It is expected that the offer of cash discount will result in an increase in sales to 11,000 units and the average collection period will be $\mathbf{2 0}$ days as a result However, due to increased sales, increased working capital required will be for Rs.20,000 (without taking into account the effect of debtors).
The total sales on cash discount will be $50 \%$ and $20 \%$ is the required retum on investment
Required: Advise the Company on whether the proposed cash discount should be offered to its customers.
(Assume $\mathbf{3 6 0}$ days to a year.)
Answer: 7 (a)
The calculation of the degree of operating leverage, financial leverage, and combined leverage under Situations I and II and Financial Plans A and B is shown below:

|  | Situation I |  | Situation II |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Financial <br> Plan A | Financial <br> Plan B | Financial <br> Plan A | Fnancial <br> Plan B |
| A. Sales (3,000 $\times$ Rs. 30) | 90,000 | 90,000 | 90,000 | 90,000 |
| B. Variable costs | 45,000 | 45,000 | 45,000 | 45,000 |
| C. Contribution | 45,000 | 45,000 | 45,000 | 45,000 |
| D. Fixed costs | 15,000 | 15,000 | 20,000 | 20,000 |

## Suggested Answer_Syl12_Dec 2017_Paper 8

| E. Profit before interest and <br> tax | 30,000 | 30,000 | 25,000 | 25,000 |
| :--- | ---: | ---: | ---: | ---: |
| F. Interest | 2,000 | 1,000 | 2,000 | 1,000 |
| G. Profit before tax | 28,000 | 29,000 | 23,000 | 24,000 |
| H. DOL =Contribution/Ea ming <br> before Interest a nd Ta xes(EBIT) <br> (C $\div$ E) | 1.5 | 1.5 | 1.8 | 1.8 |
| I. DFL =EBIT/Ea ming after <br> Interest but before Taxes(EBT) <br> $(E \div G)$ | 1.07 | 1.03 | 1.09 | 1.04 |
| J. DCL =Contribution/EBT <br> $(H \times I)$ or (C $\div G)$ | 1.61 | 1.55 | 1.96 | 1.87 |

## Answer: 7 (b)

Inc remental a nalysis whether cash discount should be offered

| Partic ulars | Amount in Rs. |
| :--- | ---: |
| Inc remental sales revenue (1,000 units $\times$ Rs. 100) | $1,00,000$ |
| Less:Va riable Costs (1,000 units $\times$ Rs. 50$)$ | 50,000 |
| Inc remental contribution | 50,000 |
| Add $:$ Savings in cost due to dec rease in investment in debtors <br> (see working note 1) | 3,333 |
| Less:Cost of additional working capital required (Rs. 20,000 $\times 0.20)$ | $(4,000)$ |
| Less: Cash discount $(0.02 \times 11,000$ units $\times 0.5 \times$ Rs. 100$)$ | $(11,000)$ |
| Inc remental Profit | 38,333 |

Recommendation: It is advised that the firm should offer cash discount.

## Working Notes-

1. Savings due to decrease in collection period:

Present investment in debtors (without cash discount)
$=[(10,000 \times$ Rs. 50$)+$ Rs. $2,00,000] / 12(360$ days/30) $=$ Rs. 58,333.
Expected investment in debtors (with cash discount)
$=(11,000 \times$ Rs. 50$)+$ Rs. $2,00,000] / 18(360$ days/20) $=$ Rs. 41,667
Decrease in investment in debtors =Rs. 58,333 - Rs. $41,667=$ Rs. 16,666
Sa vings in interest cost (Rs 16,666 $\times 0.20$ ) $=$ Rs. 3,333.
8. (a) ABC Limited wishes to raise additional finance of Rs. 10 lakhs for meeting its investment plans. It has Rs. 2,10,000 in the fom of retained eamings available for investment purposes.
The following are the further details:

| (1) Debt/ equity Mix | 30\%/70\% |
| :--- | :---: |
| (2) Cost of debt uptoRs.1,80,000 | $\mathbf{1 0 \% \text { (Before tax) }}$ |
| Cost of debt beyond Rs. 1,80,000 | $16 \%$ (Before tax) |
| (3) Eamings per share | Rs. 4 |
| (4) Dividend payout | $50 \%$ ofeamings |
| (5) Expected growth rate in dividend | $10 \%$ |
| (6) Current market price | Rs.44 |
| (7) Tax rate | $35 \%$ |

## Suggested Answer_Syl12_Dec 2017_Paper 8

You are required:
(a) To determine the pattem for raising the additional finance.
(b) To determine the post-tax average cost of additional debt
(c) To determine the cost of retained eamings and cost of equity.
(d) Compute the overall weighted average after tax cost of additional finance.
(b) Amul Ltd . is considering two mutually exclusive proposals, $X$ and $Y$.

Proposal $X$ will require the initial cost of Rs. $1,40,000$ with no salvage value, and will also require an increase in the level of inventories and receivables of Rs. $\mathbf{6 0 , 0 0 0}$ over its life. The project will generate additional sales of Rs. $1,30,000$ and will require cash expenses of Rs. 40,000 in each of its 5 year life. It will be depreciated on straight line method and the same is accepted for tax purposes.

Proposal $Y$ will required an initial capital of Rs. $\mathbf{2 , 0 0 , 0 0 0}$ with no salvage value, and will be depreciated on straight line basis. The eamings before depreciation and taxes during its 5 year life are:

| Year 1 | Year2 | Year3 | Year 4 | Year5 |
| :---: | :---: | :---: | :---: | :--- |
| Rs. 70,000 | Rs.76,000 | Rs.80,000 | Rs.90,000 | Rs.92,000 |

The Company has to pay coporate income tax at the rate of 35 per cent, and is evaluating projects with 10 percent as the cost of capital.

Required:Which project is ac ceptable under the NPV method?
Table showing present values of Re. 1 disc ount rate -10\% are as follows:

|  | End of year |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{1}$ | $\mathbf{2}$ | 3 | 4 | 5 |
| PVIF (at 10\%) | 0.909 | 0.826 | 0.751 | 0.683 | 0.621 |
| PVIFA (at 10\%) |  |  |  | 3.170 | 3.791 |

7

## Answer: 8 (a)

(a) Pattem for raising the additional finance:

| Debts $30 \%$ of Rs. $10,00,000$ | Rs. 3,00,000 |
| :--- | ---: |
| Equity $70 \%$ of Rs. $10,00,000$ | Rs. $7,00,000$ |
| Total | Rs.10,00,000 |

Financ ing pattem with costs:

|  | Amount in Rs. | Cost |
| :--- | ---: | :---: |
| Debts | $1,80,000$ | $10 \%$ |
| Debts | $1,20,000$ | $16 \%$ |
| Retained Eamings | $2,10,000$ |  |
| Equity $(7,00,000-2,10,000)$ | $4,90,000$ |  |
|  | $10,00,000$ |  |

(b) Post-tax average cost of additional debt

Formula $=K_{d}(1-t)$, where
$K_{d}=1,80,000 @ 10 \%=18,000$ or $10 \% \times 0.65=(6.5 \times 1,80,000) / 3,00,000=3.90 \%$
$K_{d}=1,20,000 @ 16 \%=19,200$ or $16 \% \times 0.65=(10.4 \times 1,20,000) / 3,00,000=4.16 \%$ $\mathbf{3 , 0 0 , 0 0 0} 37,200 \quad \underline{8.06 \%}$

## Suggested Answer_Syl12_Dec 2017_Paper 8

OR
Cost $=[(18,000+19,200) / 3,00,000] \times 100=12.4 \%$
Post-tax average cost of debt $=12.4(1-0.35)=12.4 \times 0.65=8.06 \%$
(c) Cost of Reta ined Eamings a nd Cost of Equity
$K_{r}=K_{e}$
$K_{e}=\frac{D_{1}}{P_{0}}+g$
Here, $\mathrm{D}_{1}=$ Dividend to be paid at the end of year
and $P_{0}=$ Current market price per share
Dividend pay -out ratio $=50 \%$ of Rs. $4=$ Rs. 2.00 per Share. Growth rate is $10 \%$. Hence, at the end of the year, dividend will be $=$ Rs. $2+10 \%=$ Rs. 2.20 .
$K_{e}=\frac{2.20}{44}+0.10=0.05+0.10=0.15=15 \%$
(d) Weighted average after tax cost of additional finance

| Source of <br> Finance | Amount <br> in Rs. | Proportion <br> (Weight) | After tax <br> cost | Weighted <br> Cost | Average <br> Weighted Cost |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Debts | $3,00,000$ | $30 \%$ | $8.06 \%$ | $0.30 \times 8.06$ | 2.418 |
| Retained <br> Eamings | $2,10,000$ | $21 \%$ | $15.00 \%$ | $0.21 \times 15$ | 3.15 |
| Equity | $4,90,000$ | $49 \%$ | $15.00 \%$ | $0.49 \times 15$ | 7.35 |
| Total | $10,00,000$ | $100 \%$ |  |  | 12.918 |

Thus, weighted average cost is $12.918 \%$

## Answer: 8 (b)

Proposal X: cash outflow at $t=0$

|  |  |
| :--- | ---: |
| Cost of new project | Amount in Rs. |
| Working capital required for an increase in the level of inventories | $1,40,000$ |
| and receivables | 60,000 |
| Total | $2,00,000$ |

Cash inflow, years 1-4

| Sales | $1,30,000$ |
| :--- | ---: |
| Less: Cash Expenses | 40,000 |
| Eamings before taxes | 90,000 |
| Less: Deprec iation (Rs. $1,40,000 \div 5)$ | 28,000 |
| Taxable income | 62,000 |
| Less: Tax @ 35\% | 21,700 |
| Eamingsafter Taxes | 40,300 |
| Add : Depreciation | 28,000 |
| CFAT t $=(1-4)$ | 68,300 |
| $\mathrm{t}=5$ (Rs.68,300 + Rs.60,000, working capital release) | $1,28,300$ |

## Suggested Answer_Syl12_Dec 2017_Paper 8

Determination of NPV

| Years | CFAT | PV factor | Total PV : Rs. |
| :--- | :---: | :---: | ---: |
| $1-4$ | Rs. 68,300 | 3.170 | $2,16,511$ |
| 5 | Rs. $1,28,300$ | 0.621 | 79,674 |
| Total PV |  |  | $2,96,185$ |
| Less: Cash Outflows |  |  | $2,00,000$ |
| NPV |  |  | 96,185 |

Proposal Y: Determination of NPV (Rupees in thousands)
