# INTERMEDIATE EXAMINATION 

GROUP - II
(SYLLABUS 2016)

## SUGGESTED ANSWERS TO QUESTIONS

DECEMBER-2017
Paper-10: COSTMANAGEMENTACCOUNIING AND RNANCIALMANAGEMENT

Time Allowed : 3 Hours
Full Marks: 100

The figures in the margin on the right side indicate full marks.
All working must form part of your answer. Assumptions, if any must be clearly indicated.
Please (i) Write answer to all parts of a question together.
(ii) Open a new page for answerto a new questions.
(iii) Attempt the required number of questions only.

## Part-A

(Cost and Management Accounting)
Section-I
Answer the following questions.

1. (a) Choose the correct answer from the given four altematives: $1 \times 6=6$
(i) Which statement best describes the role of the management ac countant?
(A) Management accountants prepare the financial statements for an organization.
(B) Management acc ountants facilitate the decision-making process within an organization.
(C) Management accountants make the principal decisions within an organization.
(D) Management accountants are basic ally information collectors.
(ii) In a factory when production is inc reased within the relevant range then:
(A) variable costs will vary on a per unit basis.
(B) variable costs will vary in total.
(C) fixed costs will vary in total.
(D) fixed and variable cost stay the same in total.

## SUGGESTED ANSWERS TO QUESTIONS_SYL2016 DEC2017 <br> PAPER-10

(iii) The main objective of budgetary control is:
(A) to define the goal of the firm
(B) to coordinate different departments
(C) to plan to achieve its goals
(D) All of the above
(iv) Method of pricing, when two separate pricing methods are used to price transfer of products from one subunit to another, is called:
(A) dual pricing
(B) functional pricing
(C) congruent pric ing
(D) optimal pricing
(v) When are overhead variances recorded in a standard costing system?
(A) When the goods are transferred out of work-in-progress.
(B) When the factory overhead is applied to work-in-progress.
(C) When the cost of goods sold is recorded.
(D) When the direct labour is rec orded.
(vi) Which of the following factors does not affect Leaming Curve?
(A) Method of Production
(B) Labour Strike
(C) Shut Down
(D) Efficiency Rate
(b) Match the statement in Column I with the most appropriate statement in Column II:

| Column I |  |  | Column II |
| :--- | :--- | :---: | :--- |
| (i) | Market Based Price | (A) | Break-Even Analysis |
| (ii) | Dec ision Unit | (B) | Differential Cost |
| (iii) | Margin of Safety | (C) | Transfer Pric ing |
| (iv) | Difference between costs of two <br> altematives | (D) | Zero-Base Budgeting |

(c) State whether the following statements are True or False:
(i) The profit calculated under absorption costing and marginal costing is always equal.
(ii) A fiexible budget takes into acc ount only fixed costs.
(iii) At break-even point, margin of safety is nil.
(iv) An increase in production means an increase in overall productivity.

## SUGGESTED_ANSWERS TO QUESTIONS_SYL2016_DEC2017_PAPER-10

## Answer:

1. (a)
(i) - (B)
(ii) - (B)
(iii) - (B)
(iv) $-\quad$ (A)
(v) - (B)
(vi) - *
*Wrong question and no options are true. Student attempting this question has been given full 1 mark.
2. (b)
(i) - (C)
(ii) - (D)
(iii) $-(\mathrm{A})$
(iv) $-\quad(B)$
3. (c)
(i) False
(ii) False
(iii) True
(iv) False

## Section II

Answer any three questions from Question No. 2, 3, 4 and 5.
Each question carries $\mathbf{1 2}$ Marks.
2. (a) The Asian Industries specialize in the manufacture of small capacity motors. The Cost Structure of a motor is as under:

| Material | $₹ 50$ |
| :--- | :---: |
| Labour | $₹ 80$ |
| Variable overheads | 75\% of labour cost. |

Fixed overheads of the company amounts to $₹ \mathbf{2 . 4}$ lakhs per annum. The sale price of the motor is $₹ \mathbf{2 3 0}$ each
(i) Determine the number of motors that have to be manufactured and sold in a year in order to break-even.
(ii) How many motors will have to be made and sold to make a profit of Rupees one lakh per year?

## SUGGESTED_ANSWERS TO QUESIIONS_SYL2016_DEC2017_PAPER-10

(iii) If the sale price is reduced by $₹ 15$ each, how many motors will have to be sold to break-even?
(b) The table below shows the Costs and Profits of three different products $-X, Y \& Z$, manufactured by J erbera Co. Ltd.

|  | X | Y | Z | Total |
| :---: | :---: | :---: | :---: | :---: |
|  | ₹ | ₹ | ₹ | ₹ |
| Sales | 3,00,000 | 1,80,000 | 1,20,000 | 6,00,000 |
| Variable Cost | 2,40,000 | 1,26,000 | 72,000 | 4,38,000 |
| Contribution | 60,000 | 54,000 | 48,000 | 1,62,000 |
| Fixed Cost |  |  |  | 81,000 |
| Profit |  |  |  | 81,000 |

Can the profits of the company be increased by changing the sales mix of the products? Use Marginal Costing technique to amive at your answer. $\quad 6+(2+2+2)=12$

## Answer:

2. (a)
(i) Sales Price ₹ 230
Less: Va riable Cost
Material (₹) 50
Labour (₹) 80
V.O/H 60
Contribution
₹ 190
$₹ 40$
B.E Sales $\times P / V$ Ratio $=$ Fixed Cost
B.E. Sates $x(230-190) / 230=₹ 2,40,000$

Or B.E.Sales = ₹ $13,80,000$
or $13,80,000 / 230=6,000$ motor
(ii) Total Contribution $=₹ 3,40,000$ (Profit + fixed cost $₹ 2,40,000$ )

If the contribution is $₹ 40$, the number of motors $=1$
If the contribution is $₹ 3,40,000$, the number of motors $=3,40,000 \div 40=8,500$ motors.
(iiii) Reduced Selling-Price ₹ 215
Less Variable Cost 190

Revised contribution 25
B.F. Sales $=2,40,000 \div 25=9,600$ motors.

## SUGGESTED ANSWERS TO QUESTIONS SYL2016 DEC2017 PAPER-10

2. (b)

Relative profitability of Products

|  | X | Y | Z | Total |
| :---: | :---: | :---: | :---: | :---: |
|  | ₹ | ₹ | ₹ | ₹ |
| Sales | 3, 00, 000 | 1,80,000 | 1,20,000 | 6,00,000 |
| Variable Cost | 2, 40, 000 | 1,26,000 | 72,000 | 4,38,000 |
| Contribution | 60, 000 | 54,000 | 48, 000 | 1,62,000 |
| Fixed Cost |  |  |  | 81,000 |
| Profit |  |  |  | 81,000 |
| P/V Ratio | 20\% | 30\% | 40\% | 27\% |

The above table shows that product $Y$ and $Z$ are more profitable than $X$. Keeping total production same, company should change the sales mix in a way more of product $Z$ and y are produced. If company decides to use its production capacity more for product $Y$ and $Z$ than $X$, then the effect on profit if sale of product $Y$ and $Z$ is inc reased by ₹ 60,000 each and product $X$ by reducing ₹ $1,20,000$.

|  | X | Y | Z | Total |  |  |
| :--- | :---: | :---: | :---: | ---: | :---: | :---: |
|  | $₹$ | $₹$ | $₹$ |  |  |  |
| Sales | $1,80,000$ | $2,40,000$ | $1,80,000$ | $6,00,000$ |  |  |
| Variable Cost | $1,44,000$ | $1,68,000$ | $1,08,000$ | $4,20,000$ |  |  |
| Contribution | 36,000 | 72,000 | 72,000 | $1,80,000$ |  |  |
| Fixed Cost |  |  |  |  |  | 81,000 |
| Profit |  |  |  |  |  |  |

From the above table, we can observe that proposed change in product mix leads to an increase in profit from ₹ 81,000 to ₹ 99,000 .
3. (a) $X$ Ltd. uses budgetary control and standard costing system. The following data are available:

| Product | Budgeted |  | Actual |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Units to be sold | Sales value (₹) | Unit sold | Sales value (₹) |
| A | $\mathbf{1 0 0}$ | $\mathbf{1 , 2 0 0}$ | 100 | $\mathbf{1 , 1 0 0}$ |
| B | 50 | 600 | 50 | 600 |
| C | 100 | 900 | 200 | 1,700 |
| D | 75 | 450 | 50 | 300 |
|  | 325 | $\mathbf{3 , 1 5 0}$ | $\mathbf{4 0 0}$ | $\mathbf{3 , 7 0 0}$ |

## Calculate:

(i) Sales Volume Variance
(ii) Sales Price Variance
(iii) Sales Variance

## SUGGESTED_ANSWERS TO QUESIIONS_SYL2016_DEC2017_PAPER-10

(b) The standard labour and the actual labour engaged in a week for a job are as under:

|  | Skilled workers | Semi-skilled workers | Unskilled workers |
| :---: | :---: | :---: | :---: |
| A. Standard number of workers in the gang | 32 | 12 | 6 |
| B. Standard rate of wages per hour ( $₹$ ) | 3 | 2 | 1 |
| C. Actual number of workers employed in the gang during the week | 28 | 18 | 4 |
| D. Actual rate of wages per hour (₹) | 4 | 3 | 2 |

During the 40-hour working week, the gang produced 1800 standard labour hours of work.

Calculate:
(i) Labour Sub-effic iency Variance
(ii) Labour Mix or Gang Variance
(iii) Labour Efficiency Variance
(iv) Labour Rate Variance
(v) Labour Cost Variance
$41 / 2+7^{1 / 2}=12$

## Answer:

3. (a)
$\mathrm{SV}_{1}$ - Actual Sales realisation given $=₹ 3,700$
$\mathrm{SV}_{2}$ - Actual Sales at Sta ndard Price $=$

| Products | Units sold | Standard <br> Price | Amount |
| :---: | ---: | ---: | ---: |
|  |  | $(₹)$ | $(₹)$ |
| A | 100 | 12 | 1,200 |
| B | 50 | 12 | 600 |
| C | 200 | 9 | 1,800 |
| D | 50 | 6 | 300 |
|  | 400 |  | 3,900 |

$\mathrm{SV}_{4}$ - Budgeted Sales $=₹ 3,150$.
(i) Sales Price Va riance $=$
$\mathrm{SV}_{1}-\mathrm{SV}_{2}=₹ 3,700-₹ 3,900$ or₹ 200(A)
(ii) Sales Volume Variance $=$
$S V_{2}-S V_{4}=₹ 3,900-₹ 3,150$ or₹ 750 (F)
(iii) Sales Variance $=\mathrm{SV}_{1}-\mathrm{SV}_{4}$
$=₹ 3,700$ - ₹ 3,150 or₹ 550(F).

## SUG GESTED ANSWERS TO QUESTIONS_SYL2016 DEC 2017 PAPER-10

3. (b)

## Analysis of Given Data

|  | Standard Data |  |  | Actual Data |  |  |
| :--- | :---: | :---: | ---: | :---: | :---: | ---: |
|  | Hours | Rate (₹) | Value (₹) | Hours | Rate (₹) | Value (₹) |
| Skilled | 1,280 | 3 | 3,840 | 1,120 | 4 | 4,480 |
| Semi-skilled | 480 | 2 | 960 | 720 | 3 | 2,160 |
| Unskilled | 240 | 1 | 240 | 160 | 2 | 320 |
|  | 2,000 |  | 5,040 | 2,000 |  | 6,960 |

## Computation of required values

|  | SRSH $(1)(₹)$ | SRRSH (2)(₹) | SRAH (3) (₹ $\}$ | ARAH (4) (₹) |
| :--- | ---: | ---: | :---: | ---: |
| Men | $3 \times 1,152=3,456$ | 3,840 | $3 \times 1,120=3,360$ | 4,480 |
| Women | $2 \times 432=864$ | 960 | $2 \times 720=1,440$ | 2,160 |
| Boys | $1 \times 216=216$ | 240 | $1 \times 160=160$ | 320 |
|  | $=4,536$ | 5,040 | $=4,960$ | 6,960 |

## Computation of SH:

SH = (SH for that worker/SH for all the worker) $\times$ AQ for that worker.
For Skilled worker $=(1,280 / 2,000) \times 1,800=1,152$
For Semi-Skilled worker $=(480 / 2,000) \times 1,800=432$
For Un-Skilled worker $=(240 / 2,000) \times 1,800=216$

Where
(1) SRSH=Standard Cost of Standard Labour $=₹ 4,536$
(2) $\operatorname{SRRSH}=$ Revised Standard Cost of Labour $=₹ 5,040$
(3) SRAH = Standard Cost of Actual Labour $=₹ 4,960$
(4) ARAH $=$ Actual Cost of Labour $=₹ 6,960$

## Computation of Labour Variances:

(i) Labour Sub-effic iency Variance $=(1)-(2)=(4,536-5,040)=₹ 504$ (A)
(ii) Labour Mix or Gang Variances (2)-(3) $=(5,040-4,960)=₹ 80$ (F)
(iii) Labour Effic iency Variance $=(1)-(3)=(4,536-4,960)=₹ 424$ (A)
(iv) Labour Rate Variance $=(3)-(4)=(4,960-6,960)=₹ 2,000(A)$
(v) Labour Cost Variance $=(1)-(4)=(4,536-6,960)=₹ 2,424(A)$
4. (a) A manufacturing company has two divisions $-X$ and $Y$. Division $X$ is mainly engaged in production of an electronic device and Division $Y$ packs and labels the product and sells it in the market Division $X$ supplies $\mathbf{2 5 , 0 0 0}$ units of the product per month to $Y$ for packaging and labelling. Division $X$ incurs $₹ 16$ as the variable cost for the product and fixed cost of ₹ $8,40,000$ per year. Investment in fixed assets is ₹

## SUGGESTED_ANSWERS TO QUESTIONS_SYL2016_DEC 2017

9,60,000. The division plans to have $12 \%$ retum on fixed assets as nomal profits. Division $Y$ incurs ₹ 10 per product as variable expenses for packaging and marketing.
(i) Find the Transfer Price per unit of the product that Division $X$ can charge for transferto $Y$.
(ii) What will be profit of Division $Y$ if it can sell all the products in the market at $₹ \mathbf{8 0}$ per unit?
(iii) If Division Y can sell only 15,000 units of the product per month and asks Division $X$ to supply only 15,000 units, what will be the effect on the Transfer Price and the profits of the divisions?
(b) As a Cost and Management Accountant of MJK Ltd., prepare a Sales Overhead Budget for the months of January, February and March from the estimates given below:
Expenses per month: ₹

Advertisement 2,500
Salaries of the Sales Department 5,000
Expenses of the Sales Department 1,500

## Counter Salesmen's Salaries and Deamess Allowance 6,000

Commission to counter salesmen @ 1\% on their sales. Travelling salesmen's commission @ 10\% on their sales and expenses @ $5 \%$ on their sales.

The sales during the period were estimated as under:

| Month | Counter Sales | Travelling Salesmen Sales |
| :--- | :---: | :---: |
|  |  |  |
|  | 80,000 | 10,000 |
| J anuary | $1,20,000$ | 15,000 |
| February | $1,40,000$ | 20,000 |
| March |  | $(2+3+2)+5=12$ |

## Answer:

4. (a)
(i) Computation of Transfer Price:
To be charged by ' $X$ ' to ' $y$ '

| Variable Cost per Unit | ₹ | OR |
| :--- | ---: | ---: |
| Fixed Cost per Unit $(8,40,000 / 3,00,000)$ | 16.00 | 16.00 |
| Retum per unit $(9,60,000 \times 12 \%) / 3,00.000$ | 2.80 | 2.80 |
|  | 19.184 | 23.408 |

## SUGGESTED ANSWERS TO QUESTIONS SYL2016 DEC2017 PAPER-10

(ii) Computation of Profit of Division ' $\mathbf{Y}$ '

| Transfer price | 19.184 | 23.408 |
| :--- | ---: | ---: |
| Va riable Cost | 10.000 | 10.000 |
|  | $\mathbf{2 9 . 1 8 4}$ | $\mathbf{3 3 . 4 0 8}$ |
| Contribution \& Profit per unit | $=(80-29.184)$ | $(80-33.408)$ |
| Monthly Profit | $=\mathbf{5 0 . 8 1 6}$ | $=\mathbf{4 6 . 5 9 2}$ |
|  | $=25,000 \times 50.816$ | $=25,000 \times 46.592$ |
|  | $=₹ 12,70,400$ | $=₹ 11,64,800$ |
| Yearly profit | and | $=3,00,000 \times 50.816$ |
|  | $=₹ 1,52,44,800$ | $=3,00,000 \times 46.592$ |
|  |  | $=₹ 1,39,77,600$ |

(iii) Transfer Price:

| Variable Cost per Unit | 16.00 | 16.00 |
| :--- | ---: | ---: |
| Fixed Cost per Unit $(8,40,000 / 1,80,000)$ | 4.67 | 4.67 |
| Retum per unit $(9,60,000 \times 12 \%) / 1,80,000$ | 0.64 | 7.68 |
|  | 21.31 | 28.35 |
| Variable Cost for Packaging \& Marketing | 10.00 | 10.00 |
| Contribution \& Profit per unit | 31.31 | 38.35 |
|  | 48.69 | 41.65 |

Note: Suitable assumptions are expected from students in case of 2nd altemative where retum/unit is ₹ 4.608 or ₹ 7.68 as the case may be. In case of suitable assumptions with correct working, full marks are given. Otherwise, step wise marking is given with justific ation.

4(b)
Sale Overhead Budget

|  | January | February | March |
| :--- | ---: | ---: | ---: |
|  | ₹ | $₹$ | $₹$ |
| Counter Sales <br> Travelling Salesmen's Sales | 80,000 | $1,20,000$ | $1,40,000$ |
| Total Sales | 10,000 | 15,000 | 20,000 |
| Sales Overheads <br> Va riable: <br> Commission or Counter Sales @ 1\% <br> Travelling Salesman's <br> Commission @ 10\% on Travelling Salesmen's <br> Sales | $\mathbf{9 0 , 0 0 0}$ | $\mathbf{1 , 3 5 , 0 0 0}$ | $\mathbf{1 , 6 0 , 0 0 0}$ |

| Expenses on Tra velling |  |  |  |
| :--- | ---: | ---: | ---: |

| Expenses of the Sales Department | 6,000 | 6,000 | 1,500 |
| Counter Salesmen's Salaries | 17,300 | 18,450 | 19,400 |
| and Deamess Allowance |  |  |  |
| Total Sales Overheads |  |  |  |

5. White short note on any three of the following:
(a) Break-even Analysis
(b) Absorption Costing Vs. Marginal Costing
(c) Zero Based Budgeting
(d) Uniform Costing

## Answer:

## 5. (a)

Break Even means the volume of production or sales where there is no profit or loss. In other words, Break Even Point is the volume of production or sales where total costs are equal to revenue. It helps in finding out the relationship of costs and revenues to output. In understanding the breakeven point, cost, volume and profit are always used. The break even analysis is used to answer many questions of the management in day to day business. The formal break even chart is as follows:

When no. of units are expressed on X-axis and costs and revenues are expressed on Y -axis, three lines are drawn i.e., fixed cost line, total cost line and total sales line. In the above graph we find there is an intersection point of the total sales line and total cost line and from that intersection point if a perpendic ular is drawn to $X$-axis, we find break even units. Similarly, from the same intersection point a parallel line is drawn to X -axis so that it cuts Y -axis, where we find Break Even point in terms of value.

## SUG GESTED ANSWERS TO QUESTIONS_SYL2016 DEC2017_PAPER-10

## 5. (b)

Differences between Absorption costing and Marginal costing

| Absorption Costing | Marginal Costing |
| :---: | :---: |
| Both fixed and variable costs a re considered for product costing and inventory valuation. | Only variable costs are considered for product costing and inventory valuation. |
| Fixed costs are charged to the cost of production. Each product bears a reasonable share of fixed cost and thus the profitability of a product is influenced by the apportionment of fixed costs. | Fixed costs are regarded as period costs. The profitability of different products is judged by their P/V ratio. |
| Cost data are presented in conventional pattem. Net Profit of each product is determined after 'subtracting fixed cost along with their va riable cost. | Cost data are presented to highlight is the total contribution of each product. |
| The difference in the magnitude of opening stock and closing stock affects the unit cost of production due to the impact of related fixed cost. | The difference in the magnitude of opening stock and closing stock does not affect the unit cost of production. |
| In case of absorption costing the cost per unit reduces, as the production increases as it is fixed cost which reduces, whereas, the variable cost remains the same perunit. | In case of marginal costing the cost per unit remains the same, irespective of the production as it is valued at variable cost. |

## 5. (c)

Zero based budgeting starts with the premise that the budget for next period is zero so long the demand for a function, process, project or activity is not justified for each rupee from the first rupee spent. The assumptions are that without such a justification no spending will be allowed. The burden of proof thus shifts to each manager to justify why the money should be spent at all and to indicate what would happen if the proposed activity is not camied out and no money is spent. It differs from the conventional system of budgeting mainly it starts from scratch or zero and not on the basis of trends or historic al levels of expenditure. In the customary- budgeting system, the last year's figures are accepted as they are, or cut back or increasesare granted. The first step in the process of zero base budgeting is to develop an operational plan or decision package. A decision package identifies and describes a particular activity. For this purpose, each package should give details of costs, retums, pupose, expected results, the altematives available and a statement of the consequences if the a ctivity is reduced or not performed at all.

Zero-base Budgeting is more suitably applicable to discretionary- cost areas. These costs may have no relation to volume or activity and generally arise as a result of management policies. Where standardsare deteminable, those costs associated with the inputs should be controlled through the use of standard costing.

## 5. (d)

Uniform Costing is not a separate method ortype of Costing. It is a technique of Costing and can be applied to any industry. Uniform Costing may be defined as the application and use of the same costing principles and procedures by different organisations under the same

## SUGGESTED_ANSWERS TO QUESTIONS_SYL2016_DEC2017_PAPER-10

management or on a common understanding between members of an association. The main feature of uniform costing is that whatever be the method of costing used, it is a pplied uniformly in a number of concems in the same industry, or even in different but similar industries. This enables cost and accounting data of the member undertakings to be compiled on a comparable basis so that useful and crucial decisions can be taken. The principles and methods adopted for the accumulation, analysis, apportionment and allocation of costs vary so widely from concem to concem that comparison of costs is rendered diffic ult and unrealistic. Uniform Costing attempts to establish uniform methods so that comparison of performances in the various undertakings can be made to the common advanta ge of all the constituent units.

The need for application of uniform Costing System exists in a business, irrespective of the circumstances and conditions prevailing therein. In concems which are members of a trade association, the procedure for uniform Costing may be devised and controlled by the association or by any other central body specially formed for the purpose.

## SUGGESTED ANSWERS TO QUESTIONS_SYL2016_DEC2017_PAPER-10

Part-B<br>(Financial Management)<br>Section-III

6. Answer the following questions:
(a) Choose the comect answer from the given four altematives.
(i) ROI (Retum on Investment) can be decomposed into the following ratios:
(A) Overall Tumover Ratio and Curent Ratio
(B) Net Profit Ratio and Fixed Assets Tumover
(C) Working Capital Tumover Ratio and Net Profit Ratio
(D) Net Profit Ratio and Overall Tumover Ratio
(ii) Which one of the following activities is outside the purview of dividend decision in financial management?
(A) Identific ation of the profit aftertaxes
(B) Measurement of the cost of funds
(C) Deciding on the pay-out ratio
(D) Considering issue of bonus shares to equity shareholders
(iii) Which of the following does not help to increase Curent Ratio?
(A) Issue of Debentures to buy Stock
(B) Issue of Debentures to pay Creditors
(C) Sale of Investment to pay Creditors
(D) Avail Bank Overdraft to buy Machine
(iv) Which of the following statements is comect?
(A) A higher Receivable Tumover is not desirable.
(B) Interest Coverage Ratio depends upon Tax Rate.
(C) Increase in Net Profit Ratio means increase in Sales.
(D) Lower Debt-Equity Ratio means lower Financial Risk.
(v) "Shareholders' wealth" in a firm is reflected by:
(A) the number of people employed in the firm.
(B) the book value of the firm's assets less the book value of its liabilities.
(C) the amount of salary paid to its employees.
(D) the market price per share of the firm.
(vi) The excess of C urrent Assets over C urrent Liabilities is called:
(A) Net Curent Assets
(B) Net Working Capital
(C) Working Capital
(D) All of the above
(b) Match the statement in Column I with the most appropriate statement in Column II.

$$
1 \times 4=4
$$

## SUGGESTED_ANSWERS TO QUESIIONS_SYL2016_DEC2017_PAPER-10

| Provision for <br> Depreciation on <br> Fumiture | 10,000 | 12,000 | Stock | $\mathbf{1 , 2 0 , 0 0 0}$ | $\mathbf{1 , 3 0 , 0 0 0}$ |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Provision for <br> Depreciation on Plant | $\mathbf{1 , 0 0 , 0 0 0}$ | $\mathbf{1 , 1 2 , 0 0 0}$ | Cash | $\mathbf{6 0 , 0 0 0}$ | $\mathbf{9 0 , 0 0 0}$ |
| Provision for Taxation | 40,000 | $\mathbf{6 0 , 0 0 0}$ |  |  |  |
| Sundry Creditors | $\mathbf{1 , 7 2 , 0 0 0}$ | $\mathbf{1 , 9 0 , 0 0 0}$ |  |  |  |
|  | $7,82,000$ | $\mathbf{9 , 3 8 , 0 0 0}$ | $\mathbf{7 , 8 2 , 0 0 0}$ | $\mathbf{9 , 3 8 , 0 0 0}$ |  |

A plant purchased for ₹ 8,000 (Depreciation 4,000) was sold on cash for $₹ 1,600$ in October 2016. In July 2016, a piece of fumiture was purchased for ₹ 4,000 and a dividend of $\mathbf{2 2 . 5}$ \% was paid to Equity Shareholders.
$4+8=12$

## Answer:

7. (a)

If Working Capital $=C A-C L=1,20,000$ and $C A=2.5 C L$, then $2.5 C L-C L=1,20,000$
Therefore $C L=80,000$ and $C A=2,00,000$
Liquid Ratio $=$ Quick Assets/ $/ C L=1.5$
Therefore Quick Assets $=C L \times 1.5=1,20,000$
Since Quick Assets $=C A-$ Stock, then Stock $=C A-Q A=80,000$

If Proprietors Funds are $P$ then Fixed Assets $=0.75 \mathrm{P}$
Proprietors Funds $+C L=F A+C A$
OrP $+80,000=0.75 \mathrm{P}+2,00,000$
Or 0.25 P = 1,20,000, or $P=4,80,000$,
$F A=480000+80000-200000=3,60,000$
Since Proprietory Fundsare $=$ Sh. Capital - Reserves, therefore Sh. Capital $=4,00,000$

Statement of Proprietors Fund

| Proprietors Fund | $₹$ | $₹$ |
| :--- | ---: | ---: |
| Share Capital | $4,00,000$ |  |
| Reserves and Surplus | 80,000 | $4,80,000$ |
|  |  |  |
| Investment of Funds | $3.60,000$ |  |
| Fixed Assets | 80,000 |  |
| Stock | $1,20,000$ |  |
| Other Current Assets | 80,000 | $4,80,000$ |
| Less Current Liabilities |  |  |

## 7. (b)

It is a ssumed that dividend is paid on original shares only.
8. (a) Jai \& Karti are regular customers of MJK Ltd. Kolkata and have approached the sellers for extension of credit facility for enabling them to purchase goods from MJK Ltd. On the analysis of past performance and on the basis of information supplied, the following pattem of payment schedule emerges in regard to J ai \& Karti:

| Schedule | Pattem |
| :--- | :---: |
| Atthe end of $\mathbf{3 0}$ days | $15 \%$ of the bill |
| $\mathbf{6 0}$ days | $34 \%$ of the bill |
| $\mathbf{9 0}$ days |  |
| $\mathbf{1 0 0}$ days | $20 \%$ of the bill |
| Non-recovery | $1 \%$ of the bill |

J ai \& Karti wants to enter into a firm commitment for purchase of goods of $₹ \mathbf{1 5 , 0 0 , 0 0 0}$ in 2016, deliveries to be made in equal quantities on the first day of each quarter in the calendar year. The price per unit of the commodity is $₹ \mathbf{1 5 0}$ on which a profit of $₹$ 5 per unit is expected to be made. It is anticipated by the MJKLd. that taking up of this contract would mean an extra recuring expenditure to ₹ 5,000 per annum. If the opportunity cost of funds in the hands of MJ K Ltd. is $24 \%$ per annum, would you as a Management Ac c ountant of the seller rec ommend the grant of credit to Jai \& Karti? Working should form part of your answer.
(b) Company A reports the following information from its financial statements.

|  | $₹$ |
| :--- | ---: |
| Sales | $\mathbf{8 , 0 0 , 0 0 0}$ |
| Less: Variable cost | $\mathbf{2 , 4 0 , 0 0 0}$ |
| Contribution | $\mathbf{5 , 6 0 , 0 0 0}$ |
| Fixed Cost | $\mathbf{4 , 0 0 , 0 0 0}$ |
| EBIT | $\mathbf{1 , 6 0 , 0 0 0}$ |
| Less: Interest | $\mathbf{2 0 , 0 0 0}$ |
| Profit before Tax | $\mathbf{1 , 4 0 , 0 0 0}$ |

## Find out

（i）Using concept of financial leverage，by what percentage will the taxable inc ome increase，if $⿴ 囗 十$ IT increases by $10 \%$ ？Verify the results in terms of Rupees．
（ii）Using the concept of operating leverage，by what percentage will EBT increase if there is $\mathbf{1 0 \%}$ increase in sales？Verify the results in terms of Rupees．
$8+(2+2)=12$

## Answer：

8．（a）
（a）Incremental profit $=15,00,000 \times \frac{5}{150}=₹ 50,000$
（b）Calculation of incremental finance cost $17,975^{*} \times 4=₹ 71,900$

$$
\text { *Sales per quarter }=\frac{15,00,000}{4}=₹ 3,75,000
$$

Finance cost per quarter．

| For $15 \%$ Of bill | $3,75,000 \times 15 \% \times 24 \% \times \frac{30}{360}$ | 1,125 |
| :--- | :--- | ---: |
| For 34\％of bill | $3,75,000 \times 34 \% \times 24 \% \times \frac{60}{360}$ | 5,100 |
| For 30\％of bill | $3,75,000 \times 30 \% \times 24 \% \times \frac{90}{360}$ | 6,750 |
| For 20\％of bill | $3,75,000 \times 20 \% \times 24 \% \times \frac{100}{360}$ | 5,000 |
| Finance cost per quarter |  | 17,975 |

（c）Extra recuming expenses $=₹ 5,000$
（d）Bad debts $=15,00,000 \times 1 \%=₹ 15,000$
Therefore，inc remental profit $=a-b-c-d=50,000-71,900-5,000-15,000=₹ 41,900$（loss）
Comment ：As there is incremental loss，it is advisable not to extend credit facility to Jai \＆ Karti．

8．（b）
（i）Degree of Financial Leverage：
FL－EBIT／Profit before $\operatorname{Tax}=1,60,000 / 1,40,000=1.1428$
If EBIT inc reases by $10 \%$ ，the taxable income will inc rease by $1.1428 \times 10=11.428 \%$ and it may be verified as follows：

| EBIT（after 10\％inc rease） | $₹ 1,76,000$ |
| :--- | ---: |
| Less interest | 20,000 |
| Profit before Tax | $1,56,000$ |

Increase in taxable income is ₹ 16,000 i．e $11.428 \%$ of $₹ 1,40,000$

## SUGGESTED_ANSWERS TO QUESIIONS_SYL2016_DEC2017_PAPER-10

(ii) Degree of Operating beverage:

OL $=$ C ontribution/EBIT=5,60,000/1,60,000 $=3.50$
If sale increases by $10 \%$, the EBIT will increase by $3.50 \times 10=35 \%$ and it may be verified as follow:

| Sales (a fter 10\% inc rease) | $₹ 8,80,000$ |
| :--- | ---: |
| Less variable expenses @ 30\% | $2,64,000$ |
| Contribution | $6,16,000$ |
| Less Fixed cost | $4,00,000$ |
| EB1T | $2,16,000$ |

Increase in EBIT is ₹ 56,000 i.e. 35\% of ₹ 1,60,000
9. (a) Given below is the Statement of Assets and Liabilities of a company as at 31st December, 2016.

| Liabilities | $₹$ | Assets | $₹$ |
| :--- | ---: | :--- | ---: |
| Equity share capital | $\mathbf{4 , 0 0 , 0 0 0}$ | Fixed Assets | $\mathbf{6 , 0 0 , 0 0 0}$ |
| 40000 shares of $₹ \mathbf{1 0 0}$ each |  |  |  |
| Resenve and surplus | $\mathbf{2 , 6 0 , 0 0 0}$ | Investments | $\mathbf{1 , 0 0 , 0 0 0}$ |
| 8\% debentures | $\mathbf{1 , 7 0 , 0 0 0}$ | Current assets | $\mathbf{2 , 8 0 , 0 0 0}$ |
| Current Liabilities |  |  |  |
| Short tem loans | $\mathbf{1 , 0 0 , 0 0 0}$ |  |  |
| Trade creditors | 50,000 |  | $\mathbf{9 , 8 0 , 0 0 0}$ |
|  | $9,80,000$ |  |  |

Calculate the company's weighed average cost of capital using balance sheet valuations. The following additional information are also available.
(i) 8\% Debentures were issued at par.
(ii) All interests payments are up to date and equity dividend is curently $\mathbf{1 2 \%}$.
(iii) Short term loan camies interest at 18\% p.a.
(iv) The shares and debentures of the company are quoted on the Calcutta Stock Exchange and curent Market Prices are as follows:

Equity Shares at $₹ 14$ each and $8 \%$ Debentures at $₹ 98$ each.
(v) The rate of tax for the company may be taken at $50 \%$.
(b) ZZI Co. has four potential projects all with an initial cost of $₹ 15,00,000$. The capital budget for the year will only allow the company to take up only one of the three projects. Given the disc ount rates and the future cash flows of each project, which project should they ac cept?

## SUGGESTED ANSWERS TO QUESTIONS SYL2016 DEC2017 PAPER-10

| PROJ ECT | Annual Net Cash Rows per year <br> forfive years (₹) | Disc ount Rates |
| :---: | :---: | :---: |
| A | $\mathbf{3 , 5 0 , 0 0 0}$ | $\mathbf{4 \%}$ |
| B | $\mathbf{4 , 0 0 , 0 0 0}$ | $\mathbf{8 \%}$ |
| C | $\mathbf{5 , 0 0 , 0 0 0}$ | $\mathbf{1 0 \%}$ |

## Answer:

9. (a)

| Calc ulation of the Cost of Equity: | ₹ |
| :--- | ---: |
| Equity Share | $4,00,000$ |
| Reserves a nd Surplus | $\underline{2,60,000}$ |
| Equity (Sha reholder's) Fund | $\underline{6,60,000}$ |

Book Value PerShare $=6,60,000 / 40,000=₹ 16.50$.
Equity Dividend Per Share $=12 / 100 \times 10=₹ 1.20$
Therefore, Cost Of Equity (\%) $=1.20 / 16.50 \times 100=7.273 \%$

## Computation of Weighted Average Cost of Capital:

## Capital Structure or

| Type of Capital | Amount (₹) | Before Tax | After Tax | Weighted <br> Average Cost\% |
| :--- | :---: | :---: | :---: | :---: |
| Equity funds | $6,60,000$ | $7.273 \%$ | $7.273 \%$ | 48,000 |
| Debentures | $1,70,000$ | $8 \%$ | $4 \%$ | 6,800 |
| Total | $8,30,000$ |  | 54800 |  |

Weighted Average Cost of Capital $=54800 / 8,30,000 \times 100=6.602 \%$
Question is wrong ( 40000 shares of ₹ 100 each).
Ether, students can take 40,000 @10 each OR 4,000 @ 100 each.
9. (b)

## Project A

PV of Annuity of ₹ 3,50,000 for 5 years at $4 \%$ rate of disc ount -
3,50,000 $\times 4,452=₹ 15,58,200$
$N P V=₹ 15,58,200-₹ 15,00,000=₹ 58,200$

## Project B

PV of Annuity of ₹ $4,00,000$ for 5 years at $8 \%$ rate of disc ount-
$4,00,000 \times 3.993=15,97,200$
NPV =₹ 15,97,200-₹ 15,00,000 =₹ 97,200

## SUGGESTED ANSWERS TO QUESTIONS_SYL2016 DEC2017_PAPER-10

## Project C

PV of Annuity of ₹ 5,00,000 for 5 years at 10\% rate of disc ount-
5,00,000 $\times 3.791-18,95,500$
$N P V=₹ 18,95,500-₹ 15,00,000=₹ 3,95,500$

## Accept Project C

## 10. Write short notes on any three of the following:

(a) Intemal Rate of Retum
(b) Sweat Equity Shares
(c) Venture Capital
(d) Combined Leverage

## Answer:

## 10. (a) Intemal Rate of retum

IRR method follows disc ounted cash flow technique which takes into account the time value of money. The intemal rate of retum is the interest rate which equates the present value of expected future cash inflows with the initial capital outlay. In other words, it is the rate at which NPV is equal zero. Whenever a project report is prepared, IRR is to be worked out in order to ascertain the viability of the project. This is also an important guiding factor to fina ncial institutions a nd investors.

## Formula:

$C=\left[\left\{A_{1} /(1+r)\right\}+\left\{A_{2} /\left(1+r_{2}\right)\right\}+\right.$ $\qquad$ $+\left\{A_{n} /\left(1+R_{n}\right)\right\}$

Where C = Initial Capital outlay.
A1, A2, A3 etc. = Expected future cash inflows at the end of year 1,2, 3 and so on.
$r=$ Rate of interest
$\mathrm{n}=$ Number of years of project
In the above equation - ' $r$ ' is to be solved in order to find out IRR.

## Computation of IRR

The Intemal rate of retum is to be determined by trial and error method. The following steps can be used for its computation, (i) Compute the present value of the cash flows from an investment, by using arbitrary by selected interest rate, (ii) Then compare the present value so obtained with capital outlay, (iii) If the present value is higher than the cost, then the present value of inflows is to be detemmined by using higher rate, (iv) This procedure is to be continued until the present value of the inflows from the investment are approximately equal to its outflow, (v) The interest rate that bring about equality is the intemal rate of retum.

## SUGGESTED ANSWERS TO QUESTIONS SYL2016 DEC2017 PAPER-10

## 10. (b) Sweat Equity Shares:

As per Sec 2(88) of the Companies Act 2013 - Sweat equity shares means such equity shares as are issued by a company to its directors or employees at a discount or for consideration, oilier than cash, for providing their knowhow or making available rights in the nature of intellectual property rights or value additions, by whatever name called.

A company may issue sweat equity shares of a class of shares already issued, if the following conditions are fulfilled: (a) the issue is authorised by a special resolution passed by the company; (b) the resolution specifies the number of shares, the curent market price, consideration, if any, and the class or classes of directors or employees to whom such equity shares are to be issued; (c) not less than one year has, at the date of such issue, elapsed since the date on which the company had commenced business; and (d) where the equity shares of the company are listed on a recognised stock exchange, the sweat equity share issued in accordance with the regulations made by the Securities and Exchange Board in this behalf and if they are not so listed, the sweat equity shares are issued in accordance with rule 8 of Companies (Share Capital and Debenture) Rules, 2014.

## 10. (c) Venture Capital:

Venture Capital is a form of equity financing especially designed for funding high risk and high reward projects. There is a common perception that Venture Capital is a means of financing high technology projects. However, Venture Capital is investment of long term financial made in: 1. Ventures promoted by technically or professionally qualified but unproven entrepreneurs, or 2 . Ventures seeking to hamess commercially unproven technology, or 3.High risk ventures. The term 'Venture Capital' represents financial investment in a highly risky project with the objective of ea ming a high rate of retum.

## Modes of Finance by Venture Capitalists

1. Equity Most of the venture capital funds provide financial support to entrepreneurs in the form of equity by financing $49 \%$ of the total equity. This is to ensure that the ownership and overall control remains with the entrepreneur. Since there is a great uncertainty about the generation of cash inflows in the initial years, equity financing is the safest mode of financing. A debt instrument on the other hand requires periodical servicing of dept.
2. Conditional Loan From a venture capitalist point of view, equity is an unsecured instrument hence a less preferable option than a secured debt instrument. A conditional loan usually involves either no interest at all or a coupon payment at nominal rate. In addition, a royalty at agreed rates payable to the lender on the sales tumover. As the units pic ks up in sales interest rate are inc reased and royalty a mounts are decreased.
3 Convertible Loans the convertible loan "is subordinate' to all other loans which may be converted into equity if interest paymentsare not made within agreed time limit.

## 10. (d) Combined Leverage:

A combination of the operating and financial leverages is the total or Combination Leverage. The operating leverage causesa magnified effect of the change in saleslevel on the EBITlevel and if the financial leverage combined simulta neously, then the change in EBIT will, in tum, have a magnified effect on the EPS. A firm will have wide fluctuations in the EPS for even a small change in the sales level. Thus effect of change in sales level on the EPS is known as combined leverage. Thus Degree of Combined Leverage may be calculated as follows:

DCL=Contribution/Ea ming after Interest.
