> Section - B Answer any five questions from question numbers 2 to 8 . Each question carries 15 marks.
2. (a) From the following particulars with respect to a particular item of materials of a manufacturing company, calc ulate the best quantity to order:

| Ordering quantities (tonne) | Price per ton (Rs.) |
| :--- | ---: |
| Less than 250 | 6.00 |
| 250 but less than 800 | 5.90 |
| 800 but less than 2,000 | 5.80 |
| 2,000 but less than 4,000 | 5.70 |
| 4,000 and above | 5.60 |

The annual demand for the material is 4,000 tonnes. Stock holding costs are $\mathbf{2 5 \%}$ of material cost p.a. The delivery cost per order is Rs. 6.00.
(b) The summary as per primary distribution is as follows:

Production departments A- Rs. 2,500; B- Rs. 2,300 \& C- Rs. 1,700
Senvice departments X-Rs. 700; Y-Rs. 900
Expenses of service departments are distributed in the ratios of:
X department A-20\%, B- 40\%, C- 30\% and Y- 10\%
Y department A- 40\%, B- 20\%, C- 20\% and X- 20\%
Show the distribution of senvice costs among A, B and C under repeated distribution method.

| (vii) | Total inventory cost (i)+(iii)+(vi) | 24,270 | 23,880 | 23,810 | 24,237 | 25,206 |

For the above computations the best qua ntity to order is 800 units.
Note: Minimum ordering quantity assumed to be 200 tons; it may be any quantity below 250 tons, but the decision will remain same.

It can be noticed that the undistributed balance in service department is very negligible and thuscan be ignored for further distribution.

(i) Production overheads have been charged at $20 \%$ on prime cost
(ii) Administration overheads have been recovered at Rs. 9.75 perfinished unit
(iii) Selling and distribution overheads have been rec overed at Rs. 13 per unit sold. Required:
(i) Prepare a statement showing cost and profit as per cost records.
(ii) Prepare a statement reconciling the profit disclosed by cost accounts with that shown in financial ac counts.

## Answer:

3. (a) Treatment of overtime in Cost Records: As per CAS-7, Overtime Premium shall be assigned directly to the cost object or treated as overheads depending on the economic feasibility and specific circ umstances requiring such overtime.

When overtime is worked due to exigencies or urgencies of the work, the basic/normal payment is treated as Direct Labour Cost and charged to Production or cost unit on which the worker is employed. Whereas the amount of premium (extra amount) is treated as overhead.

If overtime is spent at the request of the customer, then the entire amount (including overtime premium) is treated asdirect wagesand should be charged to the job.

When the overtime is worked due to lack of capacity as general policy of the company thenthe total a mount paid is treated as direct wages which is computed at the estimated rate based on the figures of the previous years.

Overtime worked on account of the abnormal conditions such as flood, earthquake, etc., should not be charged to cost, but to Costing Profit and Loss Account if integrated accounts are maintained.
It will thus be seen that overtime involves payment of increased wages and should be resorted to only when extremely essential.

* Total Cost $=$ Expenses before Profit and Reserve $=$ Rs. 3,69,414 - Rs. 29,864 credits
$\therefore$ Total Expenses=Rs. 3,39,550.
Hence, Total Cost = Rs. 3,99,000 WIP - Rs. 3,39,550 =Rs. 59,450
or
Altematively, Total including WIP =Rs. 4,28,864 - Rs. 3,69,414 =Rs. 59,450
$\frac{\text { Cash Received }}{\text { Work Certified }}=\frac{3,60,000}{3,90000}=0.92308$
$\therefore$ Rs. $59,450 \times 0.92308=$ Rs. $54,877 . \therefore \frac{2}{3}$ rd of Rs. $54,877=$ Rs. 36,585 Profit
Hence, Balance (Rs. 59,450 - Rs. 36,585)=Rs. 22,865 is Reserve

$$
\begin{aligned}
& \text { P/V Ratio }=\frac{S-V}{S}=\frac{20-14}{20} \times 100=30 \% \\

(ii) Sales to eam a target net income of Rs. 60,000 per month:

Contribution per unit =Rs. 20 - Rs. 14 =Rs. 6.
Sa les in units $=\frac{F+D e s i r e d ~ P r o f i t}{\text { Contribution perunit }}=\frac{7,92,000+60,000}{6}=1,42,000$ units.
(Sales in Rupees $=1,42,000 \times$ Rs. $20=$ Rs. $28,40,000$.) $\rightarrow$ This is optional
(iii) No. of units to be sold to eam a net income of $25 \%$ on cost:

Profit @ $25 \%$ on cost means a profit @ $20 \%$ on Sales. Let sales be assumed as Rs. x; the desired profit will be $20 \%$ of $x$ or $.20 x$.
Now, $x=\frac{F+\text { Desired Profit }}{P / V \text { Ratio }}$
Or $x=\frac{7,92,000+0.20 x}{1} \times \frac{100}{30}$
or $30 x=7,92,00,000+20 x$
or $10 x=$ Rs. $7,92,00,000$
or $x=$ Rs. 79,20,000
No. of units to be sold $=\frac{79,20,000}{20 \text { (S.P. perunit) }}=3,96,000$ units
(iv) Selling Price per unit if BEP is brought down to $1,20,000$ units :

Contribution per unit $=\frac{\text { Fixed Cost }}{B E P \text { in units }}=\frac{7,92,000}{1,20,000}=6.60$ per unit.
Now, S.P. per unit $=V+C=$ Rs. $14+$ Rs. $6.60=$ Rs. 20.60 .
(b) Computation of Sales and Variable Costs for Plants B and C at 100 percent capacity of working.

(ii) Sales at $75 \%$ c a pacity $=$ Rs. 750 lakhs
$P=$ (Sales $\times P / V$ ratio) - Fixed Cost

## SUGGESTED ANSWERS TO QUESTIONS SYL2016 DEC 2017 PAPER-8

8. Answer any three out of the following four questions:
$5 \times 3=15$
(a) "Cost Ac counting and Management Ac counting are inter-dependent" Do you agree, discuss.
(b) Differentiate between Operation Cost and Operating Cost
(c) Enumerate the need for predetermined overhead rate.
(d) What is Responsibility Accounting? Also state the Principles of Responsibility Accounting.

## Answer:

8. (a) Cost Ac counting: In cost accounting, primary emphasis is on cost a nd it deals with its collection, a nalysis, relevance, interpretation and presentation for various problems of management.
Management Accounting: It utilizes the principles and practices of financial accounting and cost accounting in addition to other management techniques for efficient operations of a concem. It widely uses different techniques from various branches of knowledge like Statistics, Mathematics, Ec onomics, Law and Psychology to assist the mana gement in its ta sk of maximizing profits or minimizing losses. The main thrust in management accounting is towards determining policy and formulating plansto achieve desired objectives of management.
From the above discussion it may be concluded that cost accounting and management accounting are inter-dependent, greatly related and inseparable.
(b) Operation Cost

Operation cost is the cost of a specific operation involved in a production process or business activity. The cost unit in this method is the operation, instead of process. When the manufacturing method of a concem consists of a number of distinct operations, operating costing is suitable.

## Operating Cost

Operating cost is the cost incured in conducting a business activity. It refers to the cost of concems which do not manufacture any product but which provide services. Industries and establishments like power house, transport and travel agencies, hospitals, schools etc. which undertake services rather than the manufacture of products, ascertain operating costs. The cost units used are Kilo Watt Hour (KWH), Passenger Kilometre and Bed in the Hospital etc.
Operation costing method constitutes a distinct type of costing but it may also be classed as a variant of process cost since costs in this method are usually compiled for a specified period.
(c) Need for predetermined Overhead Rate:

Predetermined Overhead Rate is needed for the following rea sons:
i) actual Rate can be determined only after the overheads have been inc urred
ii) to a void delay in computing cost
iii) to prepare Quotations in time and quickly
iv) actual Overhead Rate may fluctuate from period to period. But in case of predetermined rate, it is not so.
v) to ensure cost control.

## OR

As per study material as under:
Advantages of Predetermined Overhead Rate:
i) Enables prompt preparation of cost estimates, quotations a nd fixation of selling prices.

## SUGGESTED ANSWERS TO QUESTIONS SYL2016 DEC 2017 PAPER-8

ii) Cost data is available to management along with financial data.
iii) In case of Cost-plus contracts prompt billing is possible through predetemined recovery rate/s.
iv) In concems having budgetary control system, no extra cleric al efforts are required in computing the pre-detemined overhead rate.

## (d) Responsibility Accounting:

It is a system of accounting that recognizes various responsibility centres throughout the organisation and reflects the plans and actions of each of these centres by assigning partic ular revenues and costs of the one having the pertinent responsibility.

It is a system in which the person holding the supervisory posts as president, function head, foreman, etc. are given a report showing the performance of the company or department or section as the case may be. The report will show the data relating to operational results of the area and the items of which he is responsible for control. Responsibility accounting follows the basic principles of any system of cost control and standard costing. It differs only in the sense that it lays emphasis on human beings and fixes responsibilities for individuals. It is based on the belief that control can be exerc ised by human beings, so responsibilities should be fixed for individuals.

Principles of Responsibility Accounting:
(i) A target is fixed for each department or responsibility centre.
(ii) Actual performance is compared with the target.
(iii) The variances from plan are analysed so as to fix the responsibility.
(iv) Corrective action is taken by higher management and is communic ated.
