# FPIs END 2022 AS NET SELLERS; EXPERTS PREDICT A COMEBACK IN

**2023:** If 2020 was the year of record foreign fund inflows into the Indian equity market, 2022 turned out to be the year of worst outflows. After a three-year buying streak, foreign portfolio investors (FPIs) will close 2022 as net sellers of Indian equities. According to depositories data, FPI net outflows from the Indian equities, on a year-to-date basis, stands at ₹1.21-lakh crore as on Friday.

#### **UNCERTAINTY OVER IMPLEMENTING E-INVOICING FOR BUSINESSES WITH**

**TURNOVER OF MORE THAN ₹5 CR:** Uncertainty prevails over implementing e-invoicing for businesses with turnover of more than ₹5 crore. The Goods and Service Tax Council had made it mandatory for businesses with an annual turnover of over ₹5 crore to move to e-invoicing from January 1. The Central Board of Indirect Taxes and Customs (CBIC) is yet to come out with a notification in this regard. Though experts feel the system is good, the time is too short to bring down the threshold for implementation.

# **RBI EASES PAYMENT CONCERNS INVOLVING LARGE PULSES SUPPLIERS:**

RBI has stepped in to address concerns of banks in clearing payments to India's major pulses suppliers, such as Myanmar, Mozambique and Tanzania, which have been flagged as risky destinations by the Financial Action Task Force (FATF). In a communication to the Indian Banks' Association (IBA), the banking regulator has clarified that the FATF move doesn't prevent domestic financial entities from undertaking legitimate trade and business transactions with these jurisdictions, especially when it involves supplies of essential commodities like pulses, sources close to the development told FE.

OVER 80% OF STAND-UP INDIA LOANS SANCTIONED TO WOMEN

**ENTREPRENEURS:** Women entrepreneurs have emerged as the biggest beneficiaries of the government's Stand-Up India scheme with 80.2 per cent of bank loans sanctioned till early December belonging to women-led business units since its launch in April 2016. business of any category or type of insurer. However, reinsurers are prohibited from seeking registration of any other class of insurance business. A composite licence will allow insurers to undertake general and health insurance via a single entity. Sources said LIC would take a call on composite licence and other issues emanating out of passage of the Bill in a comprehensive manner taking into consideration Life Insurance Corporation Act, 1956. The Bill, with proposed amendments to the Insurance Act 1938 and Insurance Regulatory and Development Authority Act, 1999, is expected to be tabled in Parliament in the upcoming Budget session starting next month, sources said. If the proposal for composite insurance registration is passed, there would be change in solvency margin and capital requirement for these companies.

### FINANCIAL TERMINOLOGY/CONCEPTS

#### **COUNTERPARTY CREDIT RISK**

- ❖ Counterparty Credit Risk (CCR) is the risk that the counterparty to a transaction could default before the final settlement of the transaction's cash flows. An economic loss would occur if the transactions or portfolio of transactions with the counterparty has a positive economic value at the time of default. Unlike a firm's exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss: the market value of the transaction can be positive or negative to either counterparty to the transaction.
- ❖ A central counterparty (CCP) is a clearing house that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the future performance of open contracts. A CCP becomes counterparty to trades with market participants through novation, an open offer system, or another legally binding arrangement. For the purposes of the capital framework, a CCP is a financial institution.
- A qualifying central counterparty (QCCP) is an entity that is licensed to operate as a CCP (including a license granted by way of confirming an exemption), and is permitted by the appropriate regulator / overseer to operate as such with respect to the products offered.
- ❖The exposure amount for the purpose of computing for default risk capital charge for counterparty credit risk will be calculated using the Current Exposure Method (CEM). The credit equivalent amount of a market related off-balance sheet transaction calculated using the current exposure method is the sum of current credit exposure and potential future credit exposure of these contracts.
