Seminar Perspective:

As you are aware, today, the corporate world as a whole is in the process of acquiring an ethical conscience. The new and emerging concepts in management like corporate governance, business ethics and corporate social responsibility are some of the expressions through which the emerging ethical instinct in the corporate world is trying to express or embody itself in the corporate life.

In our integral perspective, the ideal of corporate governance is to create a corporate consciousness which leads to self-governance. It is to create a corporate environment in which those who display genuine ethical, social and ecological responsibility, not merely in Director's speech or annual reports but in concrete actions, prosper, progress and become leaders and decision-makers of the corporate world.

To explore a more inward and integral approach to leadership and governance based on the principle of growth of Inner Consciousness.
