# Conference Theme

If there is one sector that is the backbone of acceleration of development in India, it must be infrastructure. In a populous country like ours with increasingly growing levels of consumption and industrialization, the speedy development of infrastructure such as Railways, Power, Ports, Highways, Economic Zones, Smart Cities, among others, is not just a necessity but a pre-requisite for growth.

Although the magnanimity of development of any economy can be judged by its GDP, the level of its bankability can be gauged by its Infrastructure. As a rapidly growing economy in the recent years, India is witnessing a huge demand for creating efficient and bankable Infrastructure as there will be a paradigm shift in the next decade due to vast Urbanization. According to reports 70% of current rural population will be shifting to the cities in search of better lives by the year 2030 which will further create a need for additional sustainable Infrastructure.

To create a national platform for deliberation and knowledge transformation on the subject of infrastructure, The Institute of Cost Accountants of India presents National Conference on Sustainable Infrastructure with emphasis on Railways, Power, Petroleum, Port, Highways and Civil Aviation.

In light of positive market sentiments & inclusive growth, for India's economy to reach another level in becoming an economically stable nation, focus has to shift to improving quality of life of its occupants. However, we believe that quality of life cannot be improved until we have proper Infrastructure which is sustainable & dynamic enough for future resilience. The Institute of Cost Accountants of India believes the current steps taken by the Central & State Governments will ensure optimum utilization of resources thus leading to better employment opportunities in future.

The full-day event will be attended by an illustrious and diverse set of representatives from the various Policy makers, Regulators, Industry bodies, Business Chambers, Research Institutes & Academia.

Discussions among key stakeholders will range around sustainable solutions for a wide range of topics related to infrastructure and with a sharp focus on sustainability at its core.

The National Conference is expected to create a platform of thought leadership and collaboration among industry and government with an objective of building sustainable infrastructure that powers Indian growth.
