In order to make MSMEs globally competitive and create first-generation entrepreneurs, industry body ASSOCHAM and Institute of Cost Accountants of India (ICAI) have come together to set up country’s first virtual centre for development, says ICAI President CMA Dr. A S Durga Prasad in conversation with Neha Jain

W hat was your vision when you joined Institute of Cost Accountants of India (ICAI) as the president and what have been your achievements so far?

I joined at a very challenging time. When I took over, my main goal was to put Cost Accounting Records and Audit rules in order and make them relevant for the dual role that is played by Institute under the Act. Therefore, my first goal was to bring all the related rules and regulations on track. Although there is a major progress, but there are still some more gaps to be addressed. I can claim that, as a team leader, our profession has attained a respectable position.

Next, I wanted to strategise and improve upon the frid of cost and management accounting and strengthen our Institute on the global map. To that in practice we started a number of programmes on cost and management accounting and recently signed a memorandum of understanding (MoU) with Chartered Institute of Management Accountants (CIMA-UK), which is regarded as one of the landmark MoUs in the history of profession of management accounting In India. We had two objectives to fulfill this goal. One was on the audit side which looks at the system assurance and the other to promote and develop cost and management accounting. Apart from organizing a number of programmes we also thought of having a clear strategy to develop this further. In this regard, we organised a cost management week which proved to be very successful. It was attended by more than 2,000 members from all across the country. We then followed it up by a number of webinars by leading experts in the field.

Third, I wanted to get close to Micro, Small and Medium Enterprises (MSMEs). MSMEs cannot afford the luxury of employing or giving assignments to professionals. We thought of laying out a different business model to help them. In this regard, we approached the Ministry of MSMEs to form help desks and in order to make MSMEs globally competitive and create first-generation entrepreneurs, industry body ASSOCHAM and ICAI came together to set up country’s first virtual centre for development of MSMEs. The centre caters as a facilitator to MSMEs by addressing their issue, connecting them to global R&D centres, strengthening industry-academia partnerships, skill up graduation and conducting product/industry specific seminars and workshops. Also, we feel that we have a very important role to play for MSMEs by helping them with funds at the right time through the banking sector. We have proposed a plan to the State Bank of India (SBI) to help them in advising for taxation, cash flow and in matters related to optimisation resources. The move has been well welcomed by SBI and we plan to further propose the same to other banks as well.

Fourth, we play a very important role to make Prime Minister Narendra Modi’s ‘Make in India’ programme successful. We envisage a major role towards achieving the right cost competitiveness. Our interest is to ensure that the industry is given the right help wherever necessary.

What is your take on the changing education system of our country?

In today’s changing environment, students must have a practical bent of mind. They must effectively apply knowledge to achieve a desired goal. We could foresee that coming, hence we emulated the same in our course curriculum in 2008 to give every student the right kind of exposure. If a student wishes to pursue the same in management they need to have six basic skill sets to keep them ready for cost and management accountancy, application, analysis, synthesis and evaluation skills. To analyse a student’s skill we follow a case study approach. We do not follow a question-answer format, instead we ask the students to bring out the new education system must aim at enhancing a student’s skill, comprehension and knowledge rather than just trying to fetch him/her a job.

Can you please elaborate on the MoUs that have recently been signed?

ICAI-Assocham: We have come together to set up the country’s first virtual centre for development of MSMEs. We will cater as a facilitator to MSMEs by providing them technological support and help in financial and tax related matters. The centre aims to reach out to about 30 million MSMEs, educate at least 50,000 MSME units about exports, assist about 20 million budding entrepreneurs, train at least 10 million non-skilled/semi-skilled people across India and assist at least 500 MSMEs to produce innovative products.

ICAI-CIMA: We have recently signed a MoU with the UK-based CIMA, a global leader in management accounting. Based on the MoU, CIMA and Institute of Cost Accountants of India (ICAI) will provide a framework to obtain the CGMA (Chartered Global Management Accountant) and ICAI will recognize CIMA members (CGMAs) by providing them a pathway to enter ICAI membership.

ICAI-IMA: We have entered into a MoU with the Institute of Management Accountants (IMA), USA to enable mutual recognition and cooperation between members of ICAI and IMA. While continuing their longstanding relationship, Institute of Cost Accountants of India and IMA besides mutual recognition of members, have agreed to assist and cooperate in conducting joint research, development of management accounting guidelines and standards as well as hold joint seminars, conferences and activities beneficial to institutes, their members and students.

ICAI-TCS: This one we signed exclusively for students. The purpose for this MoU is community development within students. Students can form communities among themselves and exchange discussions. We are trying to build all this via an e-learning portal. Every portal will have a capability of running a management system. The advantage is that we will have the MoUs linked to TCS and our stuff will also be available to these universities. Till now we have about 4000 power point presentations.

ICAI-Genpact: We signed this MoU for both training and development. ICAI will make available infrastructure and Genpact will hire CAT/CMA students as interns.

ICAI recently organised a summit on Health Care Cost Management. Can you please tell us more about it?

ICAI, recognising the need of affordable healthcare and complexity of cost management in healthcare sector, organised “Asian Summit on Health Care Cost Management” on the theme “Touching Lives through Cost Management” on 12 and 13 March 2015 in New Delhi with the objective to provide necessary assistance healthcare industry in bringing down cost pressure to provide healthcare delivery at affordable cost. The eminent speakers highlighted the importance of providing healthcare at affordable cost to all sections of society. They emphasised on the issue of quality, accessibility and affordability of services. More often than not, the providers criticised overdependence on technology such as costly machinery. But by being committed to cost and productivity upon skill of healthcare professionals and also low budget, we are making it easier for patients to manage the health care cost without compromising the quality of services.

Any message for the youth of today?

The youth, today, needs to work hard and smart. Nothing can be achieved unless they work hard and use the resources smartly and effectively. Competition these days is stiff and they should have self-confidence in themselves. They also have a wide variety of resources that are offered by professional institutes like us. The problem as we see is that people get upset or emotional very easily. This trait might not help them in the long run. The youth of today must not get fickle minded and stick to their chosen career.
