## Paper- 14: STRATEGIC RNANCIALMANAGEMENT

## Paper- 14: STRATEGIC RNANCIALMANAGEMENT

## Full Marks: 100

Time Allowed: 3 Hours
This pa per contains two sections $\mathbf{A}$ and $\mathbf{B}$. Section $\mathbf{A}$ is compulsory a nd conta ins questionNo. 1 for 20 marks. Section B conta ins question Nos. 2 to 8, each camying 16 marks.

Answer a ny five questions from Section B.

Section - A [20 Marks]

1. Choose the comect option among four altemative answer. (1 mark for comect choice, 1 mark forjustific ation.)
$[10 \times 2=20$ ]
(i) Buenos Aires Limited has 10 lakh equity shares outstanding at the beginning of the year 2013. The current market price per share is ₹ 150 . The current market price per share is ₹ 150. The company is contemplating a dividend of $₹ 9$ per share. The rate of capitalization, appropriate to its risk class, is $\mathbf{1 0 \%}$.

Based on MM approach, calculate the market price of the share of the company when Dividend is dec lared
(a) ₹ 156
(b) ₹ 166
(c) ₹ 176
(d) ₹ 186
(ii) Sea Rock Ltd. Has an excess cash of $₹ \mathbf{3 0 , 0 0 , 0 0 0}$ which it wants to invest in short-term marketable securities.

Expenses resulting to investment will be ₹ 45,000 . The securities invested will have an annual yield of $10 \%$. The company seeks your advice as to the period of investments so as to eam a pre-tax income of 6\%.
(a) 5 months
(b) 6 months
(c) 9 months
(d) $\mathbf{1 2}$ months
(iii) Rishav holds two equity shares $A$ and $B$ in equal proportion with the following risk and retum:
$E\left(R_{A}\right)=26 \%$
$\sigma_{\mathrm{A}}=20 \%$
$E\left(R_{B}\right)=22 \%$
$\sigma_{\mathrm{B}}=24 \%$

The returns of these sec urities have a positive correlation of 0.7 . Calc ulate the portfolio retum and risk.
(a) $\mathbf{2 5 \%}$ (expected retum), 29\% risk
(b) $\mathbf{2 4 \%}$ (expected retum), $\mathbf{3 0 \%}$ risk
(c) $\mathbf{2 4 \%}$ (expected retum), 20.30\% risk
(d) $\mathbf{2 5 \%}$ (expected retum), $\mathbf{2 0 . 3 0 \%}$ risk
(iv) Consider the following quotes:

Spot $($ Euro/ Pound $)=1.3904-1.3908$
Spot $($ Pound $/$ NZ $\$$ ) $=0.5020-0.5040$
What will be the possible \% spread on the cross rate between Euro and NZ\$?
(a) 0.40
(b) 0.39
(c) 0.41
(d) 0.43
(v) Following information is available regarding a mutual fund:
Retum 13

Risk ( $\sigma$ ) 16
Beta ( $\beta$ ) 0.90
Risk free rate $\quad 10$
Calculate Sharpe ratio.
(a) 0.18
(b) 0.19
(c) 0.20
(d) 0.21
(vi) The risk free retum is $\mathbf{8}$ per cent and the retum on market portfolio is $\mathbf{1 4}$ per cent If the last dividend on Share ' $A$ ' was ` 2.00 and assuming that its dividend and eamings are expected to grow at the constant rate of 5 per cent The beta of share ' $A$ ' is $\mathbf{2 . 5 0}$. Compute the intrinsic value of share $A$.
(a) ₹ 10.67
(b) ₹ 11.67
(c) ₹ 12.67
(d) ₹ 13.67

## MIP_Final_Syllabus 2016_Dec 19_Set 2

(vii) I What is the price of a European put option on a non-dividend-paying stock when the stock price is ₹ 69 , the strike price is ₹ 70 , the risk-free interest rate is $5 \%$ per annum, the volatility is $35 \%$ per annum, and the time to maturity is six months?
(a) 3.40
(b) 6.40
(c) 4.50
(d) 5.40
(vili) A characteristic line is formed by regressing
(a) Stock prices with market index
(b) Beta with required rate of retum
(c) Standard deviation with required rate of retum
(d) Stock returns with market retums
(ix) Beta of a security measures its
(a) Diversifiable risk
(b) Market risk
(c) Financial risk
(d) None of the above
(x) The February Pepper future traded at 16.80, the February 18.00 call at 0.45 and the February $\mathbf{1 8 . 0 0}$ put at $\mathbf{0 . 5 8}$. Both are options on the February future. Find out whether any arbitrage opportunity exists.
(a) Arbitrage opportunity exists
(b) Does not exists

> Section - B

Answer any fivequestions.
$[16 \times 5=80]$
2. (a) A firm has an investment proposal, requiring an outlay of $₹ 80,000$. The investment proposal is expected to have two years economic life with no salvage value. In year 1, there is a $\mathbf{0 . 4}$ probability that cash inflow after tax will be ₹ $\mathbf{5 0 , 0 0 0}$ and 0.6 probability that cash inflow after tax will be ₹ 60,000 . The probability assigned to cash inflow after tax for the year 2 are as follows:

| The cash inflow year 1 | ₹ 50,000 |  | ₹60,000 |  |
| :--- | :--- | :--- | :--- | :--- |
| The cash inflow year 2 | Probability |  | Probability |  |
|  | ₹24,000 | 0.2 | ₹40,000 | 0.4 |
|  | ₹32,000 | 0.3 | ₹50,000 | 0.5 |
|  | ₹44,000 | 0.5 | ₹60,000 | 0.1 |

## MIP_Final_Syllabus 2016_Dec 19_Set 2

The firm uses a 8\% disc ount rate for this type of investment
Required:
(i) Construct a decision tree for the proposed investment project and calculate the expected net present value (NPV).
(ii) What net present value will the project yield, if worst outcome is realized? What is the probability of occurrence of this NPV?
(iii) What will be the best outcome and the probability of that occurrence?
(iv) Will the project be accepted?
(Note: 8\% disc ount factor 1 year 0.9259; 2 year 0.8573 )
(b) A Production Manager is planning to produce a new product and he wishes to estimate the raw material requirement for that new product On the basis of usage for a similar product introduced previously, he has developed a frequency distribution of demand in tonnes per day for a two month period. Use this data to simulate the raw material usage requirements for $\mathbf{7}$ days. Compute also the expected value and comment on the result

| Demand Tonnes/ day | Frequency No. of days |
| :---: | :---: |
| 10 | 6 |
| 11 | 18 |
| 12 | 15 |
| 13 | 12 |
| 14 | 6 |
| 15 | 3 |

Random Number: 27, 13, 80, 10, 54, 60, 49.
3. (a) Equi-Stable, is a portfolio model wherein $\mathbf{2 0 \%}$ of Fund Value is invested in Fixed Income Bearing Instruments. The Balance of $\mathbf{8 0}$ \% is divided among Old Industry Stock (Iron and Steel), Automotive Industry Stock, Information Technology Stocks, Infrastructure Company Stocks and Financial Sewvices Sector in the ratio of 4:2:6:3:5.

Three mutual funds $X, Y$ and $Z$, offer a Fund Scheme based on the Equi-Stable Portfolio Model. The actual retum on Equi-Stable portfolios of each of the three funds for the past 3 years is as follows -

| Year | 1 | 2 | 3 |
| :---: | :---: | :---: | :---: |
| Portfolio $X$ | $17.35 \%$ | $18.70 \%$ | $21.60 \%$ |
| Portfolio $Y$ | $17.20 \%$ | $18.25 \%$ | $22.15 \%$ |
| Portfolio Z | $17.10 \%$ | $18.60 \%$ | $22.00 \%$ |

Beta factor of the Equi-Stable portfolio is measured at 1. 35. Retum on Market Portfolio indicate that ₹ 1000 invested will fetch ₹ 153 in an year (including capital appreciation and dividend yield). RBI Bonds, guaranteed by the Central Govemment yields 4.50\%.

Rate the fund managers of $X, Y$ and $Z$

## MIP_Final_Syllabus 2016_Dec 19_Set 2

(b) A mutual fund that had a net asset value of ₹ 30 at the beginning of month and made income and capital gain distribution of $₹ 0.0375$ and $₹ 0.03$ per share respectively during the month, and then ended the month with a net asset value of ₹30.06. Calculate monthly retum.
4. (a) The Beta Co-effic ient of Moon Light Ltd is $\mathbf{1 . 4 0}$. The Company has been maintaining $\mathbf{8 \%}$ rate of growth in dividends and eamings. The last dividend paid was ₹ 4 per share. Retum on Govemment Sec urities is $\mathbf{1 2 \%}$. Retum on Market Portfolio is $\mathbf{1 8 \%}$. The Current Market Price of one share of Moon Light Ltd is ₹32.00.
Required -

1. What will be the equilibrium price per share of Moon Light Ltd?
2. Would you advise purchasing the share?
(b) Sec urities $X$ and $Y$ have standard deviations of $3 \%$ and $9 \%$. Nitin is having a surplus of ₹20 Lakhs for investment in these two securities. How much should he invest in each of these securities to minimize risk, if the comelation co-efficient for $X$ and $Y$ is $-(a)-1$; (b) $\mathbf{- 0 . 3 0}$; (c) 0 ; (d) 0.60 8
3. (a) Shares of Sandeep Ltd are being quoted at ₹ 600 . 3-Months Futures Contract Rate is ₹ 636 per share for a lot size of 500 shares. If the Sandeep Ltd is not expected to distribute any dividend in the interim, risk free rate of retum is $9 \%$, what is the recommended course of action for a trader in shares?

If the $\mathbf{3}$-Months Futures C ontract Rate is $₹ 600$, what should be the action?
(b) Ascertain the value of Options expining one year later, for the following sec unities -

1. $A B C \operatorname{ltd}(A B C L)$ is quoted at $₹ 110$. At the end of 3 Months, the stock price will either be $₹ 100$ or $₹ 150$. Exercise price is $₹ 120$.
2. 3-Month Options on MN Ltd (MNL) camy an exercise price of ₹ 350 . Stock Price is expected to be ₹ 250 or $₹ 450$. Presently the shares are traded for $₹ 380$

Risk Free Rate may be assumed at 12\% for c ontinuous disc ounting.
6. (a) DS Inc. is considering a new plan in Netherlands. The plan will cost $\mathbf{2 6}$ Million Guilders. Incremental Cash Hows are expected to be 3 Million Guilders per year for the first 3 years. 4 Million Guilders for the next 3, 5 Million Guilders in Years 7 to 9, and 6 Million Guilders in years 10 through 19, after which the project will terminate with no residual value.

The present exchange rate is $\mathbf{1 . 9 0}$ Guilders per dollar. The required rate of retum on repatriated dollar is $\mathbf{1 6 \%}$.
(a) If the exchange rate states at 1.90 , what is the project NPV?

## MIP_Final_Syllabus 2016_Dec 19_Set 2

(b) If the guider appreciates to 1.84 for years 1 - 3, to $\mathbf{1 . 7 8}$ for years 4-6,1.72 for years 7-9, and to 1.65 for years $\mathbf{1 0 - 1 9}$, what happens to the NPV?
(b) You have the following quotes from Bank A and Bank B -

|  | Bank A |  | Bank B |  |
| :--- | :--- | :--- | :--- | :--- |
| Spot | USD/CHF | $1.4650 / 55$ | USD/CHF | $1.4653 / 60$ |
| 3 Months |  | $5 / 10$ |  |  |
| 6 Months |  | $10 / 15$ |  |  |
| Spot | GBP/ USD | $1.7645 / 60$ | GBP / USD | $1.7640 / 50$ |
| 3 Months |  | $25 / 20$ |  |  |
| 6 Months | $35 / 25$ |  |  |  |

Calculate -
(a) How much minimum C HF amount you have to pay for 1 Million GBP spot?
(b) Considering the quotes from Bank A only, for GBP / CHF, what are the Implied Swap Points for spot over 3 months?
7. (a) Your company is considering to acquire an additional computer to supplement its time-share computer services to its clients. It has two options:
(i) To purchase the computer for $₹ 22$ lakhs.
(ii) To lease the computer for three years from a leasing company for ₹ 5 lakhs as annual lease rent plus $10 \%$ of gross time-share senvice revenue. The agreement also requires an additional payment of $₹ 6$ lakhs at the end of the third year. Lease rents are payable at the year-end, and the computer reverts to the lessor after the contract period.

The company estimates that the computer under review will be worth ₹ 10 lakhs at the end of third year.

Forec ast Revenues are:

| Year | 1 | 2 | 3 |
| :--- | ---: | ---: | ---: |
| Amount (₹ in lakhs) | 22.5 | 25 | 27.5 |

Annual operating costs exc luding deprec iation/ lease rent of computer are estimated at`9 lakhs with an additional ₹ 1 lakh for start up and training costs at the beginning of the first year. These costs are to be bome by the lessee. Your company will borrow at $16 \%$ interest to finance the acquisition of the computer. Repayments are to be made according to the following schedule:

| Year end | 1 | 2 | 3 |
| :--- | ---: | ---: | ---: |
| Principal (₹'000) | 500 | 850 | $\mathbf{8 5 0}$ |
| Interest ( $₹^{\prime} 000$ ) | 352 | 272 | 136 |

The company uses straight line method (SLM) to depreciate its assets and pays $\mathbf{5 0 \%}$ tax on its income. The management approaches you to advice. Which altemative would be recommended and why?

Note: The PV factor at 8\% and 16\% rates of discount are:

| Year | 1 | 2 | 3 |
| :--- | :---: | :---: | :---: |
| $8 \%$ | 0.926 | 0.857 | 0.794 |
| $16 \%$ | 0.862 | 0.743 | 0.641 |

(b) You can choose to invest in two shares, $A$ and $B$.

|  | $E(R)$ | $(\sigma)$ |
| :--- | :--- | :--- |
| A | $10 \%$ | $10 \%$ |
| B | $15 \%$ | $20 \%$ |

The comelation between the returns on the two shares is 0.15 . Your portfolio consists of $100 A$ shares and $50 B$ shares. The current price of $A$ is 50 and the cument price of $B$ is 100. Calculate the expected retum and standard deviation of the portfolio.
8. Write short note on (any four)
(a) Dividend Payout Ratio
(b) DuPont Model
(c) Depository Receipts
(d) Warrants
(e) Collateralised borrowing and Lending Obligation (CBLO)
