## Paper 10-COST \& MANAGEMENT ACCOUNTING AND FINANCIAL MANAGEMENT

## PAPER 10-COST \& MANAGEMENT ACCOUNTING AND FINANCIAL MANAGEMENT

Part A - (Cost and Management Accounting)
Section - I

1. Answer the following questions:
(a) Choose the correct answer from the given four alternatives: $[1 \times 6=6]$
(i) Profit volume ratio establishes the relationship between...
a. Contribution and profit
b. Fixed cost and contribution
c. Profit and sales
d. Contribution and sales value
(ii) A desire to achieve a particular goal with pursuit of that goal is called:
a. motivation
b. goal congruence
c. effort
d. autonomy
(iii) The scare factors are also known as
a. Key factor
b. Abnormal factor
c. Linking factor
d. None of the above
(iv) A budgeting process which demands each manager to justify his entire budget in detail from beginning is:
a. Functional budget
b. Master budget
c. Zero base budgeting
d. None of the above
(v) The sub-variance of material usage variance, known as Material mix variance is measured as
a. Total standard cost - Total actual cost
b. Standard cost of revised standard mix - Standard cost of actual mix
c. (Standard unit price - Actual unit price) * Actual quantity used
d. (Standard quantity - Actual quantity) * Unit standard price
(vi) Another name for the learning curve is a(n)
a. experience curve
b. exponential curve
c. growth curve
d. production curve

Ans: 1(a)

| i | ii | iii | iv | v | vi |
| :--- | :--- | :--- | :--- | :--- | :--- |
| d | a | a | c | b | a |

(b) Match the statement in Column I with the most appropriate statement in Column II:
[ $1 \times 4=4$ ]

| Column I | Column II |
| :--- | :--- |
| (i) Differential Cost | (A) Division of total cost into Fixed and <br> Variable |
| (ii) Opportunity Cost | (B) Future cost |
| (iii) Marginal Cost | (C) Cost Cannot be controlled |
| (iv) Sunk Cost | (D) Cost can be controlled |

Ans: 1(b)

| Column I | Column II |
| :--- | :--- |
| (i) Differential Cost | (B) Future cost |
| (ii) Opportunity Cost | (D) Cost can be controlled |
| (iii) Marginal Cost | (A) Division of total cost into Fixed and Variable |
| (iv) Sunk Cost | (C) Cost Cannot be controlled |

(c) State whether the following statements are True' or 'False':
(i) Standard costs are used for external reporting.
(ii) A high $P / V$ ratio for a business indicates that a slight decrease in sales volume results in higher profits.
(iii) Zero based budgeting involves identification of decision units.
(iv) Learning curve is a cost reduction technique.

Ans: 1(c)
i. False,
ii. False,
iii. True,
iv. False

## Section-II

(Answer any three Question from Q. No 2, 3, 4 and 5. Each Question carries 12 Marks.)
2. (a) The following data relates to a manufacturing company:

Plant Capacity $=4,00,000$ units per annum. Present Utilization $=$ $40 \%$ Actual for the year 2014 were:

Selling price $=$ ₹ 50 per unit, Material cost = ₹ 20 per unit,
Variable Manufacturing costs = ₹15 per unit and Fixed cost = ₹ $27,00,000$.
In order to improve capacity utilization, the following proposal is considered: Reduce Selling price by $10 \%$ and spend additionally ₹ $3,00,000$ in Sales
Promotion.
How many units should be produced and sold in order to increase profit by $₹ 8,00,000$ per year?
(b) The following information is available for the first and second quarter of the year for Pankaj limited:

| Quarter | Production (in units) | Semi- variable Cost |
| :--- | :---: | :---: |
| Quarter I | $\mathbf{3 6 , 0 0 0}$ | $₹ \mathbf{2 , 8 0 , 0 0 0}$ |
| Quarter II | $\mathbf{4 2 , 0 0 0}$ | $₹ \mathbf{3 , 1 0 , 0 0 0}$ |
| You are required to calculate the semi variable Cost and calculate Total |  |  |
| Fixed Cost and Variable cost per unit. |  |  | [ $8+4=12$ ]

Ans 2(a):
A. Let the desired sales (in units) $=x$.
B. Revised SP $(₹ 50$ less $10 \%)=(50-5)=₹ 45 /$ unit
C. Total Sales $(A \times B)=45 x$
D. Less: Variable Cost:

Material cost @ ₹20 = 20x

Variable Mfg. cost @ ₹ 15 = 15x 35x
E. Revised Contribution $(C)-(D)=10 x$
F. Less: Total Fixed Costs:

Present Fixed cost ₹27,00,000

Addl. Promotion Exp. $₹ 3,00,000$
₹ $30,00,000$
G. Profit $(E-F)=10 x-30,00,000$
$10 x-30,00,000=₹ 5,00,000$
(Desired Profit) See note ii below.
$10 \mathrm{x}=₹ 35,00,000$
or $x=3,50,000$ units.

Ans 2(b):
(1) Variable Cost per Unit (using Level of Activity Method)
$\frac{\text { Difference in Costs }}{\text { Difference in Prodn Quantity }}$

$$
\begin{gathered}
\frac{` 3,10,000-` 2,80,000}{(42,000-36,000) \text { units }} \\
=₹ 5 \text { per unit. }
\end{gathered}
$$

(2) Fixed Cost $=$ Total Costs Less Variable Costs (estimated using 36,000 units output level data)

$$
\begin{aligned}
& =₹ 2,80,000-(36,000 \text { units } \times ₹ 5) \\
& =₹ 1,00,000
\end{aligned}
$$

[Note: 42,000 units' level can also be taken here.]
3. (a) The following information are provided to you for a month in respect of a workshop:
(i) Overhead cost variance - ₹ 1,400 adverse (ii) Overhead volume variance

- 1,000 adverse (iii) Budgeted hours -

1,200 hrs.
(iv) Budgeted overhead - ₹ 6,000
(v) Actual rate of recovery of overheads - ₹8 per hour

## You are required to compute:

(1) Overhead expenditure variance
(2) Actual overheads incurred
(3) Actual hours for actual production
(b) Gemini chemicals Ltd. Provides the following information from its records:

| Material | Quantity (kgs) | Rate/kg (₹) |
| :---: | :---: | :---: |
| A | $\mathbf{8}$ | $\mathbf{6}$ |
| B | $\mathbf{4}$ | $\mathbf{4}$ |
|  | $\mathbf{1 2}$ |  |

During April 2023, 1,000 kgs of GEMCO were produced. The actual consumption of material was as under:

| Material | Quantity (kgs) | Rate/kg (₹) |
| :---: | :---: | :---: |
| A | $\mathbf{7 6 0}$ | $\mathbf{7}$ |
| B | $\mathbf{5 0 0}$ | $\mathbf{5}$ |
|  | $\mathbf{1 , 2 6 0}$ |  |

Calculate: i. Material cost variance
ii. Material Price variance

Ans: 3(a) Working Notes:
Standard Rate of recovery of overhead rate
$=\mathrm{BOH} / \mathrm{BH}=₹ 6,000 / 1,200 \mathrm{hrs}$.
= ₹5
(1) Overhead expenditure variance $=\mathrm{BOH}-\mathrm{AOH}$

$$
\begin{aligned}
& =₹ 6,000-₹ 6,400 \\
& =400 \text { (Adv) }
\end{aligned}
$$

Reconciliation of overheads expenditure variance
Overheads cost variance $=$ Exp. Variance + Volume variance

$$
₹ 1,400 \text { (Adv) }=₹ 400 \text { (Adv) }+₹ 1,000 \text { (Adv) }
$$

(2) Actual overheads incurred
$\mathrm{SOH}=1000 \mathrm{hrs}$ at ₹ $5=₹ 5,000$
$\mathrm{O} / \mathrm{H}$ Cost Var. $=\mathrm{SOH}-\mathrm{AOH}$
$₹ 1400 \mathrm{~A}=₹ 5000-\mathrm{AOH}$
-₹ $1400=₹ 5000-\mathrm{AOH}$
$\mathrm{AOH}=5000+1400$
$=₹ 6,400$
(3) Actual hours for Actual production (AH)
= Actual overheads incurred/Actual rate of recovery of overheads
= ₹ $6,400 / ₹ 8$
$=800$ hours (AH)

## Ans 3(b) : Basic Calculations:

Calculation of standard input for actual production (1,000 kgs.)
Standard output
10 kgs
$1,000 \mathrm{kgs}$
Standard input $=12 / 10 \times 1,000=1,200 \mathrm{kgs}$.

1. Standard Quantity for actual production:

Material - A $=8 / 12 \times 1,200 \mathrm{kgs}=800 \mathrm{kgs}$.
Material $-B=4 / 12 \times 1,200 \mathrm{kgs}=400 \mathrm{kgs}$.
2. Calculation of Revised Standard Quantity Actual Quantity at Standard mix) Material $-\mathrm{A}=8 / 12 \times 1,260 \mathrm{kgs}=840 \mathrm{kgs}$.

Material $-B=4 / 12 \times 1,260 \mathrm{kgs}=420 \mathrm{kgs}$.

Relevant cost details for computation of Material variances:

| Particulars | Material - A | Material - B |
| :--- | :---: | :---: |
| Actual Price (AP) | $₹ 7 / \mathrm{kg}$ | $₹ 5 / \mathrm{kg}$ |
| Actual Quantity (AQ) | 760 kgs | 500 kgs |
| Standard Price (SP) | $₹ 6 / \mathrm{kg}$ | $₹ 4 / \mathrm{kg}$ |
| Standard Quantity (See Note - 2) | 800 kgs | 400 kgs |
| Revised Standard Quantity (RSQ) <br> (See Note - 3) | 840 kgs | 420 kgs |

| Particulars | $\mathrm{M} 1(\mathrm{AP} \times$ <br> $\mathrm{AQ})$ | $\mathrm{M} 2(\mathrm{SP} \times \mathrm{AO})$ | $\mathrm{M} 3(\mathrm{SP} \times \mathrm{RSQ})$ | $\mathrm{M} 4(\mathrm{SP} \times \mathrm{SQ})$ |
| :--- | :--- | :--- | :--- | :--- |
| Material-A | $7 \times 760=$ <br> 5,320 | $6 \times 760=4,560$ | $6 \times 840=5,040$ | $6 \times 800=$ <br> 4,800 |
| Material- B | $5 \times 500=$ <br> 2,500 | $4 \times 500=2,000$ | $4 \times 420=1,680$ | $4 \times 400$ <br> $=1,600$ |

| i. | Material Cost Variance | $=\mathrm{M} 4-\mathrm{M} 1$ |
| ---: | :--- | :--- |
|  | Material $-\mathrm{A}=₹ 4,800-$ <br> ₹5,320 | $=₹ 520$ (A) |
|  | Material - B = ₹1,600 - ₹2,500 | $=₹ 900$ (A) |
|  |  | $₹ 1,420$ (A) |
| ii. | Material Price variance | $=\mathrm{M} 2-\mathrm{M} 1$ |
|  | Material - A = ₹4,560 -₹5,320 | $=₹ 760$ (A) |
|  | Material - B = ₹2,000 - ₹2,500 | $=₹ 500$ (A) |
|  |  | $₹ 1,260$ (A) |

4. (a) From the following data, prepare a Production Budget for ABC Co. Ltd., for the six months' period ending on 30th June, 2023. Stocks for the budgeted period:

|  |  | (in units) |  |
| :---: | :---: | :---: | :---: |
| Product | As on 01 January, 2023 | As on 30 June, 2023 |  |
| A | $\mathbf{6 , 0 0 0}$ | $\mathbf{1 0 , 0 0 0}$ |  |
| B | $\mathbf{9 , 0 0 0}$ | $\mathbf{8 , 0 0 0}$ |  |
| C | $\mathbf{1 2 , 0 0 0}$ | $\mathbf{1 7 , 5 0 0}$ |  |

Other relevant data:

| Product | Normal loss in production | Requirement to fulfil sales <br> programme (units) |
| :---: | :---: | :---: |
| A | $\mathbf{4 \%}$ | $\mathbf{6 0 , 0 0 0}$ |
| B | $\mathbf{2 \%}$ | $\mathbf{5 0 , 0 0 0}$ |
| C | $\mathbf{5 \%}$ | $\mathbf{8 0 , 0 0 0}$ |

(b) XYZ Ltd., which has a system of assessment of Divisional Performance on the basis of residual income, has two Divisions, Alfa and Beta. Alfa has annual capacity to manufacture $15,00,000$ units of a special component that it sells to outside customers but has idle capacity. The budgeted residual income of Beta is`
$1,20,00,000$ and that of Alfa is ₹ $1,00,00,000$.

Other relevant details extracted from the budget for the current year are as follows:
Particulars of Alfa:
Sale (Outside customers)
Variable cost per unit
Divisional fixed cost
12,00,000 units @ ₹ 180 per unit
₹ 160

Capital employed
₹ $\mathbf{8 0 , 0 0 , 0 0 0}$

Cost of Capital
₹ $\mathbf{7 , 5 0 , 0 0 , 0 0 0}$

Beta has received a special order for which it requires components similar to the ones made by Alfa. Fully aware of the idle capacity of Alfa, Beta has asked Alfa to quote for manufacture and supply of $3,00,000$ units of the components with a slight modification during final processing. Alfa and Beta agreed that this will involve an extra variable cost to Alfa amounting to ₹ 5 per unit.

Calculate the transfer price, which Alfa should quote to Beta to achieve its budgeted residual income.
$[6+6=12]$

Ans: 4(a) Production budget for 6 months ending on 30 June 2023

| Details | Products (units) |  |  |
| :--- | :---: | :---: | :---: |
|  | A | B | C |
| Budgeted sales | 60000 | 50000 | 80000 |
| Add: Closing stock | 10000 | 8000 | 17500 |
| Total required stock | 70000 | 58000 | 97500 |
| Less: Opening stock | 6000 | 9000 | 12000 |
| Net production | 64000 | 49000 | 85500 |
| Add: Normal loss in production = Net | $(4 \%)$ | $(2 \%)$ | $(5 \%)$ |
| production $\times$ Normal Loss \%/(100 - Normal <br> Loss \%) | 2666.67 | 1000.00 | 4500.00 |
| Gross production | 66666.67 | 50000.00 | 90000.00 |

Ans 4(b) Contribution required for budgeted Residual Income of Alfa:

|  | $₹$ |
| :--- | :--- |
| Fixed Cost | 8000000 |
| Capital Charge on $75000000 \times 12 \%$ | 9000000 |
| Residual Income | 10000000 |
| Total Contribution required | 27000000 |

|  | $₹$ | $₹$ |
| :--- | ---: | ---: |
| Contribution required from <br> existing units | $1200000 \times 20$ | 24000000 |
| Contribution required on <br> 300000 units | $27000000-24000000$ | 3000000 |
| Required contribution per <br> unit | $3000000 / 300000$ | 10 |
| Variable cost per unit <br> (existing) |  | 160 |
| Increase in variable cost <br> per unit | $10+160+5$ | 5 |
| Transfer Price per unit |  | 175 |

5. Write short note on any three of the following:
[ $4 \times 3=12]$
(a) Key Factor
(b) Steps involved in Zero Based Budgeting
(c) State the general principles of Standard Costing.
(d) Profit Variance

Ans: 5(a) Key Factor:

Key factor is nothing but a limiting factor or deterring factor on sales volume, production, labour, materials and so on. The limiting factor normally differs from one to another Volume of sales- the limiting factor is that production of required number of articles Volume of production- the limiting factors are as follows in adequate supply of raw materials, labour, inability to sell the produced articles and so on The limiting factors are studied in the lights of the contribution. The limiting factor is bearing the inverse relationship with the volume of contribution. To study the worth of the business proposals among the limiting factors, the contribution is considered as a parameter to rank them one after another. Profitability=Contribution/Key Factor

5(b) Steps involved in Zero Based Budgeting:
The process of Zero-Base Budgeting involves the following steps:
(i) Identification of 'Decision units '. Decision unit refers to a tangible activity or group of activities for which a single manager has the responsibility for successful performance
(ii) Preparation and development of decision packages. Preparation of decision packages are a set of documents which identify and describe activities of the unit in such a way that the management can evaluate and rank them against others competing for resources (limited) and decide whether to approve or disapprove.
(iii) Ranking of priority included in decision packages for various decision units or of various decision packages for the same decision unit.
(iv) Approval and Funding. Funding involves the allocation of available resources of the organisation to various decision units keeping in mind the alternative which has been selected and approved through ranking process.

5(c) The general principles of Standard Costing:
1 Predetermination of technical data related to production. i.e., details of materials and labour operations required for each product, the quantum of inevitable losses, efficiencies expected, level of activity, etc.
2 Predetermination of standard costs in full details under each element of cost, viz., labour, material and overhead.
3 Comparison of the actual performance and costs with the standards and working out the variances, i.e., the differences between the actuals and the standards.
4 Analysis of the variances in order to determine the reasons for deviations of actuals from the standards.
5 Presentation of information to the appropriate level of management to enable suitable action (remedial measures or revision of the standards) being taken

5(d) Profit Variance:
This represents the difference between budgeted profit and actual profit.
The formula is: Profit Variance $=$ Budgeted Profit - Actual Profit
(i) Price Variance: It shall be equal to the price variance calculated with reference to turnover. It represents the difference of standard and actual profit on actual volume of sales.
The formula is: Price Variance $=$ Standard Profit - Actual Profit or $=$ Actual Quantity Sold $\times$ (Standard Profit per unit - Actual Profit per unit)
(ii) Volume Variance: The profit at the standard rate on the difference between the standard and the actual volume of sales would be the amount of volume variance.
The formula is: Volume Variance $=$ Budgeted Profit - Standard profit or $=$ Standard
Rate of Profit $\times$ (Budgeted Quantity - Actual Quantity)

## Part B - (Financial Management) Section - III

6. Answer the following questions:
(a) Choose the correct answer from the given four alternatives:
(i) In a Balance Sheet, equity and fixed assets are expressed in terms of them
a. Market Value
b. Cost
c. Book Value
d. Replacement Value
(ii) The measure of leverage is:
a. PAT/Equity
b. Equity/Debt
c. Total Assets/Equity
d. Total Debt/Equity
(iii) If the RBI intends to reduce the supply of money as part of an antiinflation policy, it might
a. Lower Bank rate
b. Increase Cash Reserve Ratio
c. Buy Govt. securities in open market
d. Decrease Statutory Liquidy Ratio
(iv) Purchase of Machinery by issue of shares should be $\qquad$ from Cash Flow statement.
a. included
b. excluded
c. included with value 0
d. None of the above.
(v) In mutually exclusive projects, project which is selected for comparison with others must have
a. higher net present value
b. lower net present value
c. zero net present value
d. none of above
(vi) The dividend-payout ratio is equal to
a. the dividend yield plus the capital gains yield.
b. dividends per share divided by earnings per share.
c. dividends per share divided by par value per share.
d. dividends per share divided by current price per share.

Ans: 6(a)

| i | ii | iii | iv | v | vi |
| :--- | :--- | :--- | :--- | :--- | :--- |
| c | c | b | b | a | b |

(b) Match the statement in Column I with appropriate statement in Column II
[1x4=4]

| Column I | Column II |
| :--- | :--- |
| (i) Common size analysis | (A) Earnings Yield |
| (ii) Earnings/Stock Price | (B) A technique uses in comparative analysis <br> of financial statement |
| (iii) DOL | (C) Explains irrelevance of Dividend Policy |
| (iv) MM Model | (D) Contribution/EBIT |

Ans: 6(b)

| Column I | Column II |
| :--- | :--- |
| (i) Common size analysis | (B) A technique uses in comparative analysis of <br> financial statement |
| (ii) Earnings/Stock Price | (A) Earnings Yield |
| (iii) DOL | (D) Contribution/EBIT |
| (iv) MM Model | (C) Explains irrelevance of Dividend Policy |

(c) State whether the following statements are True or False: [1x4=4]
(i) A goal or objective is a necessary first step for effective financial management.
(ii) An aggressive working capital policy would have low liquidity, higher risk, and higher profitability potential.
(iii) If a company has no fixed costs, its DOL equals 1.
(iv) According to the NOI approach to valuation, the total value of the firm is affected by changes in its capital structure.

Ans: 6(c)
(i)True,
(ii)True,
(iii)True,
(iv)False

## Section - IV

(Answer any three Question from Q. No 7, 8, 9 and 10. Each Question carries 12 Marks.)
7. (a) From the following Balance Sheet and additional information, you are required to calculate:
(i) Return on Total Resources
(ii) Return on Capital Employed
(iii) Return on Shareholders' Fund

| Particulars | $₹$ | Particulars | ₹ |
| :--- | ---: | :---: | :---: |
| Share Capital(₹10) | $\mathbf{8 , 0 0 , 0 0 0}$ | Fixed Assets | $\mathbf{1 0 , 0 0 , 0 0 0}$ |
| Reserves | $\mathbf{2 , 0 0 , 0 0 0}$ | Current Assets | $\mathbf{3 , 6 0 , 0 0 0}$ |
| $\mathbf{8 \%}$ Debentures | $\mathbf{2 , 0 0 , 0 0 0}$ |  |  |
| Creditors | $\mathbf{1 , 6 0 , 0 0 0}$ |  |  |
|  | $\mathbf{1 , 3 6 0 , 0 0 0}$ |  | $\mathbf{1 3 , 6 0 , 0 0 0}$ |

Net operating profit before tax is ₹2,80,000. Assume tax rate at $\mathbf{5 0 \%}$.
Dividend declared amounts to ₹ $1,20,000 /-$
(b) ABC Ltd. Company's Comparative Balance Sheet for 2023 and the Company's Income Statement for the year are as follows:

ABC Ltd.
Comparative Balance Sheet March 31, 2023 and 2022
(₹ in crores)

| Particulars | 2023 |  |  | 2022 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
| Shareholder's funds |  |  |  |  |  |  |
| Share Capital |  | 140 |  |  | 140 |  |
| Retained earnings |  | 110 | 250 |  | 92 | 232 |
| Loan funds |  |  |  |  |  |  |
| Bonus payable |  |  | 135 |  |  | 40 |
| Total |  |  | 385 |  |  | 272 |
| Application of funds |  |  |  |  |  |  |
| Fixed Assets |  |  |  |  |  |  |
| Plant and Equipment |  | 430 |  |  | 309 |  |
| Less: Accumulated depreciation |  | (218) | 212 |  | (194) | 115 |
| Investments |  |  | 60 |  |  | 75 |
| Current Assets |  |  |  |  |  |  |
| Inventory | 205 |  |  | 160 |  |  |
| Accounts receivable | 180 |  |  | 270 |  |  |
| Pre-paid expenses | 17 |  |  | 20 |  |  |
| Cash | 26 | 428 |  | 10 | 460 |  |
| Less : Current liabilities and provisions |  |  |  |  |  |  |
| Accounts payable | 230 |  |  | 310 |  |  |
| Accrued liabilities | 70 |  |  | 60 |  |  |
| Deferred income-tax <br> provision | 15 | 315 | 113 | 8 | 378 | 82 |
| Total |  |  | 385 |  |  | 272 |

ABC Ltd.
Income Statement for the year ended March 31, 2023
(₹ in crores)

| Sales | $\mathbf{1 , 0 0 0}$ |
| :--- | ---: |
| Less : Cost of goods sold | $\mathbf{5 3 0}$ |
| Gross margin | $\mathbf{4 7 0}$ |
| Less : Operating expenses | $\mathbf{3 5 2}$ |
| Net operating income | $\mathbf{1 1 8}$ |
| Non-operating items: |  |
| Loss on sale of equipment | $\mathbf{( 4 )}$ |
| Income before taxes | $\mathbf{1 1 4}$ |
| Less : Income-taxes $\quad$ Net Income | $\mathbf{4 8}$ |
|  | $\mathbf{6 6}$ |

Additional information:
(i) Dividends of ₹48 crores were paid in 2023.
(ii) The loss on sale of equipment of ₹4 crore reflects a transaction in which equipment with an original cost of ₹ 12 crore and accumulated depreciation
of ₹5 crore was sold for ₹ 3 crore in cash.

## Required:

Using the indirect method, determine the net cash provided by operating activities for 2023 and construct a statement of cash flows.
$[4+8=12]$

Ans: 7(a)
(i) Return on Total resources=Profit after Tax/Total Assets $\times 100$

$$
\begin{gathered}
=₹ 140000 / ₹ 1360000 \times 100 \\
=10.29 \%
\end{gathered}
$$

(ii) Return on Capital Employed=Profit before Tax and Interest/Capital Employed

$$
\begin{aligned}
& =₹(280000+16000) / ₹(12,00,000) \times 100 \\
& =₹ 296000 / ₹ 1200000 \times 100 \\
& =24.7 \%
\end{aligned}
$$

(iii)Return on Shareholders' Fund= Profit after Tax/Shareholders' Fund

$$
\begin{aligned}
& =₹ 140000 / ₹ 1000000 \times 100 \\
& =14 \%
\end{aligned}
$$

Ans 7(b):
Statement of net cash flows provided by operating activities by using indirect method for the year ended March 31, 2023

| Operating Activities | ₹ |
| :--- | ---: |
| Net Income | 66 |
| Adjustment to convert net income to a cash basis :- |  |
| Depreciation and amortization charges | 29 |
| Decrease in accounts receivable | 90 |
| Increase in inventory | $(45)$ |
| Decrease in pre-paid expenses | 3 |
| Decrease in accounts payable | $(80)$ |
| Increase in accrued liabilities | 10 |
| Increase in deferred income tax | 7 |
| Loss on sale of equipment | 4 |
| Net cash provided by operating |  |
| activities Cash Flow from Investing | 84 |
| Activities | $(133)$ |
| Additions to property, building \& equipment | 15 |
| Decrease in long term investments | 3 |
| Proceeds from sale of equipment | $(115)$ |
| Net cash used in investing |  |
| activities Cash Flows from |  |
| Financing Activities | Increase in bonds payable |

| Cash dividends paid | $(48)$ |
| :--- | ---: |
| Net cash used in financing activities | 47 |
|  |  |
| Net increase in cash \& cash equivalents | 16 |
| Cash \& cash equivalents at the beginning of year | 10 |
| Cash \& cash equivalents at the end of year | 26 |

8. (a) A proforma cost sheet of a Company provides the following data:

| Particulars | $₹$ |
| :--- | ---: |
| Raw material cost per unit | $\mathbf{1 1 7}$ |
| Direct Labour cost per unit | $\mathbf{4 9}$ |
| Factory overheads cost per units (includes depreciation of ₹18 per <br> unit at budgeted level of activity) | $\mathbf{9 8}$ |
| Total cost per unit | $\mathbf{2 6 4}$ |
| Profit | $\mathbf{3 6}$ |
| Selling price per unit | $\mathbf{3 0 0}$ |

Following additional information is available:

| Average raw material in stock | : | 4 weeks |
| :---: | :---: | :---: |
| Average work-in-process stock |  | 2 weeks |
| (\% completion with respect to |  |  |
| Materials | : | 80\%; |
| Labour and Overheads | : | 60\%) |
| Finished goods in stock | : | 3 weeks |
| Credit period allowed to debtors |  | 6 weeks |
| Credit period availed from suppliers | : | 8 weeks |
| Time lag in payment of wages |  | 1 week |
| Time lag in payment of overheads |  | 2 weeks |

The company sells one-fifth of the output against cash and maintains cash balance of ₹ $\mathbf{2 , 5 0 , 0 0 0}$.

## Required:

Prepare a statement showing estimate of working capital needed to finance a budgeted activity level of 87,000 units of production. You may assume that production is carried on evenly throughout the year and wages and overheads accrue similarly.
(b) Find out Financial Leverage from the following data:

| Net Worth | ₹ $50,00,000$ |
| :--- | ---: |
| Debt/Equity | $\mathbf{3 : 1}$ |
| Interest Rate | $\mathbf{1 2 \%}$ |
| Operating Profit | ₹ $40,00,000$ |

## Ans 8(a) Estimation of Working Capital Needs

I. Investment in Inventory
(i) Raw material Inventory $=87,000 \times \frac{4}{52} \times ₹ 117$
(ii) Work-in-Process Inventory Material

$$
=87,000 \times \frac{2}{52} \times 0.80 \times 117=3,13,200
$$

Labour and Overheads Cost (other than depreciation)

$$
=87,000 \times \frac{2}{52} \times 0.60 \times 129=2,58,992
$$

(iii) Finished Goods Inventory (Cash Cost)

$$
=87,000 \times \frac{3}{52} \times 246
$$

\| Investment in Debtors (Cash Cost)

$$
=87,000 \times \frac{6}{52} \times 0.8 \times 246
$$

III Cash Balance 2,50,000
Total Investment in Current Assets 48,15,492

Current Liabilities and Deferred Payment

| (i) Creditors $=87,000 \times \frac{8}{52} \times 117$ | $15,66,000$ |
| :--- | ---: |
| (ii) Wages outstanding $=87,000 \times \frac{1}{52} \times 49$ | 81,981 |
| (iii) Overheads outstanding $($ cash cost $)$ | $\underline{2,67,692}$ |
| $=87,000 \times \frac{2}{52} \times 80$ | $\underline{9,15,673}$ |
| Total Deferred Payments |  |

Net Working Capital (Current assets - Non-interest bearing current liabilities)

$$
=₹(48,15,492-19,15,673)=₹ 28,99,819
$$

Ans 8(b) Calculation of financial leverage
Financial leverage $=\frac{E B I T}{E B T}$
Net Worth $=$ Equity $=₹ 50,00,000$
So, debt $=₹ 50,00,000 \mathrm{~L} \times 3=₹ 150,00,000 \mathrm{~L}$
Int. $=₹ 150,00,000 \mathrm{~L} \times 12 \%=₹ 18,00,000$
EBT $=$ Operating profit - Int.

$$
=₹ 40,00,000-₹ 18,00,000=₹ 22,00,000
$$

Financial leverage $=\frac{E B I T}{E B T}=\frac{{ }^{`} 0,00,000}{22,00,000}=1.82$
9. (a) Aries Limited wishes to raise additional finance of ₹ 10 lacs for meeting its investment plans. It has $\mathfrak{₹}, \mathbf{1 0 , 0 0 0}$ in the form of retained earnings available for investment purposes.
The following are the further details:
(i) Debt/equity mix $\mathbf{3 0 \%} / \mathbf{7 0 \%}$
(ii) Cost of debt up to ₹ $1,80,00010 \%$ (before tax) beyond ₹ $1,80,000 \mathbf{1 6 \%}$ (before tax)
(iii) Earnings per share ₹ 4
(iv) Dividend pay-out $50 \%$ of earnings
(v) Expected growth rate in dividend $\mathbf{1 0 \%}$
(vi) Current market price per share ₹ 44
(vii) Tax rate 50\%

You are required to:
a. determine the pattern for raising the additional finance.
b. determine the post-tax average cost of additional debt.
c. determine the cost of retained earnings and cost of equity, and Compute the overall weighted average after tax cost of additional finance.
(b) Annu Ltd. is examining two mutually exclusive investment proposals. The management uses Net Present Value Method to evaluate new investment proposals. Depreciation is charged using Straight-line Method. Other details relating to these proposals are:

| Particulars | Proposal X | Proposal Y |
| :--- | ---: | ---: |
| Annual Profit before tax (₹) | $\mathbf{1 3 , 0 0 , 0 0 0}$ | $\mathbf{2 4 , 5 0 , 0 0 0}$ |
| Cost of the Project (₹) | $\mathbf{9 0 , 0 0 , 0 0 0}$ | $\mathbf{1 8 0 , 0 0 , 0 0 0}$ |
| Salvage Value (₹) | $\mathbf{1 , 2 0 , 0 0 0}$ | $\mathbf{1 , 5 0 , 0 0 0}$ |
| Working Life | $\mathbf{4}$ years | $\mathbf{5}$ Years |
| Cost of capital | $\mathbf{1 0 \%}$ | $\mathbf{1 0 \%}$ |
| Corporate Tax Rate | $\mathbf{3 0 \%}$ | $\mathbf{3 0 \%}$ |

The present value of ₹ 1 at $10 \%$ discount rates at the end of first, second, third, fourth and fifth year are $0.9091 ; 0.8264 ; 0.7513 ;$ and 0.6209 respectively. You are required to advise the company on which proposal should be taken up by it.
$[6+6=12]$

## Ans 9(a)

Determination of pattern for raising additional finance:
Total additional finance required $=₹ 10,00,000$
Debt Equity mix $=30: 70$
Therefore, Additional Debt $=10,00,000 \times 30 \%=₹ 3,00,000$
Additional Equity $=10,00,000 \times 70 \%=₹ 7,00,000$
Detailed pattern
Total equity:
₹ ₹
Retained earnings 2,10,000
Equity share Capital 4,90,000 7,00,000 Debt:
$10 \%$ debt
1,80,000
$16 \%$ debt
$1,20,000 \quad 3,00,000$
Total Additional finance
b) Calculation of Average Cost of additional debt:

Post Tax Cost of $10 \%$ debt $=10 \%(1-0.5)=5 \%$
Post Tax Cost of $16 \%$ debt $=16 \%(1-0.5)=8 \%$
Average cost (after tax) of total debt $=5 \mathrm{x}+8 \mathrm{x}=6.2 \%$
c) Computation of Cost of equity and cost of retained earnings:

Cost of equity $(\mathrm{Ke})==+0.10=0.15$
or $15 \%$
Cost of Retained Earnings ( Kr )
$\mathrm{Kr}=\mathrm{Ke}$ (as there is no flotation cost)
$\mathrm{Kr}=15 \%$
d) Calculation of Weighted Cost of Capital

| Elements | Amounts ₹ | Weight | Specific Cost | Overall cost |
| :--- | :--- | :--- | :--- | :--- |
| Equity share <br> capital | $4,90,000$ | 0.49 | 0.15 | 0.0735 |
| Reserves | $2,10,000$ | 0.21 | 0.15 | 0.0315 |
| $10 \%$ Debt | $1,80,000$ | 0.18 | 0.05 | 0.0090 |
| $16 \%$ debt | $1,20,000$ | 0.12 | 0.08 | 0.0096 |
| Total | $10,00,000$ | 1.00 | - | 0.1236 |

## Ans 9(b): Calculation of Annual Cash Inflow and Present Values:

| Particulars | Proposal X | Proposal Y |
| :--- | :---: | :---: |

|  |  |  |
| :---: | :---: | :---: |
| Annual Profit Before Tax | 13,00,000 | 24,50,000 |
| Less: tax @ 30\% | 3,90,000 | 7,35,000 |
| Annual Profit After Tax | 9,10,000 | 17,15,000 |
| Add: Depreciation (Annual) $90,00,000-1,20,000$ |  |  |
| Proposal X : $\frac{4}{}$ | 22,20,000 |  |
| Proposal Y: 5 | - | 35,70,000 |
| Annual Cash inflow | 31,30,000 | 52,85,000 |
| P. V. of ₹ 1 for 1 to 4 year | 31,698 |  |
| P. V. of ₹ 1 for 1 to 5 year | - | 37,907 |
| Present value of Annual Cash Inflows | 99,21,474 | 2,00,33,850 |
| Add: Present value of salvage value: <br> Proposal X: $1,20,000 \times 0.683$ <br> Proposal Y: $1,50,000 \times 0.6209$ | 81,960 | 93,135 |
| Total Present value | 1,00,03,434 | 2,01,26,985 |
| Less: Initial outflow | 90,00,000 | 1,80,00,000 |
| Net Present Value | 10,03,434 | 21,26,985 |

Advice: Proposal Y should be accepted as it gives higher net present value.
10. Write short note on any three of the following:
[3x4=12]
(a) Issue of Commercial Papers in India
(b) Danger of too high amount of Working Capital
(c) CAPM
(d) NPV

Ans:
10(a) Issue of Commercial Papers in India: CP was introduced as a money market instruments in India in January, 1990 with a view to enable the companies to borrow for short term. Since the CP represents an unsecured borrowing in the money market, the regulation of CP comes under the purview of the Reserve Bank of India:
(i) CP can be issued in multiples of ₹ 5 lakhs.
(ii) CP can be issued for a minimum duration of 15 days and maximum period of 12 months.
(iii) For issuing CP the company's net worth should be more than ₹ 4 crores.
(iv) CP can neither be redeemed before maturity nor can be extended the beyond the maturity period.
(v) CP issue requires a credit rating of P 2 from CRISIL or A2 from ICRA.

10(b) Danger of too high amount of Working Capital:
(i) It results in unnecessary accumulation of inventories and gives chance to inventory mishandling, wastage, pilferage, theft, etc., and losses increase.
(ii) Excess working capital means idle funds which earns no profits for the business.
(iii) It shows a defective credit policy of the company resulting in higher incidence of bad debts and adversely affects Profitability.
(iv) It results in overall inefficiency

## 10(c) CAPM :

The capital asset pricing model explains the behaviour of security prices and provides a mechanism whereby investors could assess the impact of a proposed security investment on their over - all portfolio risk and return. In other words, CAPM formally describes the risk -required return trade-off for securities. The assumptions for CAPM approach are:
i) The efficiency of the security
ii) Investor preferences.

The capital asset pricing model describes the relationship between the required rate of return, or the cost of equity capital and the non-diversifiable or relevant risk of the firm as reflected in its index of non-diversifiable risk.

Symbolically, $\mathrm{K}_{\mathrm{e}}=\mathrm{R}_{\mathrm{f}}+\beta\left(\mathrm{R}_{\mathrm{m}}-\mathrm{R}_{\mathrm{f}}\right)$
Where $K_{e}=$ Cost of equity capital
$\mathrm{R}_{\mathrm{f}}=$ Risk - free rate of return
$\mathrm{Rm}=$ Return on market portfolio
$\beta=$ Beta of Security
10(d) NPV :
The net present value method is a classic method of evaluating the investment proposals. It is one of the methods of discounted cash flow techniques, which recognizes the importance of time value of money.
It is a method of calculating the present value of cash flows (inflows and outflows) of an investment proposal using the cost of capital as an appropriate discounting rate. The net present value will be arrived at by subtracting the present value of cash outflows from the present value of cash inflows If the NPV is positive or at least equal to zero, the project can be accepted. If it is negative, the proposal can be rejected. Among the various alternatives, the project which gives the highest positive NPV should be selected.
This Method is particularly useful for the selection of mutually exclusive projects. It serves as the best decision criteria for mutually exclusive choice proposals.
However, it does not give solutions when the comparable projects are involved in different amounts of investment.
