# Paper- 4: FUNDAMENTALS OF BUSINESS MATHEMATICS AND STATISICS 

## Paper- 4: PUNDAMENTALS OF BUSINESS MATHEMATICS AND STATISIICS

Full Marks: 100

# Section - A <br> (Fundamentals of Business Mathematics) 

## PART- A

1. (a) Choose the comect answer from the given four altematives:
(i) An alloy contains zinc and copper in the ratio 5:8 and another alloy contains zinc and copper in the ratio 5 : 3. If equal amounts of both the alloys are melted together, then the ratio of zinc and copPer in the resulting alloy is:
(a) 25:24
(b) $3: 8$
(c) 103:105
(d) 105: 103
(ii) Divide 581 among $A, B, C$ so that $4 A=5 B=7 C$.
(a) ₹ $245,196,140$
(b) ₹ $140,160,240$
(c) 200, 250, 280
(d) None
(iii) If $\log _{\mathrm{e}} 2 \log _{\mathrm{n}} 625=\log _{10} 16 \log _{\mathrm{e}} 10$, then the value of $\mathbf{n}$ will be :
(a) 16
(b) 10
(c) 5
(d) 4
(iv) $3 x^{2}+6 x+3=0$ then the roots of the equations are -
(a) $(3,3)$
(b) $(-1,-1)$
(c) $(2,4)$
(d) $(4,1)$
(v) The difference between compound interest and simple interest on a sum for 3 years at $5 \%$ per annun is $₹ 122$. The sum is -
(a) ₹ 15,000
(b) ₹ 16,000
(c) ₹ 12,000
(d) ₹ 18,000
(vi) Out of 7 gents and 4 ladies a committee of 5 is to be formed. The number of committees such that each committee include at least one lady is
(a) 240
(b) 144
(c) 441
(d) None of these
(vii) In total number of ways in which six ' + ' and four '-' signs oc c ur together is
(a) $\frac{7!}{3!}$
(b) 45
(c) 35
(d) None of these
(viii) If $p^{\text {th }}, q^{\text {th }}$ and $r^{\text {th }}$ terms of $a$ G.P. be $a, b$, crespectively, then $a^{(q-r)} b^{(r-p)} c^{(p-q)}=$ ?
(a) 0
(b) 1
(c) -1
(d) None
(ix) The set $\{0,2,4,6,8,10\}$ c an be written as
(a) $\{2 x / 0 \leq x \leq 5\}$
(b) $\{x: 0>x>5\}$
(c) $\{2 x: 0<x<5\}$
(d) None of these
(b) State whether the following statements are True (or) False.
$[6 \times 1=6]$
(i) If the ratio of two positive numbers is $\mathbf{4 : 5}$ and their LC.M is $\mathbf{1 4 0}$ then the number are 35,45
(ii) A sum of money amounts to $₹ 720$ in 2 years and $₹ 783$ in $\mathbf{3}$ years the rate of interest is $\mathbf{1 2 \%}$
(iii) The statement $(A \cap B)^{\prime}=A^{\prime} U B^{\prime}$ is true (or) False
(iv) If $x=5+2 \sqrt{6}$ and $x y=1$ then $\frac{1}{x^{2}}+\frac{1}{y^{2}}$ is 89
(v) The integral part of the value of logarithm of a number is called characteristic
(vi) The roots of the equation $(x-4)^{2}(x-2)(x+4)$ are 4,4,2,-2

PART- B
Answer any four questions out of six questions:
[4×4=16]
2. The ratio of the no. of boys to the no. of girls in a school of $\mathbf{7 2 0}$ students is $\mathbf{3 : 5}$. If $\mathbf{1 8}$ new girls are admitted in the school, find how many new boys may be admitted so that the ratio of the no. of boys to the no. of girls may change to $\mathbf{2 : 3}$.
3. What is the present value of $₹ 1,000$ due in 2 years at $5 \%$ compound interest, according as the interest is paid (a) yearly, (b) half-yearly?
4. If $a, b, c, d$ are in G.P., prove that, $(b-c)^{2}+(c-a)^{2}+(d-b)^{2}=(a-d)^{2}$
5. In a class of 50 students appearing for an examination of IC WA, from a centre, 20 failed in Accounts, 21 failed in Mathematics and 27 failed in Costing, 10 failed both in Accounts and Costing, 13 failed both in Mathematics and Costing and 7 failed both in Accounts and Mathematics. If 4 failed in all the three, find the number of
(i) Failures in Accounts only.
(ii) Students who passed in all the three subjects.
6. Number of permutations of $n$ objects taken 4 at a time is twice the number of permutations of 5 objects taken 3 at a time. Find the value of $n$.
7. $2^{x-2}+2^{3-x}=3$

## Section - B

PART- A
8. Answer All objec tive questions.
(a) Answer Multiple Choice Question
(i) The Row heading is also known as
(a) Title
(b) Stub
(c) Caption
(d) Body of table
(ii) Horizontal bar diagrams is used for
(a) Qualitative data
(b) Data varying over time
(c) Data varying over space
(d) a orc
(iii) The third quartile of the following obsenvations $10,19,22,16,15,18,20,18,14,18$, 23 is
(a) 17.55
(b) 18
(c) 15
(d) 20
(iv) Forany two numbers $S D$ is always
(a) Twice the range
(b) Half of the range
(c) Square of the range
(d) none of these
(v) If the coefficient of comelation between two variables is 0.7. Then the percentage of variation unaccounted for is
(a) $70 \%$
(b) $30 \%$
(c) $51 \%$
(d) $49 \%$
(vi) If $r=1$, the angle between two regression equation is
(a) $0^{0}$
(b) $90^{\circ}$
(c) $60^{\circ}$
(d) 450
(vii) If $y=a x^{2}+b x+c$, where $c>0, b>0$ and $a \neq 0$, then Karl Pearson's comelation coeffic ient between $x$ and $y$ is
(a) +1
(b) -1
(c) 0
(d) none of these
(viii) If letters of the word "PENCIL" are arranged in a random order, the probability that $N$ is always next to $E$ is
(a) $4 / 6$
(b) $3 / 6$
(c) $1 / 6$
(d) none of these
(ix) 8 persons are to be arranged in a row. What is the probability that there are exactly 3 persons between two partic ular persons $A$ and $B$.
(a) $1 / 7$
(b) $1 / 6$
(c) $1 / 5$
(d) none of these
(x) A man and his wife appear for an interview for two posts. The probability of husband's selection is $1 / 7$ and the wife's selection is $1 / 5$. What is the probability that only one of them will be selected?
(a) $2 / 7$
(b) $1 / 35$
(c) $12 / 35$
(d) None
(xi) The mean of first 10 even number is -
(a) 5.5
(b) 55
(c) 11
(d) None of these
(x) Mode depends on change of -
(a) Origin
(b) Scale only
(c) Both origin and scale
(d) Neither origin nor scale
(b) State whether the following statements are True (or) False.
$[12 \times 2=12]$
(i) If each item reduced by $\mathbf{1 5}, \mathrm{AM}$ is increased by 15.
(ii) The greater of the two numbers where anithmetic mean is 34 and the geometric mean is $\mathbf{1 6}$ is 64 .
(iii) If the first and third quartiles are $\mathbf{2 2 . 1 6}$ and 56.36, then the quartile deviation is 17.1.
(iv) "Root - mean square deviation from Mean's" is Quartile deviation and Standard deviation.
(v) In ogive, absc issa corresponding to ordinate $\mathrm{KN} / 10$ is $\mathrm{K}^{\text {th }}$ percentile.
(vi) Scatter diagram helps us to find the nature of comelation between two variables.
(vii) When one regression coefficient is positive, the otherwould be negative.
(viii) If $P(A)=1$, then the event $A$ is known as improbable event
(ix) If events are mutually exclusive, then both events cannot oc c ur at some time.
(x) As the sample increases, range tends to decrease.
(xi) The positive average is hamonic means.
(xii) Difference between the maximum and minimum value of a given data is range.

## PART- B

4 Question to be answered out of 6 questions
[6×4=24]
9. Explain the Methods of collecting Primary Data.
10. An inc omplete frequenc $y$ distribution is given as follows:

| Variable | Frequency | Variable | Frequency |
| :---: | :---: | :---: | :---: |
| $10-20$ | 12 | $50-60$ | $?$ |
| $20-30$ | 30 | $60-70$ | 25 |
| $30-40$ | $?$ | $70-80$ | 18 |
| $40-50$ | 65 | Total | 229 |

Given that the median value is 46 , determine the missing frequency using the median formula.
11. From the following table giving height of students calc ulate the semi-interquartile Range and the co-efficient of Quartile Deviation.

| Height in inches | No. of students |
| :---: | :---: |
| 53 | 25 |
| 55 | 21 |
| 57 | 28 |
| 59 | 20 |
| 61 | 18 |
| 63 | 24 |
| 65 | 22 |
| 67 | 18 |
| 69 | 23 |

12. Find Pearson's co-effic ient of comelation from the following data:
(i) $n=50, \Sigma X=75, \Sigma Y=80, \Sigma X^{2}=130, \Sigma Y^{2}=140, \Sigma X Y=120$
(ii) $n=10, \Sigma X=140, \Sigma Y=150, \Sigma(X-10)^{2}=180$.
$\Sigma(Y-15)^{2}=215, \Sigma(X-10)(Y-15)=60$.
13. Fit a linear regression of marks in University examination to the same in College test.

| Serial No. | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Marks in College Test | 35 | 42 | 20 | 50 | 72 | 64 |
| Marks in University examination: | 40 | 48 | 24 | 60 | 84 | 68 |

Let $X=$ marks in College test, $Y=$ marks in University examination. Here we are to determine the equation of best fitted regression line of $Y$ on $X$.
14. A bag contains 5 red and 4 black balls, and the second one 3 red and 5 black balls. One of these is selected at random and a draw of two balls is made from it What is the probability that one of them is red and other is black?
