## Paper 8- CostAccounting

## Paper8-CostAccounting

Section-A
Section A contains Question Number 1. All parts of this question are compulsory.

1. Answer the following questions
(a) Choose the most appropriate altemative for the following (you may write only the Roman numeral and the alphabet chosen for your answer):
[1x10=10]
(i) Labour costs requiring special treatment
(a) Idle time
(b) Overtime
(c) Fringe benefits
(d) Holiday and vacation pay
(ii) Continuous stock taking is a part of-
(a) ABC analysis
(b) Annual stock taking
(c) Perpetual Inventory
(d) None of these
(iii) In which of the following incentive plan of payment, wages on time basis are not guaranteed?
(a) Halsey plan
(b) Rowan plan
(c) Taylor's differential piece rate system
(d) Gantt's task and bonus system
(iv) Example of Direct Expenses
(a) Rent
(b) Royalty charged on production
(c) Bonus to employee
(d) None of these
(v) Charging to a cost center those overheads that result solely for the existence of that cost c enter is known as
(a) Allocation
(b) Apportionment
(c) Absomtion
(d) Allotment
(vi) Standards deals with the principles and methods of detemmining depreciation and amortization cost-
(a) CAS 9
(b) CAS 12

## Answer to MTP_Intermediate_Syllabus 2016」 un 2020_Set 1

(c) CAS 15
(d) CAS 16
(vii) Budgets are shown in $\qquad$ Tems
(a) Qualitative
(b) Quantitative
(c) Materialistic
(d) Both (b) and (c)
(viii) In a process $\mathbf{8 0 0 0}$ units are introduced during a period. 5\% of input is normal loss. Closing work in progress $\mathbf{6 0 \%}$ complete is $\mathbf{1 0 0 0}$ units. $\mathbf{6 6 0 0}$ completed units are transferred to next process. Equivalent production for the period is:
(a) 9000 units
(b) 7440 units
(c) 5400 units
(d) $\mathbf{7 2 0 0}$ units
(ix) In Reconciliations Statements, Inc omes shown only in financial accounts are.
(a) Added to financial profit
(b) Deducted from financial profit
(c) Ignored
(d) Deducted from costing profit
(x) Which of the following is not an element of works overhead?
(a) Sales manager's salary
(b) Plant manager's salary
(c) Factory repaimman's wages
(d) Product inspector's salary

Answer:

| (i)A | (ii)C | (iii) C | (iv) B | (v) A |
| :--- | :--- | :--- | :--- | :--- |
| (vi)D | (vii)B | (viii) D | (ix) B | (x) A |

(b) Match the following :
$[5 \times 1=5]$

|  | Column I |  | Column II |
| :--- | :--- | :--- | :--- |
| (i) | Breakeven point (in Quantity) | A. | Total Eamings $=\mathbf{R} \times \sqrt{\mathrm{S} \times \mathrm{H}}$ |
| (ii) | Researc h and Development Cost | B. | CAS 2 |
| (iii) | Barth variable sharing plan | C. | Fxed Cost/ Contribution per unit |
| (iv) | Capacity Determination | D. | It relates to net profit to total assets |
| (v) | Retum on total resources | E. | CAS 14 |

Answer:

| (i)C | (ii)E | (iii) A | (iv) B | (v) D |
| :--- | :--- | :--- | :--- | :--- |

(c) Say True or False for the following question:
$[5 \times 1=5]$

## Answer to MTP Intermediate_Syllabus 2016 J un 2020_Set 1

(i) Differential Cost is the change in the cost due to change in activity from one level to another.
(ii) ABC analysis is based on the principle of management by exception.
(iii) Identification of direct expenses shall be based on traceability in an economically feasible manner.
(iv) RFO methods are followed for evaluation of equivalent production when prices are fluctuating.
(v) A budget manual is the summary of all functional budgets.

Answer:

| (i)True | (ii)True | (iii)True | (iv)Fa Ise | (v)False |
| :--- | :--- | :--- | :--- | :--- |

(d) Fill in the blanks:
$[5 \times 1=5]$
(i) In a company there were 1200 employee on the rolls at the beginning of a year and 1180 at the end. During the year 120 persons left services and 96 replacements were made. The labour tumover to flux method is___ \%
(ii) $\qquad$ nominee from the regulate like CAG, RBI to the CASB Board.
(iii) In Reconciliations Statements, Incomes shown only in Financial accounts are
$\qquad$ .
(iv) The method of costing used in undertaking like gas companies, cinema houses, hospitals etc is known as $\qquad$ _.
(v) Cash budget is a part of $\qquad$ budget

Answer:

| (i) 9.08 | (ii) Four | (iii)Added to <br> costing profit | (iv) <br> Operating <br> costing | (v) Financial |
| :---: | :---: | :---: | :---: | :---: |

Section - B
Answer any five questions from question numbers 2 to 8.
Each question camies 15 marks
2. (a) The existing Incentive system of $A B C$ tod is as under:

Normal working week : 5 days of 8 hours each plus $\mathbf{3}$ late shifts of $\mathbf{3}$ hours each Day work: ₹ 150 per hour Late shift : ₹ $\mathbf{2 0 0}$ per hour

Average output per operator for 49 hours week i.e. including
3 late shifts : 125 articles.
In order to increase output and eliminate overtime, it was decided to switch on to a system of payment by results. The following information is obtained:
Time rate (as usual) : ₹ 150 per hour
Basic time allowed for 15 articles : 5 hours
Piece-work rate : Add 30\% to basic piece-rate
Premium Bonus : Add 50\% to time
Required:
Prepare a statement showing hours worked, weekly eamings, number of articles produced and labour cost per article for one operator under the following systems:

## Answer to MTP_Intermediate_Syllabus 2016」 un 2020_Set 1

(i) Existing time-rate
(ii) Straight piece-work
(iii) Rowan system
(iv) Halsey premium system

Assume that 140 articles are produced in a 40-hour week under straight piece work, Rowan Premium System, the Halsey Premium System above and worker eams half the time saved under Halsey Premium System.
2. (b) There are three production departments and two service departments in a company. The overheads of service departments are charged on percentage basis as under:

| Department | Produc tion Departments |  |  | Service Departments |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | P | $\mathbf{Q}$ |
| Total Overhead (₹) | $\mathbf{9 , 0 0 0}$ | 6,000 | 3,000 | 702 | $\mathbf{9 0 0}$ |
| Services provided by P | $\mathbf{2 0 \%}$ | $\mathbf{4 0 \%}$ | $30 \%$ | - | $\mathbf{1 0} \%$ |
| Services provided by Q | $\mathbf{4 0 \%}$ | $\mathbf{2 0 \%}$ | $\mathbf{2 0 \%}$ | $\mathbf{2 0 \%}$ | - |

Required: Apportion the overhead of service departments to the production departments using Simultaneous Equation method.

Answer 2(a):
Table showing Labour Cost per Artic le

| Method of payment | Hours <br> Worked | Weekly <br> eamings <br> produced (₹) | Number of <br> articles | Labourcost <br> perarticle (₹) |
| :--- | :---: | :---: | :---: | :---: |
| Existing time rate | 49 | 7,800 | 125 | 62.40 |
| Stra ight piece rate <br> system | 40 | 9,100 | 140 | 65 |
| Rowan premium system | 40 | 8571.43 | 140 | 61.22 |
| Halsey premium system | 40 | 8,250 | 140 | 58.93 |

## Working Notes:

| (i) Existing time rate |  |  |
| :---: | :---: | :---: |
| Weekly wages | 40 hours @ ₹ 150 per hr. | =₹ 6,000 |
|  | 9 hours @ ₹ 200 per hr. | =₹ 1,800 |
|  |  | =₹ 7,800 |
| (ii) Piece rate system |  |  |
| Basic time | 5 hours for 15 artic les |  |
|  | Cost of 15 articles at hourly rate of ₹ $150 / \mathrm{hr}$ | =₹ 750 |
|  | Add: 30\% | =₹ 225 |
|  |  | =₹ 975 |
| Rate perarticle | =₹ 975/15 =₹ 65 |  |
| Ea ming for the week | $=140$ articles $\times ₹ 65=₹ 9,100$ |  |
| (iii) Rowan premium system |  |  |
| Basic time | 5 hours for 15 artic les |  |
|  | 50\% to time |  |
|  | 7.5 hours for 15 a rtic les or 30 minutes perarticle |  |
| Time a llowed for 140 a ric les $=70$ hours |  |  |
| Actual time taken for 140 articles $=40$ hours |  |  |
| Time saved | $=30$ hours |  |
| $\text { Ea mings }=(H W \times R H)+\left(\frac{\text { Time Saved }}{\text { Time Allowed }} \times H W \times R H\right)$ |  |  |

|  | $=(40$ hours $\times ₹ 150)+\left(\frac{30}{70} \times 40 \times ₹ 150\right)$ |  |
| ---: | :--- | :--- |
|  | $=₹ 8571.43$ |  |
| (iv) Halsey premium system: |  |  |
| Eamings | $=(\mathrm{HW} \times \mathrm{RH})+\left[\frac{50}{100}(\mathrm{TA}-\mathrm{HW}) \times \mathrm{RH}\right]$ |  |
|  | $=(40 \times ₹ 150)+\left[\frac{1}{2}(70-40) \times 150\right]$ |  |
|  | $=₹ 8,250$ |  |

## Answer 2(b):

Let 'x' be the total overhead of Service Department P and 'y' be the total overhead of Service Department Q. Then we have:
$x=702+0.2 y$
$y=900+0.1 x$
To solve the equations, rearrange it and multiply by 10 to eliminate decimals, we get:

$$
\begin{align*}
& 10 x-2 y=7,020 .  \tag{i}\\
& -x+10 y=9,000 . \tag{ii}
\end{align*}
$$

Multiplying equation (ii) by 10 and equation (i) by 1 ; and adding it in equation (i), we get:
$10 x-2 y=7,020$
$-10 x+100 y=90,000$
or $98 y=97,020$ or $y=990$
By substituting value of $y$ in equation (i), we get:
$10 x-2(990)=7,020$ or $10 x=(2 \times 990)+7,020$ or $\mathrm{x}=900$
Apportionment of Overhead by Simultaneous Equation Method

| Department | A | B | C | P | Q |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Overhead (given) | 9000 | 6000 | 3000 | 702 | 900 |
| Overhead of P | 180 | 360 | 270 | $(900)$ | 90 |
| Overhead of Q | 396 | 198 | 198 | 198 | $(990)$ |
| Total | 9576 | 6558 | 3468 | - | - |

3. (a) List the functions of the Cost Accounting Standard Board
[6]
4. (b) Given below is the Trading and profit and Loss Account of a company for the year ended 31st March, 2019:

| Particulars | Amount (₹) | Particulars | Amount (₹) |
| :--- | ---: | :--- | ---: |
| To Materials | $\mathbf{2 6 , 4 0 , 0 0 0}$ | By Sales (60,000 units) | $\mathbf{6 0 , 0 0 , 0 0 0}$ |
| To wages | $\mathbf{1 6 , 1 0 , 0 0 0}$ | By Stock (2,000 units) | $\mathbf{1 , 6 0 , 0 0 0}$ |
| To Factory Expenses | $\mathbf{9 , 3 0 , 0 0 0}$ | Work-in-progress: (₹) |  |
| To Administration Expenses | $\mathbf{3 , 8 2 , 4 0 0}$ | Materials $\mathbf{6 4 , 0 0 0}$ |  |
| To Selling Expenses | $\mathbf{4 , 6 0 , 0 0 0}$ | Wages $\quad \mathbf{3 6 , 0 0 0}$ |  |
| To Preliminary Expenses <br> witten off | $\mathbf{5 0 , 0 0 0}$ | Factory Expenses 20,000 | $\mathbf{1 , 2 0 , 0 0 0}$ |
| Net Profit | $\mathbf{2 , 2 5 , 6 0 0}$ | By Dividend Received | $\mathbf{1 8 , 0 0 0}$ |
|  | $\mathbf{6 2 , 9 8 , 0 0 0}$ |  | $\mathbf{6 2 , 9 8 , 0 0 0}$ |

The company manufactures standard units. In the Cost Accounts:
(i) Factory Expenses have been allocated to production at $25 \%$ of prime Cost,

## Answer to MTP_Intermediate_Syllabus 2016」 un 2020_Set 1

(ii) Administrative Expenses at₹ 5 per unit produced and
(iii) Selling Expenses at₹ 6 per unit sold.

Prepare the Costing Profit and Loss Ac count of the company and reconcile the same with the profit disclosed by the Financial Accounts.

## Answer 3(a):

The functions of the Cost Accounting Standard Board:-
(a) To issue the framework for the Cost Accounting Standards.
(b) To equip the Cost \& Management Accounting professionals with better guide lines on cost Accounting Principles.
(c) To assists the members in preparation of uniform cost statements under various statutes.
(d) To provide from time to time interpretations on Cost Accounting Sta ndards.
(e) To issue application guidance relating to particularstandard.
(f) To propagate the Cost Accounting Standards and to persuade the users to adopt them in the preparation and presentation of general purpose Cost Statement.
(g) To persuade the govemment and appropriate authorities to enforce Cost Accounting Standards, to facilitate the adoption thereof, by industry and comorate entities in order to achieve the desired objectives of standardiza tion of Cost Accounting Practices.
(h) To educate the users about the utility and the need for compliance of Cost Accounting Standards.

## Answer 3(b):

## Costing P \& LAccount

Dr.
Cr.

| Particulars | Amount (₹) | Partic ulars | Amount (₹) |
| :---: | :---: | :---: | :---: |
| To Materials | 26,40,000 | By Sales(60,000 units @ ₹ 100 per unit) | 60,00,000 |
| To Wages | 16,10,000 |  |  |
| Prime Cost | 42,50,000 |  |  |
| To Factory Expenses (25\% of Prime cost) | 10,62,500 |  |  |
|  | 53,12,500 |  |  |
| Closing WIP | (1,20,000) |  |  |
| Factory Cost | 51,92,500 |  |  |
| To Administrative Expenses $(62,000 \times ₹ 5)$ | 3,10,000 |  |  |
| Cost of production ( 62,000 units @ ₹ 88.75 per unit) | 55,02,500 |  |  |
| Less: Closing Stock of Finished Goods(2000 units @ 88.75) | $(1,77,500)$ |  |  |
| Cost of goods sold (60,000 units) | 53,25,000 |  |  |
| To Selling Expenses (60,000 $\times 6$ ) | 3,60,000 |  |  |
| Cost of Sales | 56,85,000 |  |  |
| To Profit | 3,15,000 |  |  |
|  | 60,00,000 |  | 60,00,000 |

## Reconciliation Statement

|  | Amount (₹) | Amount (₹) |
| :--- | ---: | ---: |
| Profit asperCost Accounts |  | $3,15,000$ |
| Add: Factory Expenses over absorbed in Cost <br> Accounts (₹ $10,62,500-9,30,000)$ | $1,32,500$ |  |
| Financial income not considered in Cost Accounts | 18,000 | $1,50,500$ |
|  |  | $4,65,500$ |
| Less: Selling Expenses under absorbed in cost <br> accounts (₹ 4,60,000-₹ 3,60,000) | $(1,00,000)$ |  |
| Administrative Expenses under absorbed in cost <br> accounts (₹ 3,82,400-3,10,000) | $(72,400)$ |  |
| Closing stock overvalued in cost accounts <br> (₹ 1,77,500-1,60,000) | $(17,500)$ |  |
| Preliminary Expenses written off in Financial <br> accounts only | $(50,000)$ | $2,39,900$ |
| Profit asper Financial Accounts |  | $2,25,600$ |

4. (a) Component 'Gold' is made entirely in cost centre 100. Material cost is $\mathbf{6}$ paise per component and each component takes 10 minutes to produce. The machine operator is paid $\mathbf{7 2}$ paise per hour, and machine hour rate is $₹ \mathbf{1 . 5 0}$. The setting up of the machine to produce the component 'Gold' takes $\mathbf{2}$ hours $\mathbf{2 0}$ minutes.
On the basis of this information, prepare a cost sheet showing the production and setting up cost, both in total and percomponent, assuming that a batch of:
(a) 10 components,
(b) 100 components, and
(c) $\mathbf{1 0 0 0}$ components is produced
5. (b) The following details are extracted from the costing records of Gold Winner Ltd., an oil mill for the year ended 31st March, 2019. Purchased 2800 tons of copra for₹ $\mathbf{1 , 4 0 , 0 0 0}$ and other expenses were as under:

|  | Crushing (₹) | Refining (₹) | Finishing (₹) |
| :--- | ---: | ---: | ---: |
| Cost of Labour | $\mathbf{1 2 , 0 0 0}$ | $\mathbf{7 , 0 0 0}$ | $\mathbf{5 , 0 0 0}$ |
| Sundry Material | $\mathbf{5 , 0 0 0}$ | $\mathbf{4 , 0 0 0}$ | $\mathbf{3 , 0 0 0}$ |
| Electric Power | $\mathbf{4 , 0 0 0}$ | $\mathbf{3 , 0 0 0}$ | $\mathbf{1 , 6 0 0}$ |
| Steam | $\mathbf{3 , 0 0 0}$ | $\mathbf{2 , 0 0 0}$ | $\mathbf{2 , 5 0 0}$ |
| Repair of Machine | $\mathbf{3 , 0 0 0}$ | $\mathbf{2 , 0 0 0}$ | $\mathbf{5 0 0}$ |
| Cost of Casks | - | - | $\mathbf{8 , 4 0 0}$ |

Factory Expenses were ₹ 12,000 to be apportioned on the basis of wages. 2500 tons of crude oil was produced; 2240 tons of oil was refined and finally $\mathbf{2 2 0 0}$ tons of oil was finished for delivery. Realized ₹5,000 from sale of sacks; ₹8,000 by sale of 250 tons of copra residue and ₹ 10,000 by sale of 200 tons of by-products in refining process.
Prepare Process Acc ounts for the year ending on 31st March, 2019.

## Answer to MTP_Intermediate_Syllabus 2016」 un 2020_Set 1

## Answer 4(a):

## Cost Sheet Component 'Gold'

| Particulars | Batch Size |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 10 Components |  | 100 Components |  | 1000 c omponents |  |
|  | Total | Per component | Total | Per component | Total | Per component |
| A. Setting up Cost: |  |  |  |  |  |  |
| Machine operator wages <br> (2hours 20 minutes @ ₹ 72 p.h) | 1.68 | 0.168 | 1.68 | 0.0168 | 1.68 | 0.00168 |
| Overheads <br> (2 hours 20 minutes @ ₹ <br> 1.50 p.h) | 3.50 | 0.350 | 3.50 | 0.0350 | 3.50 | 0.00350 |
| B. Production Cost: |  |  |  |  |  |  |

| of Finished Oil |  |  |  |  |  |

5. (a) KPN Transport company has been given a license to ply a non air-conditioned bus between Ooty and Coimbatore covering a distance 75 km has been obtained. The Volvo bus will make 4 round trips in a day for 25 days in a month. It has a seating

## Answer to MIP_Intermediate_Syllabus 2016_J un 2020_Set 1

capacity of 30 passengers and on an a verage $85 \%$ occupancy is expected throughout The purchase price of the bus is $₹ 12,00,000$, it has a life of 10 years with a salvage value of $₹ \mathbf{2 0 , 0 0 0}$ at the end of its life. The details of the operating expenses are as under:

| Insurance | ₹ 24,000 per annum |
| :---: | :---: |
| Garage rent | ₹ 4,000 per quarter |
| Road Tax | ₹ 6,000 per annum |
| Repairs | ₹ 8,000 per quarter |
| Administration | ₹ 2,000 per month |
| Driver's salary | ₹ 6,000 per month |
| Conductor's salary | ₹ 4,000 per month |
| Tyres and Tubes | ₹ 6,000 per quarter |
| Diesel | ₹ 22 per litre |
| Oil and Sundries | $₹ 30$ per 100 km run |

The bus consumes a litre of diesel for every $6 \mathbf{k m}$ of run. The company requires a profit of $30 \%$ on total taking.
You are required to prepare an annual cost sheet showing the cost per passenger kilometer and the one way fare per passenger from Ooty to Coimbatore.
5. (b) Panaroma Ltd. Undertook a contract for₹ 8,00,000 on $1^{\text {st }} J$ anuary, 2019. The company fumishes the following details for the year ended 31st December, 2019:

|  | (₹) |
| :--- | ---: |
| Material consumed | $\mathbf{2 , 1 5 , 0 0 0}$ |
| Direct Expenses | $\mathbf{1 5 , 0 0 0}$ |
| Wages | $\mathbf{5 0 , 0 0 0}$ |
| Materials retumed to stores | $\mathbf{5 , 0 0 0}$ |
| Materials stolen from site | $\mathbf{1 5 , 0 0 0}$ |
| Insurance claim admitted | $\mathbf{9 , 0 0 0}$ |
| Works expenses @20\% on wages |  |
| Office expenses @ 10\% on works cost |  |
| Materials in hand on 31.12.2019 | $\mathbf{2 5 , 0 0 0}$ |
| Cash received to the extent of 90\% of works certified | $\mathbf{4 , 8 6 , 0 0 0}$ |
| Cost of work uncertified | $\mathbf{2 0 , 0 0 0}$ |

Plant sent to site costing ₹ $\mathbf{8 0 , 0 0 0}$ with a scrap value of $₹ \mathbf{1 0 , 0 0 0}$ and its useful life is 5 years. The plant was used on the contract for 146 days.
Required:
Prepare Contract Account showing therein the cost of materials issued to site and the amount of profit or loss to be transferred to the profit \& Loss Account.

Answer 5(a):
Operating Cost Sheet

| Particulars | Workings | Amount <br> (₹) |
| :--- | :--- | ---: |
| Fixed Charges: |  |  |
| Insurance |  | 24,000 |
| Garage rent |  | 16,000 |
| Road tax | $[8,000 \times 4$ quarters $]$ | 6,000 |
| Repairs | $[2,000 \times 12]$ | 32,000 |
| Administration | $[6,000 \times 12]$ | 24,000 |
| Driver's salary | 72,000 |  |

| Conductor salary | $[4,000 \times 12]$ | 48,000 |
| :--- | :--- | ---: |
| Tyres \& tubes | $[6,000 \times 4]$ | 24,000 |
| Deprec iation | $[(12,00,000-20,000) / 10$ yea rs $]$ | $1,18,000$ |
| Variable charges: | $[$ W.N. 1$]$ | $6,60,000$ |
| Diesel | $[30 / 100 \mathrm{~km} \times 1,80,000]$ | 54,000 |
| Oil \& sundries | $=\frac{10,78,000}{45,90,000 \text { passengerkm }}$ | $=₹ 0.235$ |
| Total costs |  |  |
| Cost per passenger km |  |  |
| Profit \%on total taking | $\therefore$ Fare per passenger per km | $=\frac{0.235}{70} \times 100$ |
| $\therefore$ Fare for 75 km | $=75 \mathrm{~km} \times ₹ 0.336$ | $=₹ 0.336$ |

## Working Notes:

1. Computation of Km run:

$$
\begin{aligned}
& =75 \mathrm{~km} \times 2 \times 4 \times 25 \text { days } \times 12 \text { months } \\
& =1,80,000 \mathrm{Km}
\end{aligned}
$$

2. Diesel:

$$
\begin{aligned}
& =\frac{1,80,000 \mathrm{~km}}{6 \mathrm{~km}} \times ₹ 22 \\
& =₹ 6,60,000
\end{aligned}
$$

3. Computation of passenger km

$$
\begin{aligned}
& =1,80,000 \mathrm{~km} \times 30 \text { passengers } \times \frac{85}{100} \\
& =45,90,000 \text { passenger } \mathrm{km}
\end{aligned}
$$

4. Depreciation istaken asa fixed charge.

## Answer 5(b):

Calc ulation of Cost of Materials issued to site

|  | $₹$ |
| :--- | ---: |
| Materials consumed | $2,15,000$ |
| Add: Materials stolen | 15,000 |
| Materials retumed to stores | 5,000 |
| Materials in hand (31.12.2019) | 25,000 |
|  | $2,60,000$ |

Contract Acc ount for the year ended 31st December, 2019
Dr. Cr.

| Particulars |  | (₹) | Particulars |  | (₹) |
| :--- | ---: | ---: | :--- | ---: | ---: |
| To Ma teria Is issued to site | $2,60,000$ | By Materia Is retumed <br> to stores | 5,000 |  |  |
| To Direct Expenses | 15,000 | By Insurance cla im <br> A/c (Loss of Stock) | 9,000 |  |  |
| To Wa ges | 50,000 | By Profit a nd Loss <br> A/c (stolen ₹ 15,000- <br> $9000)$ | 6,000 |  |  |
| To Works expenses |  | 10,000 | By Materia Is in hand | 25,000 |  |

| [20\% of wages] |  |  |  |  |  |
| :--- | ---: | ---: | :---: | ---: | ---: |
| To Office Expenses (W.N 1) |  | 29,560 | By Work in progress: |  |  |
| To Deprec iation on plant <br> (W.N.2) |  | 5,600 | Work certified | $5,40,000$ |  |
| To Notional profit c/d | $2,34,840$ | Work uncertified | 20,000 | $5,60,000$ |  |
|  | $6,05,000$ |  |  | $6,05,000$ |  |
| To Profit \& Loss A/c (WN 3) | $1,40,904$ | By Notional Profit b/d |  | $2,34,840$ |  |
| To Reserve c/d | 93,936 |  |  |  |  |
|  | $2,34,840$ |  |  | $2,34,840$ |  |

## Working Notes:

1. Calc ulation of works cost and Office expenses:

|  | $₹$ |
| :--- | ---: |
| Materials consumed | $2,15,000$ |
| Add: Direct Wages | 50,000 |
| Direct Expenses | 15,000 |
| Prime Cost | $2,80,000$ |
| Add: Works expenses | 10,000 |
| Depreciation | 5,600 |
| Works Cost | $2,95,600$ |
| Office expenses[10\% of 2,95,600] | 29,560 |

2. Calculation of Depreciation on plant

## Amount

(₹)
Original Cost of plant
80,000
Less: Residual Value
10,000
Chargeable cost of plant
[a] 70,000
Life of the plant
Annual Depreciation
$[a \div b] \times 146 / 365$
5 years 5,600
3. Profit to be transferred to profit \& loss Account

$$
\begin{aligned}
\text { \%of Completion } & =\frac{\text { WorkCertified }}{\text { ContractPrice }} \times 100 \\
& =\frac{5,40,000}{8,00,000} \times 100=67.50 \%
\end{aligned}
$$

Since the completion of contract is greater than $50 \%$ but not greater than $90 \%, 2 / 3 \mathrm{rd}$ of the Notional Profit in the ratio of Cash received to work certified will be transferred to profit \& Loss A/c.

$$
\begin{aligned}
& =\frac{2}{3} \times \text { Notiona lprofit } \times \frac{\text { Cash received }}{\text { Work Certified }} \\
& =\frac{2}{3} \times 2,34,840 \times \frac{4,86,000}{5,40,000}=₹ 1,40,904
\end{aligned}
$$

6. (a) The trading results of Gupta limited for the two years have been:

| Year | Sales (₹) | Profit/ (Loss)(₹) |
| :--- | :--- | :--- |
| 2019 | $56,00,000$ | $8,00,000$ |
| 2018 | $44,00,000$ | $5,00,000$ |

## Answer to MTP_Intermediate_Syllabus 2016」 un 2020_Set 1

Compute the following:
(i) P/V ratio;
(ii) Fixed costs;
(iii) Break-even sales;
(iv) Margin of Safety at a profit of ₹ $4,80,000$;
(v) The sales required to eam a profit of ₹ $6,00,000$
6. (b) A ball manufacturer marks an average net profit of $₹ 5.00$ per piece on a selling price of $₹ 30.00$ by producing and selling 5,000 pieces or $50 \%$ of the capacity. His cost of sales is

|  | Amount(₹) |
| :--- | ---: |
| Direct material | 11.25 |
| Direct wages | 6.75 |
| Works overheads (50\% fixed) | 5.50 |
| Sales overheads (25\% variable) | 1.50 |

During the curent year, he intends to produce the same number but anticipates that fixed charges will go up by $8 \%$ which direct labour price and material will increase by $10 \%$ and $\mathbf{8 \%}$ respectively but he has no option of increasing the selling price. Under this situation, he obtains an offer for further $25 \%$ of the capacity. What minimum price you will recommend for acceptance to ensure the manufacturer an overall profit of $₹ \mathbf{2 5 , 0 0 0}$.

## Answer 6(a):

(i) P/V Ratio

$$
\begin{aligned}
& =\left(\frac{\text { Change in profit }}{\text { Change in sales }}\right) \times 100 \\
& =\left(\frac{3,00,000}{12,00,000}\right) \times 100 \\
& =25 \%
\end{aligned}
$$

(ii) Fixed Cost
$=($ Sales $\times P / V$ Ratio $)$ - profit
$=(56,00,000 \times 25 \%)-8,00,000$

$$
=₹ 6,00,000
$$

(iii) Break even sales $=\left(\frac{\text { Fixed Cost }}{\text { PV Ratio }}\right)$

$$
\begin{aligned}
& =\left(\frac{6,00,000}{25 \%}\right) \\
& =₹ 24,00,000
\end{aligned}
$$

(iv) Margin of Safety $=\left(\frac{\text { Profit }}{\text { PV Ratio }}\right)$

$$
\begin{aligned}
& =\left(\frac{4,80,000}{25 \%}\right) \\
& =₹ 19,20,000
\end{aligned}
$$

(v) Sales required to eam profit of ₹ 6,00,000

$$
=\left(\frac{\text { Fixed cost }+ \text { desired Profit }}{\text { PV Ratio }}\right)
$$

## Answer to MTP_Intermediate_Syllabus 2016」 un 2020_Set 1

$$
\begin{gathered}
=\left(\frac{6,00,000+6,00,000}{25 \%}\right) \\
=₹ 48,00,000
\end{gathered}
$$

## Answer 6(b):

Computation of Profit at present after increase in cost

|  | Partic ulars | Amount (₹) |
| :---: | :---: | :---: |
| I. | Selling price | 30.00 |
| II. | Variable cost <br> Material ( $11.25 \times 108 / 100$ ) <br> Labour ( $6.75 \times 110 / 100$ ) <br> Works O verhead <br> Sales Overhead | $\begin{array}{r} 12.15 \\ 7.425 \\ 2.75 \\ 0.375 \end{array}$ |
|  | Total | 22.70 |
| III. | Contribution per unit (I- II) | 7.30 |
| IV. | Total C ontribution (5,000 $\times 7.30$ ) | 36,500 |
| V . | Fixed cost <br> Works OH 2.75 <br> Sales OH $\underline{1.125}$ <br> [3.875 $\times 5,000=19,375 \times 108 / 100]$ | 20,925 |
|  | Profit (IV - V) | 15,575 |

Computation of selling price of the order:

Variable cost of order $(2,500 \times 22.70) \quad 56,750$
Add: Required profit (25,000-15,575) 9,425
Sales required 66,175
Selling price of order $=66,175 / 2,500 \quad 26.47$
[(5000/50\%)*25\%] $=2500$
7. (a) The standard material cost for 100 kg of chemical $D$ is made up:

Chemical A 30kg @₹ 4 per kg
Chemical B 40 kg @₹ 5 per kg
ChemicalC 80 kg @₹ 6 perkg
In a batch 500 kg of chemical D were produced from a mix of
Chemical A 140kg @₹ 588
Chemical B 220kg @₹ 1,056
Chemical C 440kg @₹ 2,860
How do you yield mix and price of factors contribute to the variance in the actual cost per 100 kg of chemic al D over the standard cost?

## Answer to MTP Intermediate_Syllabus 2016 J un 2020 Set 1

7. (b) Prepare a Cash Budget for the three months ending $30^{\mathrm{th}} \mathrm{J}$ une, 2019 from the information given below:
(a)

| Month | Sales (₹) | Materials (₹) | Wages (₹) | Overheads (₹) |
| :---: | :---: | :---: | :---: | :---: |
| February | $\mathbf{1 5 , 0 0 0}$ | $\mathbf{9 , 8 0 0}$ | $\mathbf{3 , 2 0 0}$ | $\mathbf{1 , 9 0 0}$ |
| March | $\mathbf{1 6 , 0 0 0}$ | $\mathbf{9 , 2 0 0}$ | $\mathbf{3 , 2 0 0}$ | $\mathbf{2 , 1 0 0}$ |
| April | $\mathbf{1 7 , 0 0 0}$ | $\mathbf{9 , 5 0 0}$ | $\mathbf{3 , 4 0 0}$ | $\mathbf{2 , 2 0 0}$ |
| May | $\mathbf{1 8 , 0 0 0}$ | $\mathbf{1 0 , 5 0 0}$ | $\mathbf{3 , 8 0 0}$ | $\mathbf{2 , 4 0 0}$ |
| June | 19,000 | 10,600 | 4,200 | 2,500 |

(b) Credit terms are:-

Sales/Debtor - 10\% sales are on cash, 50\% of the credit sales are collected next month and the balance in the following month.
Creditors:

| Materials | 2 months |
| :--- | :--- |
| Wages | 1 month |
| Overheads | $1 / 2$ month |

(c) Cash and bank balance on 1st April, 2019 is expected to be ₹ $\mathbf{1 5 , 0 0 0}$
(d) Other relevant information is:
(i) Plant and machinery will be installed in February 2019 at a cost of $₹ 1,00,000$. The monthly installments of $₹ \mathbf{2 , 0 0 0}$ is payable from April onwards.
(ii) Dividend @ $5 \%$ on Preference share capital of ₹ $1,00,000$ will be paid on 1 st $J$ une.
(iii) Advance to be received forsale of vehicles ₹ 11,000 in J une.
(iv) Dividends from investments amounting to $₹ 5,000$ are expected to receive in J une.

Answer 7(a):
Analysis of Given Data
Amount (₹)

| Chemical | Standard Data |  |  | Actual Data |  |  |
| :---: | :---: | :---: | :---: | :---: | ---: | ---: |
|  | Quantity | Price | Value(₹) | Quantity | Price | Value(₹) |
| A | 30 | 4 | 120 | 28 |  | 117.60 |
| B | 40 | 5 | 200 | 44 |  | 211.20 |
| C | 80 | 6 | 480 | 88 |  | 572.00 |
|  | 150 |  | 800 | 160 |  | 900.80 |
| Less: Loss | 50 |  | - | 60 |  | - |
|  | 100 |  | 800 | 100 |  | 900.80 |

Computation of Required Values
Amount (₹)

| Chemical | SQSP(1) | RSQSP(2) | AQSP(3) | AQAP(4) |
| :---: | ---: | ---: | ---: | ---: |
| A | $30 \times 4=120$ | $32.00 \times 4=128.00$ | $28 \times 4=112.00$ | 117.60 |
| B | $40 \times 5=200$ | $42.67 \times 5=213.35$ | $44 \times 5=220.00$ | 211.20 |
| C | $80 \times 6=480$ | $85.33 \times 6=512.00$ | $88 \times 6=528.00$ | 572.20 |
|  | 800.00 | 853.35 | 860.00 | 900.80 |

## Computation of RSQ:

$R S Q=\left(\frac{\text { SQ forthat product }}{\text { SQ forallthe product }}\right) \times A Q$ for that product

For $A=\left(\frac{30}{150}\right) \times 160=32.00$ units

For $B=\left(\frac{40}{150}\right) \times 160=42.67$ units
For $C=\left(\frac{80}{150}\right) \times 160=85.33$ units
Where (1) SQSP = Standard cost for standard material =₹800
(2) RSQ SP $=$ Revised sta ndard cost of material $=₹ 853.35$
(3) $\mathrm{AQSP}=$ Sta nd ard cost of a ctual material $=₹ 860.00$
(4) AQAP =Actual cost of material $=₹ 900.80$

## Computation of required variances:

a) Material sub-usage variance $=(1)-(2)=₹ 53.35(A)[₹ 800-₹ 853.35]$
b) Material mix va riance $=(2)-(3)=₹ 6.65(A)[₹ 853.35-₹ 860]$
c) Material usa ge variance $=(1)-(3)=₹ 60(A)[₹ 800-₹ 860]$
d) Material price variance $=(3)-(4)=₹ 40.80(A)$ [₹ $860-₹ 900.80$ ]
e) Material cost va riance $=(1)-(4)=₹ 100.80(A)[₹ 800-₹ 900.80]$

## Answers 7(b):

Cash Budget (April - June 2019)

| Particulars | April (₹) | May (₹) | June (₹) |
| :--- | ---: | ---: | ---: |
| 1. Balance b/f | 15,000 | 13,500 | 13,250 |
| 2. Receipts: |  |  |  |
| Sales (W N 1) | 15,650 | 16,650 | 17,650 |
| Dividend |  |  | 5,000 |
| Advance against vehicle |  |  | 11,000 |
| Total | 30,650 | 30,150 | 46,900 |
| 3. Payments: |  |  |  |
| Materials | 9,800 | 9,200 | 9,500 |
| Wages | 3,200 | 3,400 | 3,800 |
| Overhead* | 2,150 | 2,300 | 2,450 |
| Capital expenditure | 2,000 | 2,000 | 2,000 |
| Dividend on preference shares |  |  | 5,000 |
| Total | 17,150 | 16,900 | 22,750 |
| 4. Balance c/f | 13,500 | 13,250 | 24,150 |

## Working Notes:

1. Collection from debtors:

| Month | Calculation | April (₹) | May (₹) | J une (₹) |
| :--- | :--- | ---: | ---: | ---: |
| Feb | $(15,000-10 \%$ of 15,000$) \times 50 \%$ | 6750 |  |  |
| March | $(16,000-10 \%$ of 16,000$) \times 50 \%$ | 7,200 | 7,200 |  |
| April | $(10 \%$ of 17,000$)$ | 1,700 |  |  |
|  | $(17,000-10 \%$ of 17,000$) \times 50 \%$ |  | 7,650 | 7,650 |
| May | $(10 \%$ of 18,000$)$ |  | 1,800 |  |
|  | $(18,000-10 \%$ of 18,000$) \times 50 \%$ |  |  | 8,100 |
| June | $(10 \%$ of 19,000$)$ |  |  | 1,900 |
| Total |  | 15,650 | 16,650 | 17,650 |

*Overheads payment in each month is to be taken as half of the current month plus half of the previous month

## Answer to MTP_Intermediate_Syllabus 2016_J un 2020_Set 1

## 8. Short note: (any three)

[ $5 \times 3=15]$
(a) Cost Unit
(b) Difference between Financial Accounting and Cost Accounting
(c) Ec onomic Order Quantity: (EOQ)
(d) Advantages of Marginal Costing (any five)

## Answer:

(a) Cost Unit

Cost Unit is a device for the purpose of breaking up or separating costs into smaller sub divisions attributable to products or services. Cost unit can be defined as a 'Unit of product or service in relation to which costs are ascertained'. The cost unit is the na rrowest possible level of cost object. It is the unit of quantity of product, service of time (or combination of these) in relation to which costs may be ascertained or expressed. We may, for instance, determine service cost per tonne of steel, per tonnekilometre of a transport senvice or per machine hour. Sometimes, a single order or contract constitutes a cost unit which is known as a job. A batch which consists of a group of identical items and maintains its identity through one or more stages or production may also be taken as a cost unit. A few examples of cost units are given below:

| Industry/Product | Cost Unit |
| :--- | :--- |
| Automobile | Number of vehic les |
| Cable | Metres/Kilometres |
| Cement | Tonne |
| Chemicals/Fertilizers | Litre/kilogram/tonne |
| Gas | Cubic Metre |
| Power-Electric ity | Kilowatt Hour |
| Transport | Tonne-Kilometre, Pa ssenger-Kilometre |
| Hospital | Patient Day |
| Hotel | Bed Night |
| Education | Student year |
| Telecom | Numberof Calls |
| BPO Service | Accounts handled |
| Professional Service | Chargeable Hours |

(b) Distinction between Fina ncial Accounting and Cost Accounting

The main differences between Financial and Cost Accounting a re as follows:
\(\left.$$
\begin{array}{|l|l|}\hline \text { (a) It provides the information about the } \\
\text { business in a general way. i.e Profit } \\
\text { and Loss Account, Balance Sheet of } \\
\text { the business to owners a nd other } \\
\text { outside partners. }\end{array}
$$ \quad \begin{array}{l}(a) It provides information to the <br>
management for properplanning, <br>
operation, control and decision <br>

making.\end{array}\right\}\)| (b) It classifies recordsand analysesthetransactions in a subjective manner, i.e <br> according to the nature of expense. |
| :--- |
| (b) It records the expenditure in an <br> objective manner, i.e according to <br> the purpose for which the costs are <br> incurred. |

| (c) It laysemphasison recording aspect without attaching any importance to control. | (c) It provides a detailed system of control for materials, labour and overhead costs with the help of standard costing and budgetary control. |
| :---: | :---: |
| (d) It reportsoperating results and financial position usually at the end of the year. | (d) It gives information through cost reports to management as and when desired. |
| (e) Financial Accounts are accounts of the whole business. They are independent in nature. | (e) Cost Accounting is only a part of the financial ac counts and discloses profit or loss of each product, job or service. |
| (f) Financial Accounts records all the commercial transactions of the business and include all expensesi.e Manufacturing, Office, Selling etc | (f) Cost Accounting relatesto transactions connected with Manufacturing of goods and services, means expenses which enter into production. |

## (c) Economic Order Quantity: (EOQ)

The total costs of a material usually consist of Buying Cost + Total Ordering Cost + Total Carying Cost. Economic Order Quantity is ‘The size of the order for which both ordering and carying cost are minimum'.
Ordering Cost The costs which are associated with the ordering of material. It includes cost of staff posted for ordering of goods, expenses incurred on transportation, inspection expenses of incoming material....etc
Carying Cost The costs for holding the inventories. It includes the cost of capital invested in inventories. Cost of storage, Insurance.....etc
The assumptions underlying the Economic Ordering Quantity (EOQ): The calculation of economic order of material to be purchased is subject to the following assumptions:-
(a) Ordering cost per order and carying cost per unit per annum are known and they are fixed.
(b) Anticipated usage of material in units is known.
(c) Cost per unit of the material is constant and is known as well.
(d) The quantity of material ordered is received immediately i.e lead time is Zero.

The famous mathematician 'WILSON' derived the formula used for determining the size of order for each purc hases at minimum ordering and carying costs, which is as below :-
Economic Ordering Quantity =
Where,
A =Annual demand /Consumption
O = Ordering Cost perorder
C = Camying Cost per unit perannum.

## Graphical representation of EOQ:

## (d) Advantages of Marginal Costing:

1. Marginal costing system is simple to operate than absorption costing because they do not involve the problems of overhead apportionment and recovery.
2. Marginal costing avoids, the diffic ulties of having to explain the purpose and basis of overhead absorption to management that accompany absomtion costing. Fluctuations in profit are easier to explain because they result from cost volume interactions and not from changes in inventory valuation.
3. It is easier to make decisions on the basis of marginal cost presentations, e.g., marginal costing shows which products are making a contribution and which are failing to cover their avoidable (i.e., variable) costs. Under absorption costing the relevant information is difficult to gather, and there is the added danger that management may be misled by reliance on unit costs that conta in an element of fixed cost
4. Marginal costing is essentially useful to management as a technique in cost analysis and cost presentation. It enables the presentation of data in a manner useful to different levels of management for the pupose of controlling costs. Therefore, it is an important technique in cost control.
5. Future profit planning of the business enterprises can well be camied out by marginal costing. The contribution ratio and marginal cost ratios are very useful to ascertain the changes in selling price, variable cost etc. Thus, marginal costing is greatly helpful in profit planning.
