

Job Title: Cost Accountant

We are seeking a detail-oriented and analytical professional to join our Finance team. He should be ready to relocate as the role is situated in a plant.

The ideal candidate will be responsible for product-wise costing and contribution margin analysis, monthly reconciliation of plant overheads, and supporting the financial reporting process during monthly closing activities.

Key Responsibilities:

- Perform product-wise costing and contribution margin analysis to support pricing and profitability decisions.
- Conduct monthly reconciliation of plant overheads, ensuring accuracy and alignment with budgeted figures.
- Collaborate with plant and finance teams to gather data and resolve variances.
- Assist in monthly financial reporting and closing activities, ensuring timely and accurate reporting.
- Provide actionable insights through cost and margin analysis to support business strategy.
- Maintain and improve costing models and templates as per business requirements.
- Ensure compliance with internal financial policies and controls.
- There will be a 6 Month Probation Period after which depending on the performance the candidate will receive a full time position.
